for Professional Use

In critical situations, when recording the event or circumstances is required, the SUV-Cam makes it easy to capure and exhange digital information with others. It's a professional's video tool.

- SUV-Cam is perfect when you need to set the camera in unusual circumstances or you want to record with your hands occupied.
- Sharing the experience of one person to train the rest of the organization is especially important when it involves work under difficult conditions. Everyone can learn from recorded events or procedures and be better prepared when they have to face a similar situation. The wearable and hands-free SUV-Cam makes it
- From lessons at a driving school to actual racing, for golf lessons, or for capturing a customer's experience in permanent digital images, the SUV-Cam is the right choice.
- Make full use of the SUV-Cam as a portable and compact surveillance system, as a drive recorder, as an inspection recording system in narrow spaces, or as an imaging solution system under challenging conditions.

for Personal Use

SUV-Cam II

SUV-Cam II

recording capacity on SDHC cards, quick one-push recording, and a new lens

SDHC card support]

Supports the new high capacity SD card standard [SDHC] of 2GB or more, so you can now record more of your adventures with your SUV-Cam.

support design that resists vibration.

mproved camera head design]

To protect against loss of focus caused by intense vibration, Anti-vibration we have employed a lens stabilizer inside the camera to secure the lens adjustment.

One-push recording $\bar{\ }$

New one-push recording makes your SUV-Cam even guicker and

*We do not guarantee that the lens will not get out-of-focus in some situations.

Fixed white balance function 1

Along with the Auto white balance function, we have added a White balance one-push fixed white balance function that compensates the color to precisely match the recording environment. Under difficult light conditions, the SUV-Cam's fixed white balance function allows faithful reproduction of your images.

*300cm, 500cm camera heads can not be used with SUV-Cam II recorder

Record the special situation Easily record the images thought to be difficult to shoot

Quick recording and quick viewing

We have made the SUV-Cam is as simple as possible in both recording and playback operations . . . "Quick & Easy" means all main functions can be managed with only six buttons. Start recording from stand-by (live view mode) with one-push after start-up. You can easily operate the SUV-Cam even when you are wearing gloves. The "Hold" feature prevents interruption of recording by miss-handling during intense or extreme movements. It's possible to view the recorded audio and video whenever or wherever you like.

Hands-free recording

The SUV-Cam consists of a compact waterproof micro CCD camera and palm size digital recorder that you can mount anywhere. Whether it is in a car or motorcycle as a on-board camera, or worn on your body or helmet. Just press the Record button and "Go".

Portable Video recorder

By using the MPEG4 recording format in a portable video recorder the size of a mobile phone,

*The picture is SUV-Cam II

*The images on LCD are simulated

External microphone Video output

Equipped with an external mic input in addition to the built-in mic. This allows the flexibility to place the external mic close to the camera position for better audio

You can enjoy sharing the recorded images with your companions by simply connecting the recorder to a TV monitor, video recorder or projector via the SUV-Cam's AV interfaces. The camera image can be output during recording or playback, so you can use SUV-Cam as a live video source, connecting it to big-screen monitor or recording equipment.

Shock resistant SD/SDHC card storage for reliable high capacity recording More reliable than hard drive storage systems, SD/SDHC cards have been adopted for SUV-Cam. Simply insert the card into a PC for quick transfer or playback of files with Windows Media Plaver. **SD** (SDHC) card is optional ※Windows Media Player is a trademark of Microsoft corporation

Waterproof micro camera with heavy-duty specifications

The camera is housed in a cylindrical stainless-steel body that is compact and waterproof to the depth of 40m (132ft.). Designed for rigorous personal or professional use, it can withstand pressure up to 930kgf (2046lbs). The standard lens achieves the same wide angle view as a 35mm

Measured at ELMO internal test The test data do not guarantee similar performance under similar actual

Selectable camera cable

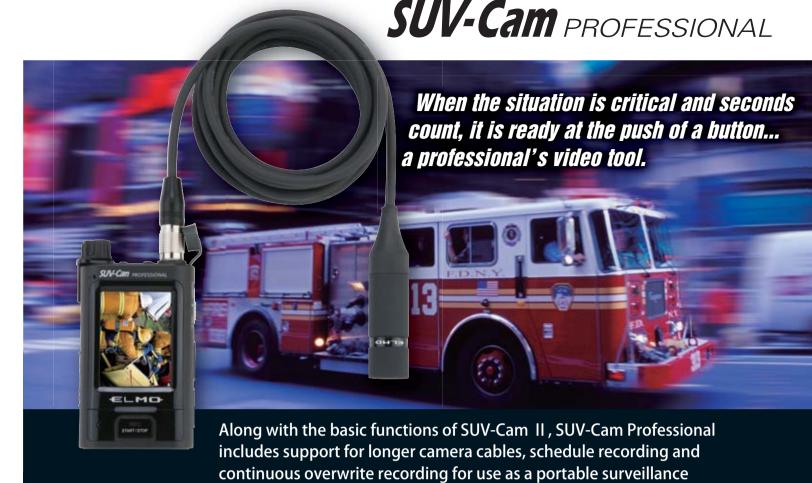

Select the cable and camera head for the SUV-Cam that meets your requirements, then mount it where it's difficult or impractical to use a conventional video camera. Two types of camera cables are available for SUV-Cam II, four types of camera cables for SUV-Cam Professional.

SUV-Cam II / SUV-Cam PROFESSIONAL

— Cable and Camera Heads for Use with Both SUV-Cams — Total length: 80cm for wearable or mounted use Total length: 150cm for wearable or on-board use

SUV-Cam PROFESSIONAL

— For Use Only with the SUV-Cam Professional — Total length: 300cm for various industrial and commercial uses Total length: 500cm for the use when extended wiring is needed

system or as a monitoring camera for industrial applications.

[Max. 5m cable length]

When temporary operating conditions or fixed installations require longer camera cables, 300cm and 500cm camera heads are available for the SUV-Cam Professional. It can also use the SUV-Cam's original 80cm and 150cm cameras. Chose the type of camera heads that meets your usage demands.

[Continuous overwrite recording]

SUV-Cam professional supports continuous overwrite recording hat is a must feature for surveillance recording.

This function is effective when you need to keep recording until a specific even or problem has occurred; such as, for a production management task or security operation.

*Making the recorded files every 128MB, the SUV-Cam Professional continues to record by overwriting the old files when the SD card reaches capacity.

Schedule recording

hedule recording is ready for SUV-Cam Professional. Up to 10 the week, for repetitive recording in certain period, on a designated day of the week or a certain period within one week. Combined with continuous overwrite recording or intermittent recording, SUV-Cam Professional can be managed as a portable
