P30
Visual Presenter
Ideal for virtually any presentation. Exceptional detail clarity and color.

850,000 pixel
progressive scan CCD camera. Combined with true XGA resolution, the P30 reproduces 3D objects and subtle color with unsurpassed precision.
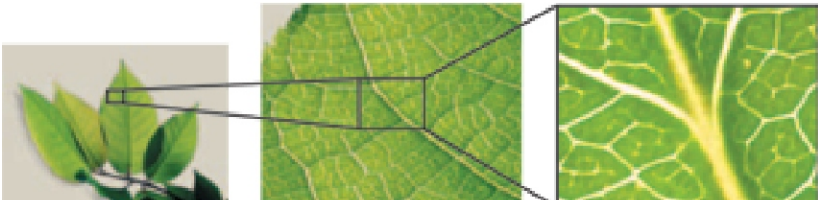

Capture crisp, live images
Present vivid color moving images on a big screen or monitor. A 20 fps frame rate smoothly captures and reproduces moving images that can be either presented live or saved to a PC for future use.
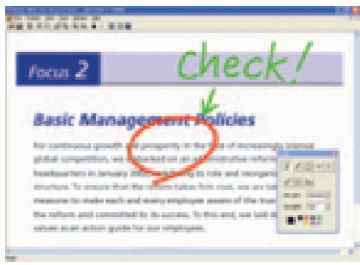

Flexible 'free-angle' camera arm and lamp
Camera head can be freely rotated to capture precise angles for best viewing of any object. Lighting can also be adjusted to set ideal viewing conditions.

60X Zoom

4X Electronic magnification
15X Optical magnification

Focus in on any area of any object on the copy stage to present the most intricate detail to your audience. Up to 60X enlargement of any visual detail.
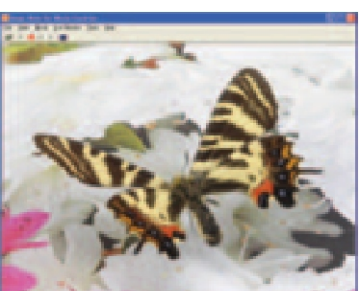

Annotation - on screen
Add immediacy and live action to your presentations. Draw freehand or straight lines in a variety of colors to highlight and enhance screen images - right from your PC with included 'ImageMate' software.

Side-by-Side Split Screen
With 'ImageMate' software you set the stage for direct comparison of live video to stored still images right on the screen. Adds great visual impact to your presentations.

Create Videos and save to PC
'ImageMate' software lets you capture the action of a butterfly's wings, or any other live moving images to make a live video of the action in AVI and wmv formats that can be saved on your PC - for playback with Windows Media Player.

SD Memory Card Presentations
PowerPoint® Presentations, Digital Camera and other PC files, saved on an SD Memory Card, can be outputted from the P30 with 'ImageMate' software as slideshow presentations. A PC is not even required as the P30 has a special slot to read the SD Card - adding a new dimension to presentation capabilities.

Slide Shooting Adapter for 35mm slide and film strip presentation
Even conventional slides are easily presented using the P30's included Slideshow Adapter.

Thumbnail and SlideShow Display
Regular 35mm slides are easily presented using the P30 SlideShow Adapter. Images can be readily displayed as thumbnails (9 or 16 up), or as slideshows, for quickly locating stored files and smoothing the presentation.

Intuitive Controls
Easy operation. Fast zooming with Jog Dial finger control. OPT (optional) Button lets you assign a frequently used function to the front panel

Versatile output

Great connections! DVI for high-quality video transfers, and LCD connect. RGB for easy LCD and data monitor connect. Video and S-Video.

LCD Preview Monitor (Optional)
Small 5 inch color monitor attaches to back of P30 stage to view and preview presentation images .
