

It takes notes
so you don't have to.

mimio flipChart™

Brainstorm an idea, collaborate on a solution, illustrate a concept, teach a class — and remind everyone NOT to take notes.

Copying notes is now a thing of the past, because mimio flipChart™ works with any easel pad to capture all your notes onto your PC — in color and real time. You can save, print, edit or distribute your flip chart notes instantly, so you can share ideas across the room or around the world.

Get your ideas off the easel and into their hands.

mimio flipChart lets you seamlessly share your notes with anyone, anywhere, anytime.

- Distribute meeting notes before people walk out of the room with one-touch printing.
- Save files as JPEGs, BMPs or Windows metafile images.
- Send your work quickly to an absent colleague through email, fax or HTML.
- Drag-and-drop notes into any Windows® application.
- Play back your whole presentation, page by page – even months later.
- Run a computer-generated presentation on your flip chart with mimioMouse™ and an LCD projector.

Huge impact, small footprint, smaller price.

mimio flipChart is portable, easy to use, and very affordable. It slides easily onto any standard easel pad, sets up in just a few minutes, weighs less than two pounds, and fits easily in your briefcase or computer bag. And because flipChart doesn't require a separate power source, it works anywhere there's a PC and an easel pad.

And the price? It's so reasonable, everyone in your office can afford one. Just think. With mimio flipChart, you'll never again have to . . .

- beg someone to transcribe flip chart notes.
- wait days or weeks for a copy of the meeting notes.
- carry those large scrolls of paper back to your office.

(How much is *that* worth in convenience, productivity and peace of mind?)

"mimio is AWESOME! Everybody raves about how they could use this product on a daily basis, since much of our client education is done with verbal and visual descriptions. . . No longer will we be restricted to faxes or the phone line when trying to work together. "

— C. Dennis Brislawn, Jr., Principal
Attorney Member, Brislawn Lofton, PLLC

"mimio is great for meetings and presentations, because people don't have to take notes. Nothing gets lost. . . . Once you see mimio being used, it's easy to imagine its usefulness."

— Ilene Bierman, Senior Information
Center Consultant, Bulova Corporation
