

Capture Dry-Erase Notes From Any Standard Whiteboard

Record every marker stroke and never lose an idea again.

The eBeam Whiteboard receiver attaches to any standard whiteboard and connects to your computer so every handwritten note and drawing can be saved, edited and printed. You can even broadcast notes over the Internet in real-time to anyone, anywhere for free. The pocket-sized system uses standard dry-erase markers in special sleeves to capture everything on your board up to 8ft by 4ft (2.4m x 1.2m). Take your whiteboard to a whole new level with eBeam.

- Capture dry-erase marker notes in real-time
- Easy to install in minutes – simple USB or Bluetooth connection
- Broadcast your whiteboard over the Internet
- Portable and lightweight – take it with you
- Uses standard dry-erase markers
- Works with Windows® and Mac® OS X
- No projector required

Providing Award-Winning eBeam Technology to Every Classroom and Meeting Room

Attach eBeam to your classroom's existing whiteboard and start recording notes in minutes.

Broadcast your notes and drawings in real-time to peers or colleagues using eBeam Whiteboard's free Internet sharing features.

Capture lengthy equations and replay them stroke by stroke – even those that were erased!

eBeam's color-coded marker sleeves are compact and easy to use.

Allow students with learning disabilities to interact with classroom lessons from their desktop, laptop or Tablet PC.

The pocket-sized eBeam Receiver is small enough to take with you, share with colleagues or store in a desk drawer over the weekend.

- Positional resolution: +/- 1.5mm

Bluetooth Radio Range

- Up to 33 ft (10 m)

Bluetooth Certification

- FCC: Part 15, Class B
- Bluetooth 1.1
- Frequency: 2.4GHz
- Serial Protocol

Bluetooth is a radio technology developed to deliver short-range wireless mobility. Bluetooth technology eliminates cables, wires and cords between devices such as your computer and input systems like eBeam. Bluetooth enables communication between devices that are in close proximity (up to 33ft) to one another. Bluetooth facilitates fast, low-powered, secure transmission of data, even when the devices are not in line-of-sight.
