

Interactive Whiteboard Technology for *EVERY* classroom!

Revolutionize your whiteboard with a uniquely portable and affordable solution that will digitally and interactively enhance, supplement, and reinforce your teaching.

Key Features

Control applications directly from the whiteboard

Save as mimio files (.ink) or as images (jpg, .bmp, .pict)

Export to HTML and post notes to websites

Export to iMovie and/or QuickTime (Mac)

Email or print files

Replay and review notes stroke-by-stroke

Copy and paste notes into any MS Office or Win/Mac application

mimio Ink data files are cross-compatible between Windows and Mac computers.

What is mimio Xi?

mimio Xi is a lightweight, compact, and low cost device that turns any whiteboard into an interactive board. Whether used to digitally capture notes or drawings that can be saved and/or integrated into other materials, or with a multimedia projector to turn the whiteboard into an interactive touch screen, students and teachers can now be more engaged and interactive with class content.

Turn any whiteboard into an interactive whiteboard.

When used with a multimedia projector, teachers and students can use one of the mimio stylus pens like a cordless mouse to control (click, right click, drag and drop) computer applications and documents directly from the whiteboard.

- Control PowerPoint slides, Word documents, Excel spreadsheets
- Browse educational websites on the Internet
- Navigate interactive instructional CDs

Perfect for front of class and whole class instruction as well as allowing students to be more interactive and engaged.

Capture your whiteboard notes ... and your students' attention.

With Expo™ dry-erase markers inserted into the mimio stylus pens, everything that you write or draw on the whiteboard is digitally recorded—in color and real time—so that it can be saved and:

- **Printed** for students with IEPs that require them.
- **Emailed** to absent students.
- **Posted on the web** accessible by students and parents.
- **Copied and pasted** and incorporated into other applications.

Teachers can archive class notes while students focus on understanding the lessons presented instead of copying the board.

Ultra-portability ... No computer required!

With mimio Xi's built-in memory, notes can be recorded and stored without a computer. After class, or at the end of the day, notes can be downloaded by connecting mimio Xi to your computer via the USB cable.

Think it. Share it.™

Elementary School

Project shared readings onto the whiteboard and highlight new vocabulary words. Project images of different volcanoes and point out the differences between cinder cones, composite and shield volcanoes. Let children come to the board and interact with computer software directly.

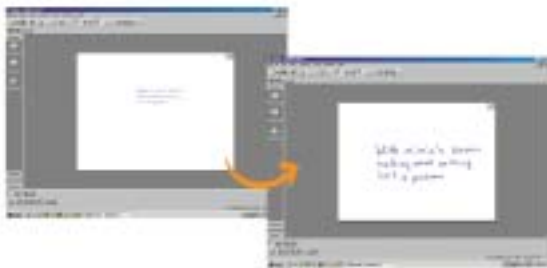

Colleges / Universities

With mimio boardCast (Windows only), audio can be synchronized with class notes to create a file that enables students to see the notes and hear the teacher's explanation. Perfect for distance and on-line learning applications.

Middle / High School

Capture the steps to solving a multi-step math equation and email the solutions to students or post them to a website. With the VCR-like playback feature, students can rewind and replay the sequence of steps ensuring that they arrive at the right solution.

Special Needs

With the playback feature, students can refer back to and review notes as often as they need to. With the zoom feature, visually-impaired students can magnify a word, equation or diagram so that it is visible. Best of all, mimio Xi is compatible with the most commonly used assistive technology products.

Using mimio Xi with Apple iMovie and QuickTime.

The notes, drawings and diagrams that are created on your whiteboard can be exported directly to iMovie™ and/or QuickTime™ (Macintosh only) where audio, video and other special effects can be added to create dynamic, multimedia content which can be played on any computer.

Create content on your whiteboard.

Add video, audio, and special effects in iMovie™.

Create QuickTime movies and share through your website and/or email.

What's included?

- mimio Xi capture bar with linkUSB interface module
- mimio Xi stylus pens
- mimio Xi Eraser with holder
- Four (4) Expo dry-erase markers (Red, Green, Blue, Black)
- USB cable – 16' (5m)
- mimioMouse insert
- Batteries for bar, eraser and pens
- Snap-in mounting brackets
- CD with software, QuickStart Install and User Guide

Warranty:

2 years on all hardware. Extended 3 years with product registration

System Requirements:

Windows

Windows compatible PC with Pentium® II 400 MHz+ processor
32MB RAM minimum (64MB RAM recommended)
15MB free disk space minimum
CD ROM Drive
Available USB port

Mac

G3, G4, iMac, PowerBook G4 or iBook, PowerBook G3
128MB memory (physical RAM)
15MB free disk space minimum
CD ROM Drive
Available USB port
Available Video Out port for mimioMouse
