Why the i-Rover?

The all new Copernicus Royal **i-Rover™** delivers more capabilities to enable technology in the classroom.

All in one mobile unit.
Fully mobile and compact makes sharing between classes a perfect way to introduce SMART™ Boards to teachers and get them familiar and comfortable with the technology.

Quick set-up time.
Requires 1 - 2 plugs to Plug 'n' Teach. Instant access to many electronic resources.

Reduced need to re-orient board & projector.
Resulting in less interruptions while teaching.

Minimized shadowing on the board.
The integrated projector arm provides student and teacher with fewer distractions and more opportunities to learn.

One handed height adjustment.
Ideal use for Kindergarten to University.

Universal design.
Achieved through adjustable height and wheelchair accessibility.

Engineered for safety.
Built for maximum classroom safety. Meets health and safety standards.

One year frame warranty.

Height is easily adjusted with one hand from the lowest position of 78" to the maximum height of 95" for both SMART™ Boards (660 & 680).

Collapsing projector arm for maximum safety, resets to original position.

Built to move throughout the school with ease.

- Folds compact to 31"D (79cm)

Three configurations to choose from

This Copernicus solution turns SMART™ Boards into a mobile center that is easily transported from class to class or shared within divisions. Available in three configurations to accommodate any budget.
