### **Usage Notice**

The lightning flash with arrow head within an equilateral triangle is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of import operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THE PROJECTOR TO RAIN OR MOISTURE. DANGEROUS HIGH VOLTAGES ARE PRESENT INSIDE THE ENCLOSURE. DO NOT OPEN THE CABINET.

REFER SERVICING TO QUALIFIED PERSONNEL ONLY.

#### Class B emissions limits

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

#### **Important Safety Instruction**

- 1. Read these instructions -before using this projector.
- 2. Keep these instructions -for future reference.
- 3. Follow all instructions.
- 4. Install in accordance with the manufacturer's instructions:
  - A. Do not block any ventilation openings. To ensure reliable operation of the projector and to protect it from overheating, put the projector in a position and location that will not interfere with its proper ventilation. For example, do not place the projector on a bed, sofa, carpet, or similar surface that may block the ventilation openings. Do not put it in an enclosure, such as a bookcase or a cabinet that may keep air from flowing through its ventilation openings.
  - B. Do not use this projector near water or moisture. To reduce the risk of fire or electric shock, do not expose the projector to rain or moisture.
  - C. Do not install near any heat sources, such as radiators, heaters, stoves or other apparatus (including amplifiers) that produce heat.
- 5. Clean only with a dry cloth.
- 6. Only use attachments/accessories specified by the manufacturer.
- 7. Refer all servicing to qualified service personnel. Servicing is required when the projector has been damaged in any way, such as:
- ☐ Power supply cord or plug is damaged.
- Liquids have spilled or objects have fallen into the apparatus.
- The projector has been exposed to rain or moisture, does not operate normally, or has been dropped.

## **Usage Notice**

- Do not attempt to service this projector yourself. Opening or removing covers may expose you to dangerous voltages or other hazards. Please call Optoma to be referred to an authorized service center near you.
- 8. Do not let objects or liquids enter the projector as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock.
- 9. See projector enclosure for safety related markings.
- 10. The projector should not be adjusted or repaired by anyone except properly qualified service personnel.

#### **Precautions**

Please follow all warnings, precautions and maintenance as recommended in this user's guide.

- Warning Do not look into the projector's lens when the lamp is on. The bright light may damage your eyes.
- Warning To reduce the risk of fire or electric shock, do not expose this projector to rain or moisture.
- Warning Please do not open or disassemble the projector as this may cause electric shock.
- Warning When replacing the lamp, please allow unit to cool down, and follow all replacement instructions. See page 50.
- Warning This projector will detect the life of the lamp itself. Please be sure to change the lamp when it shows warning messages.
- Warning Use the "Lamp Reset" function from the on-screen display "Options | Lamp Settings" menu after replacing the lamp module (see page 44).
- Warning When switching the projector off, please ensure the cooling cycle has been completed before disconnecting the power. Allow 90 seconds for the projector to cool down.
- Warning Do not use the lens cap when projector is in operation.
- Warning When the lamp is approaching the end of its life, the message "Lamp is approaching the end of its useful life" displays on the screen. Please contact your local reseller or service center to change the lamp as soon as possible.
- Warning To reduce the risk of injury to the eyes, do not look directly into the laser beam on the remote control and do not point the laser beam into anyone's eyes. This remote control is equipped with a Class II laser that emits radiation.

When the lamp reaches the end of its life, the projector will not turn back on until the lamp module has been replaced. To replace the lamp, follow the procedures listed under "Replacing the Lamp" section on pages 50 - 51.

### **Usage** Notice

#### Do:

- \* Turn off the product before cleaning.
- Use a soft cloth moistened with a mild detergent to clean the display housing.
- Disconnect the power plug from the AC outlet if the product is not being used for a long period of time.

#### Don't:

- Do not block the ventilation slots and openings on the unit.
- \* Do not use abrasive cleaners, waxes or solvents to clean the unit.
- Do not use under the following conditions:
  - In extremely hot, cold or humid environments. Ensure that the ambient room temperature is within 5-40 °C and relative humidity is 10-85% (max.), non-condensing.
  - In areas susceptible to excessive dust and dirt.
  - Near any appliance that generates a strong magnetic field.
  - In direct sunlight.

### **Usage Notice**

### Eye Safety Warnings

- Avoid staring directly into the projector's beam of light at all times.
- Minimize standing facing into the beam. Keep your back to the beam as much as possible.
- Using a stick or laser pointer is recommended to avoid the need for the presenter to enter the beam.
- Ensure that projectors are located out of the line of sight from the screen to the audience; this ensures that, when presenters look at the audience, they do not also have to stare at the projector lamp. The best way to achieve this is by ceiling-mounting the projector rather than placing it on floor or table top.
- When projector is used in a classroom, adequately supervise students when they are asked to point out something on the screen.
- In order to minimize the lamp power needed, use room blinds to reduce ambient light levels.

### Introduction

#### **Product Features**

This product is a single chip 0.55'' DLP® projector. Outstanding features include:

- ◆ Texas Instruments Single chip DLP® Technology
- Computer Compatibility:
   Apple Macintosh, iMac, and VESA Standards:
   UXGA, SXGA+, SXGA, WXGA, WUXGA, XGA, SVGA, VGA
- Video Compatibility:
  - NTSC, NTSC4.43
  - PAL/PAL-M/PAL-N/SECAM
  - SDTV compatible (480i/p, 576i/p)
  - HDTV compatible (720p, 1080i, 1080p)
- Auto source detection with user definable settings
- Full function IR remote control with laser pointer and mouse control
- User friendly multilingual On Screen Menu
- Advanced digital keystone correction and high quality full screen image re-scaling
- ◆ User friendly control panel
- One built-in speaker with 1 Watt amplifier
- Macintosh and PC compatible

### Package Overview

This projector comes with all the items shown below. Check to make sure your unit is complete. Contact your dealer immediately if anything is missing.

Projector with lens cap Zoom Series/Fix Zoom Series

IR Remote Control (with 2 x AAA Batteries)

Power Cord 1.8m

VGA Cable 1.8m

USB Cable 1.8m (XGA series only for EMEA region)

Due to the difference in applications for each country, some regions may have different accessories.

Carrying Case (optional)

RGB to Component Adapter (optional)

SCART to RGB & S-Video Adapter (optional)

#### Documentation:

- ☑ User's Manual
- ☑ Warranty Card
- ☑ Quick Start Card
- ☑ WEEE Card

### Connecting the Projector Connect to Computer / Notebook

Due to the difference in applications for each country, some regions may have different accessories.

- 1. Power Cord
- 2. USB Cable
- 3. Audio-in (RCA Type cable)
- 4. VGA Cable
- 5. RS-232 Cable

#### Connect to Video Sources

Due to the difference in applications for each country, some regions may have different accessories.

- 1. Power Cord
- 2. S-Video Cable (optional)
- 3. SCART to RGB & S-Video Adapter (optional)
- 4. RCA Type audio cable (optional)
- 5. VGA Cable
- 6. Component Cable (optional)
- 7. RGB to Component Adapter (optional)
- 8. Audio-out RCA Type cable (optional)
- 9. Composite Video Cable (optional)

### Powering On / Off the Projector Powering On the Projector

- 1. Remove the lens cap. 1
- 2. Ensure that the power cord and signal cable are securely connected. The Power LED flashes slowly green ②.
- 3. Turn on the lamp by pressing **Power** either on the top of the projector or on the remote. The Power LED flashes rapidly green. The startup screen displays in approximately 10 seconds.
- 4. Turn on your source (computer, notebook, video player, etc.). The projector will detect your source automatically.
  - If you connect multiple sources at the same time, press the "Source" button on the control panel or direct source key on the remote control to switch between inputs.

Turn on the projector first and then select the signal sources.

### Installation

#### Powering Off the Projector

 Press Power to turn off the projector lamp, a message displays on the projector's screen.

- Press Power again to confirm, otherwise the message disappears after 15 seconds.
- 3. The cooling fans continue to operate for about 10 seconds for cooling cycle. When the Power LED flashes slowly green, the projector has entered standby mode.
  - If you wish to turn the projector back on, you must wait until the projector has completed the cooling cycle and has entered standby mode. Once in standby mode, simply press **Power** to restart the projector.
- 4. Disconnect the power cord from the electrical outlet and the projector.
- 5. Do not turn on the projector immediately following a power off procedure.

#### Warning Indicator

- When the LAMP indicator lights red, the projector will automatically shut itself down. Please contact your local reseller or service center. See pages 60-61.
- When the TEMP indicator lights red, it indicates the projector has overheated. The projector will automatically shut itself down. Under normal conditions, the projector can be switched on again after it has cooled down. If the problem persists, you should contact your local dealer or our service center. See pages 60-61.
- When the TEMP indicator flashes red, it indicates the fan has failed. Please contact your local dealer or our service center. See pages 60-61.

# Adjusting the Projected Image Adjusting the Projector's Height

The projector is equipped with elevator foot for adjusting the image height.

#### To raise the image:

- 1. Press the elevator button **①**.
- 2. Raise the image to the desired height angle ②, then release the button to lock the elevator foot into position.
- 3. Use screw in foot 3 to fine-tune the display angle.

#### To lower the image:

- 1. Press the elevator button.
- 2. Lower the image, then release the button to lock the elevator feet into position.
- 3. Use screw in foot **3** to fine-tune the display angle.

### Adjusting the Zoom / Focus (Zoom Series)

You may turn the zoom ring to zoom in or out. To focus the image, rotate the focus ring until the image is clear. The projector will focus at distances from 3.28 to 38.7 feet (1 to 11.8 meters).

### Adjusting Projection Image Size

Screen	Max.	25.5" (64.8cm)	86.7" (220.2cm)	140.2" (356.2cm)	196.3" (498.7cm)	255" (647.6cm)	300.8" (764.2cm)
(Diagonal)	Min.	22.8" (57.9cm)	77.5" (196.8cm)	125.3" (318.3cm)	175.4" (445.6cm)	227.8" (578.7cm)	268.8" (682.9cm)

# Control Panel & Remote Control Control Panel

Using the Control Panel				
Keystone +	Adjust the image Keystone positively.			
Enter	Confirm your item selection.			
Temp LED	Indicate the projector's temperature status.			
Lamp LED	Indicate the projector's lamp status.			
Power LED	Indicate the projector's status.			
Power	Refer to the "Power On/Off the Projector" section on page 15.			
AV-Mute	Momentarily turns off / on the audio and video.			
Menu	Press <b>Menu</b> to launch the on-screen display (OSD) menu. To exit OSD, Press <b>Menu</b> again.			
Re-Sync	Automatically synchronizes the projector to the input source.			
Keystone -	Adjust the image Keystone negatively.			
Source	Press <b>Source</b> to select an input signal.			

#### **Remote Control**

Using the Remote Control					
Power (b)	Refer to the "Power On/Off the Projector" section on page 15.				
Laser	Aim the remote at the viewing screen, press and hold this button to activate the laser pointer.				
PC / Mouse control	The PC/Mouse control can be used to control mouse movement. The mouse function is enabled using the USB cable to connect your computer and the projector.				
L Button	Mouse left click.				
R Button	Mouse right click.				
Page +	Use this button to page up.				
Page -	Use this button to page down.				
Enter <b>←</b>	Confirm your item selection.				
Source	Press <b>Source</b> to select an input signal.				
Re-Sync	Automatically synchronizes the projector to the input source.				
Four Directional Select Keys	Use ▲▼◀► to select items or make adjustments to your selection.				
Keystone +/-	Adjusts image distortion caused by tilting the projector. (±30 degrees)				
Volume +/-	Adjusts to increase/decrease the volume.				
Brightness	Adjust the brightness of the image.				

Using the Remote Control			
Menu	Press <b>Menu</b> to launch the on-screen display (OSD) menu. To exit OSD, Press <b>Menu</b> again.		
Zoom	Press +/- to zoom in of an image.		
Contrast	Press <b>Contrast</b> to adjust the contrast of an image.		
VGA	Press <b>VGA</b> to choose source from VGA-IN connector.		
AV Mute	Momentarily turns off/on the audio and video.		
S-Video	Press <b>S-Video</b> to choose S-Video source.		
Freeze	Press Freeze to pause the screen image.		
Video	Press <b>Video</b> to choose Composite video source.		

### On-screen Display Menus

The Projector has multilingual On-screen Display menus that allow you to make image adjustments and change a variety of settings. The projector will automatically detect the source.

#### How to operate

- To open the OSD menu, press Menu on the Remote Control or Projector Keypad.
- When OSD is displayed, use ◀► keys to select any item in the main menu. While making a selection on a particular page, press ▼ or Enter to enter sub menu.
- 3. Use ▲ ▼ keys to select the desired item and adjust the settings by ◀▶ key.
- Select the next item to be adjusted in the sub menu and adjust as described above.
- 5. Press **Enter** to confirm, and the screen will return to the main menu
- To exit, press Menu again. The OSD menu will close and the projector will automatically save the new settings.

#### Menu Tree

### **Image**

#### Display Mode

There are many factory presets optimized for various types of images.

- Presentation: Good color and brightness from PC input.
- ▶ Bright: Maximum brightness from PC input.
- Movie: For home theater.
- ▶ sRGB: Standardised accurate color.
- User1: User's own settings.
- User2: The initial default settings of this mode is from Movie mode. Any further adjustments by the user in User2 will be saved in this mode for future use.

#### **Brightness**

Adjust the brightness of the image.

- ▶ Press ▶ to lighten the image.

#### Contrast

The contrast controls the degree of difference between the lightest and darkest parts of the picture. Adjusting the contrast changes the amount of black and white in the image.

- ▶ Press ▶ to increase the contrast.

#### **Sharpness**

Adjusts the sharpness of the image.

- ▶ Press ◀ to decrease the sharpness.
- ▶ Press ▶ to increase the sharpness.

### **Image**

#### Saturation

Adjusts a video image from black and white to fully saturation color.

- ▶ Press to decrease the amount of saturation in the image.
- ▶ Press ▶ to increase the amount of saturation in the image.

#### **Tint**

Adjusts the color balance of red and green.

- ▶ Press to increase the amount of green in the image.
- ▶ Press ▶ to increase the amount of red in the image.

#### **Color Setting**

Enter the Color Setting menu. Select the Red/Green/Blue Gain for brightness adjustments and Bias for contrast adjustments for the whole picture. Individual color adjustments for Cyan, Magenta, Yellow can also be adjusted. See page 27 for more details.

#### **Advanced**

Enter the Advanced menu. Select advanced display options such as White Peaking, Degamma, Color Temp., Color Space, Input Source, De-Interlace, and Exit. See page 28 for more information.

### Image | Color Setting

#### Gain

Set RGB gain for the following colors:

- ▶ Red increase or decrease the gain value for red.
- ▶ Green increase or decrease the gain value for green.
- ▶ Blue increase or decrease the gain value for blue.

#### Bias

Set RGB bias for the following colors:

- ▶ Red increase or decrease the bias value for red.
- ▶ Green increase or decrease the bias value for green.
- ▶ Blue increase or decrease the bias value for blue.

#### Color

Set values for the following colors:

- Yellow increase or decrease the color value for yellow.
- ▶ Cyan—increase or decrease the color value for cyan.
- Magenta increase or decrease the color value for magenta.

#### Reset

Reset all Color Setting values to the factory default.

### Image | Advanced

#### White Peaking

This adjustable item utilizes a new color-processing algorithm and system level enhancements to enable higher brightness while providing true, more vibrant colors in picture. The range is from 0 to 10. If you prefer a stronger enhanced image, adjust toward the maximum setting. For a smoother, more natural image, adjust toward the minimum setting.

#### **Degamma**

This allows you to choose a degamma table that has been fine-tuned to bring out the best image quality for the input.

- ▶ Film—for home theater.
- Video for video or TV source.
- Graphics—for image source.
- ▶ PC—for PC or computer source.

#### Color Temp

Adjust the color temperature. Cold temperature, the screen looks colder; with Warm temperature, the screen looks warmer.

#### Color Space

Select an appropriate color matrix type from AUTO, RGB, YUV.

#### **Input Source**

Enter the Input Source submenu. Select the sources to scan for at startup. See page 29 for more information.

#### De-interlace

Press the cursor ◀ or ▶ button to select different De-interlace modes. This function converts an interlaced video signal into progressive signal.

- On: Automatically switch the De-interlace mode and Film mode.
- Off: Switch De-interlace mode to video mode for video source or TV source

### Image | Advanced | Input Source

If all sources are deselected, the projector cannot display any images. Always leave at least one source selected.

#### **Input Source**

Enable input sources. Press  $\blacktriangleleft$  or  $\blacktriangleright$  into the next menu as below and then use  $\blacktriangle$  or  $\blacktriangledown$  to select. Press **Enter** to finalize the selection. The projector will not search inputs that are de-selected.

### Display

#### **Format**

Use this function to choose your desired aspect ratio.

- ▶ 4:3: This format is for 4x3 input sources not enhanced for Wide screen TV.
- ▶ 16:9 I: This format is for 16x9 input sources, like HDTV and DVD enhanced for Wide screen TV.
- ▶ 16:9 II: The non-standard wide-screen display format of the projector. Part of the original image will be cut if the image aspect ratio is less than 1.67:1.
- Native: Depends on the resolution of the display.
- Auto: Automatically selects the appropriate format.

### Display

#### Overscan

Overscan function removes the noise in a video image. Overscan the image to remove video encoding noise on the edge of video source.

#### Zoom

- ▶ Press ◀ to reduce the size of the image.
- ▶ Press ▶ to magnify an image on the projected screen.

#### H Image Shift

Shifts the projected image position horizontally.

- ▶ Press ■ to move the image left on the projected screen.
- ▶ Press ▶ to move the image right on the projected screen.

#### V Image Shift (16:9 only)

Shifts the projected image position vertically (in 16:9 format only).

- ightharpoonup Press ightharpoonup to move the image up on the projected screen.
- ▶ Press ▶ to move the image down on the projected screen.

#### **V** Keystone

Press  $\blacktriangleleft$  or  $\blacktriangleright$  to adjust image distortion vertically and to create a regular image.

## Setup

#### Language

Enter the Language menu. Select the multilingual OSD menu. See page 34 for more information.

#### **Projection**

Select projection method:

- Front Desktop
  The factory default setting.
- Rear Desktop When you select this function, the projector reverses the image so you can project behind a translucent screen.
- ▶ d Front Ceiling
  When you select this function, the projector turns the image upside
- down for ceiling-mounted projection.

   Bear Ceiling
  - When you select this function, the projector reverses and turns the image upside down at same time. You can project from behind a translucent screen with ceiling mounted projection.

#### Menu Location

Choose the menu location on the display screen.

### Setup

#### Signal

Enter the Signal menu. Set projector signal properties. See page 35 for more information.

#### Security

Enter the Security menu. Access the projector's security features. See page 36 for more information.

#### Projector ID

Select a two digit projector ID from 0 through 99.

#### Mute

Toggle Mute on/off.

#### **Volume**

Set the output volume. If Mute is active, adjusting the volume turns off mute.

#### **Advanced**

Enter the Advanced menu. Select the screen display during startup. See page 39 for more information.

#### Language

Choose the multilingual OSD menu. Press  $\blacktriangleleft$  or  $\blacktriangleright$  into the sub menu and then use the  $\blacktriangle$  or  $\blacktriangledown$  key to select your preferred language. Press Enter to finalize the selection.

### Setup | Signal

#### **Frequency**

Change the display data frequency to match the frequency of your computer's graphic card. If you experience a vertical flickering bar, use this function to make an adjustment.

#### **Phase**

Phase synchronizes the signal timing of the display with the graphic card. If you experience an unstable or flickering image, use this function to correct it.

#### H. Position

- ▶ Press ▶ to move the image right.

#### V. Position

- ▶ Press ◀ to move the image down.
- ▶ Press ▶ to move the image up.

No password is required to access Setup | Security unless the Security Timer or Security Setting are enabled.

#### Security Timer

Enter the Security Timer sub menu.

Enter the Months, Days, and hours that the projector can be used without entering the password. Exiting to the Setup menu activates the Security Timer.

Once activated, the projector requires a password on the specified dates and times to allow power on and access to the security menu.

If the projector is in use and the Security Timer is active, the following screen displays 60 seconds before the password is required. Setup | Security

## Setup | Security

If the incorrect password is entered three times, the device auto shutdowns after 10 seconds.

### Change Password

Use this submenu to change the security password for the projector.

- 1. Select Change Password from the Security submenu. The Confirm Change Password dialog box displays.
- 2. Select Yes.

3. Enter the default password <1> <2> <3> <4> <5>.

A second password screen displays.

If the new passwords do not match, the password screen redisplays. 4. Enter the new password twice for verification.

## Setup | Security

### Security Setting

Enable or disable the security password.

- Enabled the current password is required to power on the projector and access the Security menu.
- ▶ Disabled—no password is required for any function.

When security is enabled, the following screen displays at startup and before access to the Security menu is allowed:

## Setup | Advanced

### Logo

Select the screen to display during startup.

- ▶ Optoma the supplied default startup screen.
- ▶ User customized screen capture using the Logo Capture function.

### Logo Capture

Capture a displayed screen to use as the startup screen.

- 1. Display the desired screen on the projector.
- 2. Select Logo Capture from the Advanced menu. A confirmation screen displays.

 Select OK. Screen capture in progress.
 Screen capture succeeded displays. The captured screen is saved as User in the Logo menu.

Only one startup screen can be saved at once. Subsequent captures overwrite previous files.

## **User Controls**

## **Options**

### Source Lock

Lock the current source as the only available source, even if the cable is unplugged.

- ▶ On—only the current source is recognized as an input source.
- Off—all sources selected in Image | Advanced | Input Source are recognized as an input source.

### High Altitude

Adjust the fan speed to reflect the environment.

- ▶ On—increases fan speed for high temperature, humidity, or altitude.
- ▶ Off—regular fan speed for normal conditions..

#### Information Hide

Suppress informational messages on the projected screen.

- ▶ On—no status messages appear on screen during operation.
- ▶ Off status messages appear as normal on screen during operation.

## **Options**

### Keypad Lock

Lock the buttons on the projector top panel.

▶ On—a warning message displays to confirm keypad lock.

Press **Enter** on the projector for 5 seconds to disable the keypad lock.

▶ Off – projector keypad functions as normal.

### **Background Color**

Select the desired background color for the projected image when no source is detected.

### Advanced

Enter the Advanced menu. See page 42 for more details.

### **Lamp Setting**

Enter the Lamp Setting menu. See page 43 for more details.

### Reset

Reset all Options to default factory settings.

## **User Controls**

## Options | Advanced

### Direct Power On

Enable or disable Direct Power On.

- On the projector powers on automatically when AC power is supplied.
- ▶ Off the projector must be powered on as normal.

### **Auto Power Off**

Set the Auto Power Off interval. The projector powers off the lamp after 15 minutes of no signal by default. The following warning is displayed 60 seconds before power off.

The projector will automatically shutdown after 60 sec.

### Sleep Timer

Set the Sleep Timer interval. The projector powers off after the specified time period of inactivity (regardless of signal). The following warning is displayed 60 seconds before power off.

The projector will automatically shutdown after 60 sec.

## Options | Lamp Setting

### Lamp Hour

Displays the number of hours the lamp has been active. This item is for display only.

### Lamp Reminder

Enable or disable the lamp life span reminder.

On—a warning message displays when remaining lamp life is less than 30 hours.

▶ Off – no warning message displays.

### **Brightness Mode**

Select the lamp brightness mode.

- Bright the default setting.
- ▶ STD—lower brightness setting to conserve lamp life.

## **User Controls**

# Options | Lamp Setting

### Lamp Reset

After replacing the lamp, reset the lamp counter to accurately reflect the new lamp's life span.

1. Select Lamp Reset.

A confirmation screen displays.

2. Select **Yes** to reset the lamp counter to zero.

## Troubleshooting

If you experience a problem with your projector, please refer to the following information. If a problem persists, please contact your local reseller or service center.

### **Image Problems**

### No image appears on-screen

- Ensure all the cables and power connections are correctly and securely connected as described in the **Installation** section.
- Ensure all the pins of connectors are not bent or broken.
- Check if the projection lamp has been securely installed. Please refer to the Replacing the lamp section.
- Make sure you have removed the lens cap and the projector is switched on.

### Partial, scrolling or incorrectly displayed image

- Press "Re-Sync" on the remote.
- If you are using a PC:

### For Windows 95, 98, 2000, XP:

- 1. Open the **My Computer** icon, the **Control Panel** folder, and then double click on the **Display** icon.
- 2. Select the **Settings** tab.
- 3. Verify that your display resolution setting is lower than or equal to UXGA ( $1600 \times 1200$ ).
- 4. Click on the **Advanced Properties** button.
  - If the projector is still not projecting the whole image, you will also need to change the monitor display you are using. Refer to the following steps.
- 5. Verify the resolution setting is lower than or equal to UXGA  $(1600 \times 1200)$ .
- 6. Select the **Change** button under the **Monitor** tab.
- 7. Click on **Show all devices**. Next, select **Standard monitor types** under the SP box; choose the resolution mode you need under the "Models" box.
- 8. Verify that the resolution setting of the monitor display is lower than or equal to UXGA ( $1600 \times 1200$ ). (\*)

- If you are using a Notebook:
  - First, follow the steps above to adjust resolution of the computer.
  - 2. Press the toggle output settings. Example: [Fn]+[F4]

Acer ⇔ Asus ⇔ Dell ⇔ Gateway ⇔	[Fn]+[F5] [Fn]+[F8] [Fn]+[F8] [Fn]+[F4]	IBM/Lenovo = HP/Compaq = NEC ⇒ Toshiba ⇒		
Mac Apple: System Preference ⇒ Display ⇒ Arrangement ⇒ Mirror display				

If you experience difficulty changing resolutions or your monitor freezes, restart all equipment including the projector.

# The screen of the Notebook or PowerBook computer is not displaying your presentation

If you are using a Notebook: Some Notebooks may deactivate their own screens when a second display device is in use. Each has a different way to be reactivated. Refer to your computer's manual for detailed information.

### Image is unstable or flickering

- Use **Phase** to correct it. See page 35 for more information.
- ▶ Change the monitor color setting on your computer.

### Image has vertical flickering bar

- Use Frequency to make an adjustment. See page 35 for more information.
- Check and reconfigure the display mode of your graphic card to make it compatible with the projector.

### Image is out of focus

- Make sure the lens cap is removed.
- Adjusts the Focus Ring on the projector lens.
- Make sure the projection screen is between the required distances from the projector. See page 18 and 19 for more information.

### The image is stretched when displaying 16:9 DVD title

When you play anamorphic DVD or 16:9 DVD, the projector will show the best image in 16:9 format on projector side. If you play 4:3 format DVD title, please change the format as 4:3 in projector OSD. If the image is still stretched, you will also need to adjust the aspect ratio by referring to the following:

Please setup the display format as 16:9 (wide) aspect ratio type on your DVD player.

### Image is too small or too large

- Adjust the Zoom Ring on the top of the projector.
- Move the projector closer to or further from the screen.
- Press [Menu] button on the remote control or projector panel, go to Display | Format and try the different settings.

### Image has slanted sides

Use of Keystone is not recommended.

- If possible, reposition the projector so that it is centered on the screen and below the bottom of the screen.
- Press [Keystone +/-] button until the sides are vertical on the remote control.

### Image is reversed

Select Setup | Projection from the OSD and adjust the projection direction.

### **Intermission Problems**

### The projector stops responding to all controls

If possible, turn off the projector, then unplug the power cord and wait at least 60 seconds before reconnecting power.

### Lamp burns out or makes a popping sound

When the lamp reaches its end of life, it will burn out and may make a loud popping sound. If this happens, the projector will not turn on until the lamp module has been replaced. To replace the lamp, follow the procedures in Replacing the Lamp on page 50.

## Projector Status Indication

Massaga	Power LED	Lamp LED	Temp LED

Fan 2 error (Power Fan)	6	2	О
Fan 3 error (Blower Fan)	6	3	О

Steady light ⇔ 🂢

No light ⇒ ○

### Message Reminders

Replacing the lamp:

Out of range: (see the following for more information)

### Remote Control Problems

If the remote control does not work

- Check the operating angle for the remote control is approximately ±15°.
- Make sure there are no obstructions between the remote control and the projector. Move to within 7m (23 ft) of the projector.
- ▶ Make sure the batteries are inserted correctly.
- Replace weak batteries in the remote control.

### **Audio Problems**

### There is no sound

- Adjust the volume on the remote control.
- Adjust the volume of the audio source.
- ▶ Check the audio cable connection.
- ▶ Test the source audio output with other speakers.
- ▶ Have the projector serviced.

### The sound is distorted

- ▶ Check the audio cable connection.
- ▶ Test the source audio output with other speakers.
- ▶ Have the projector serviced.

### Replacing the Lamp

The projection lamp should be replaced when it burns out. It should only be replaced with a certified replacement part, which you can order from your local dealer.

### Important:

- ▶ The lamp contains a certain amount of mercury and should be disposed of according to local ordinance regulations.
- Avoid touching the glass surface of the new lamp, doing so may shorten its operation life.

### Warning:

Be sure to turn off and unplug the projector at least an hour before replacing the lamp. Failure to do so could result in a severe burn.

- 1. Loosen the two captive screws on the lamp compartment cover.
- 2. Remove the lamp compartment cover.
- 3. Remove the two screws from the lamp module.
- 4. Lift the module handle up and pull firmly on the module handle to re-move the lamp module.

- 5. Insert the replacement lamp and push down firmly. Tighten the captive screws to hold the lamp in place.
- 6. Replace the lamp compartment lid and tighten the captive screws.

After replacing the lamp, the lamp hours counter must be reset. See page 44 for more information.

## Cleaning the Projector

Cleaning the projector to remove dust and grime will help ensure trouble-free operation.

### Warning:

- ▶ Be sure to turn off and unplug the projector at least an hour before cleaning. Failure to do so could result in a severe burn.
- ▶ Use only a dampened cloth when cleaning. Do not allow water to enter the ventilation openings on the projector.
- If a little water gets into the projector interior while cleaning, leave unplugged in a well-ventilated room for several hours before using.
- If a lot of water gets into the projector interior when cleaning, have the projector serviced.

### Cleaning the Lens

You can purchase optic lens cleaner from most camera stores. Refer to the following to clean the pro-jector lens.

- Apply a little optic lens cleaner to a clean soft cloth. (Do not apply the cleaner directly to the lens.)
- 2. Lightly wipe the lens in a circular motion.

#### Caution:

- ▶ Do not use abrasive cleaners or solvents.
- To prevent discoloration or fading, avoid getting cleaner on the projector case.

### Cleaning the Case

Refer to the following to clean the projector case.

- 1. Wipe off dust with a clean dampened cloth.
- 2. Moisten the cloth with warm water and mild detergent (such as used to wash dishes), and then wipe the case.
- 3. Rinse all detergent from the cloth and wipe the projector again.

#### Caution:

To prevent discoloration or fading of the case, do not use abrasive alcohol-based cleaners.

## Ceiling Installation

Nоте

Damage to the projector as a result of incorrect installation voids the warranty. To prevent damage to your projector please use the recommended mounting package for installation.

To ensure compliance, only use a UL Listed ceiling mount and screws that meet the following specifications:

- Screw Type: M4
- Maximum screw length: 10 mm
- Minimum screw length: 7.5 mm

Refer to the following diagram to ceiling mount the projector.

- Ensure at least 10 cm clearance between the ceiling and the underside of the projector.
- Avoid locating the projector near heat sources such as air conditioning and heaters. Excess heat may cause the projector to power off.

## Regulation & Safety notices

This appendix lists the general notices of your projector.

### FCC notice

This device has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ▶ Reorient or relocate the receiving antenna.
- ▶ Increase the separation between the device and receiver.
- ▶ Connect the device into an outlet on a circuit different from that to which the receiver is connected.
- ▶ Consult the dealer or an experienced radio/television technician for help.

### Notice: Shielded cables

All connections to other computing devices must be made using shielded cables to maintain compliance with FCC regulations.

### Caution

Changes or modifications not expressly approved by the manufacturer could void the user's authority, which is granted by the Federal Communications Commission, to operate this computer.

## Operation conditions

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1. This device may not cause harmful interference, and
- 2. This device must accept any interference received, including interference that may cause undesired operation.

#### Notice: Canadian users

This Class B digital apparatus complies with Canadian ICES-003.

### Remarque à l'intention des utilisateurs canadiens

Cet appareil numerique de la classe B est conforme a la norme NMB-003 du Canada.

### Declaration of Conformity for EU countries

- ▶ EMC Directive 89/336/EEC (including amendments)
- ▶ Low Voltage Directive 73/23/EEC (amended by 93/68/EEC)
- ▶ R & TTE Directive 1999/EC (if product has RF function)

### Disposal instructions

Do not throw this electronic device into the trash when discarding. To minimize pollution and ensure utmost protection of the global environment, please recycle it.
