Availability

Electronic price list updated with release 172.A (U.S.) and 142.A (Canada), dated November 15, 2010.

Transitional products in this specification guide are **maintained for existing customers only** and are likely to be phased out over time. These products are indicated with a T. Products that are scheduled to be culled are indicated with an X, followed by the last order entry date.

▶For a list of all trademarks, refer to the last page of this specification guide.

For Canadian Pricing
Calculate in the following order to avoid rounding errors:
- Multiply the base price and each option by 1.10.
- Round each to the nearest dollar.
- Add base and options for total list price.

e3 environmental ceramicsteel by PolyVision

The e3 environmental ceramicsteel Difference
Steelcase Premium White Boards incorporate the e3 environmental ceramicsteel surface, which is the first and only ecologically intelligent whiteboard surface to receive a MBDC Cradle to Cradle Gold certification. Cradle to Cradle certification evaluates products for environmentally safe and healthy materials; energy and water use during production, the ability to recycle and reuse materials, and social responsibility. PolyVision, a Steelcase company, has created its fourth generation of ceramicsteel writing surfaces, e3, which delivers the properties of its best selling writing surface, P3 ceramicsteel, and complies with the Cradle to Cradle certification criteria. Steelcase will continue to follow standards set forth by MBDC Cradle to Cradle certification to reaffirm our commitment to sustainability. For over five decades, millions of boards have been produced around the world using PolyVision P3 ceramicsteel. PolyVision used this cross section of consumers to gather the information that helped determine what the next generation of writing surfaces should provide. Our internationally renowned R&D team worked with experts in the field of ceramics and technology to create e3 environmental ceramicsteel surface - the new industry standard for superior quality.

The e3 environmental ceramicsteel Advantage
The ceramic finish consists of a specially formulated glass substance applied by machine. The e3 environmental ceramicsteel surface is fused to steel at a temperature of approximately 1500 degrees Fahrenheit for markerboards. It registers at a minimum of five (5) on the revised Mohs hardness scale.

Benefits of e3
- Ultra-smooth writing surface
- Improved erasability
- Greater color contrast
- Significantly less surface/light distortion
- Optimum eye comfort
- Enhanced visibility
- Reduced chalk pressure, greater adherence
- Increased chalk/surface contrast
- Accepts magnets

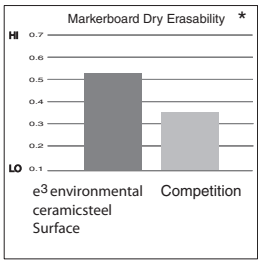
Environmental Features
- Enamel fused to cold-rolled enameling-grade steel
- In all coatings, the total amount of heavy metals cadmium, mercury, hexavalent chromium, and lead is less than 0.1%
- All coatings are free of arsenic and antimony
- No Volatile Organic Compounds (VOCs)
- Steel core is made from minimum 30% post-consumer and post-industrial waste
- e3 environmental ceramicsteel surface is 99% recyclable

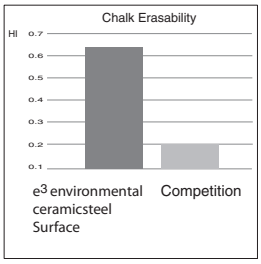
Material Description

e3 environmental ceramicsteel is produced by a controlled, continuous coil-coating process. The surface consists of a steel core of .013" and .019" thickness covered on both sides with thin enamel coatings. The ceramic finish is fused to the steel at a temperature of approximately 1500°F for marker-board and 1250°F for chalkboard.

Characteristic	e3 environmental ceramicsteel Markerboard	e3 environmental ceramicsteel Chalkboard
Writeability	Can be written on with any dry-erase, semi-permanent, water-soluble, permanent marker, pen, or crayon without damaging the surface.	Superior, low-gloss, matte finish readily accepts chalk providing a sharp, unbroken line with less pressure and maximum surface adherence.
Visibility	Contrast/waviness for markerboards (light and dark effects) shall be no greater than 15 when tested with BYK - Gardner Wave Scan 5+ measurement device showing visual acuity (contrast sensitivity) to the human eye at distances greater than 3 meters (10'- 0"). Resolution (visual acuity) shall be based on 3 lines per degree and be visibly maintained beyond the current standard of 3 meters.	Contrast/waviness for chalkboards (light and dark effects) shall be no less than 20 when tested with the contrast measurement test with 773-gram load on chalk. Resolution (visual acuity) shall be based on 3 lines per degree and be visibly maintained beyond the current standard of 3 meters.
Erasability	Dry-erase marker ink can be wiped off easily with a dry cloth or standard eraser. Crayon, semi-permanent, and permanent marker pen inks can be removed with a solvent based cleaner.	Erases easily with a dry cloth or standard chalk eraser, retains minimal residual chalk dust, and will not leave “ghost writing.” Color change (dark/light) after chalk erasing is reduced 60% from traditional surfaces.
Cleanability (Washability)	All residues that remain after normal erasing can be removed by following the care and cleaning instructions on the www.polyvision.com/e3cleaning website.	WET Ghost measurements on chalkboard surfaces before and after wet cleaning shall not exceed a factor of 0.49. For further care and cleaning instructions, refer to the www.polyvision.com/e3cleaning website.
Wearability	Vitrified glass-hard ceramic surface fused to light-gauge enameling grade steel at approximately +1500°F. High resistance to impact damage, abrasion, scratching, and color fading. The e3 environmental ceramicsteel surface registers a 6.5 on the revised Mohs hardness scale.	Vitrified glass-hard ceramic surface fused to light-gauge enameling grade steel at approximately +1250°F. High resistance to impact damage, abrasion, scratching, and color fading. The e3 environmental ceramicsteel surface registers at a minimum of 5 on the revised Mohs hardness scale.
Magnet Capability	The e3 environmental ceramicsteel surfaces are ideal for all magnets and magnetic impregnated materials and will not be scratched or damaged from the contact.	The e3 environmental ceramicsteel surfaces are ideal for all magnets and magnetic impregnated materials and will not be scratched or damaged from the contact.
Flame Resistance	The e3 surface is 100% non-combustible.	The e3 surface is 100% non-combustible.

e3 environmental ceramicsteel Low-Gloss Markerboard





The ultra-smooth finish enables dry markers and chalk to glide easily across the e³ environmental ceramicsteel surface with minimal friction. The surface smoothness allows more dry-erase ink and chalk to be removed, improving erasability and eliminating "ghost writing".

*All markerboard erasability tests were conducted using High-Gloss e³ environmental ceramicsteel surfaces.

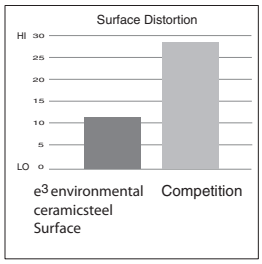
For more information on e³ environmental ceramicsteel, visit www.polyvision.com

Writeability

Provides the same writing characteristics as High-Gloss.

Erasability

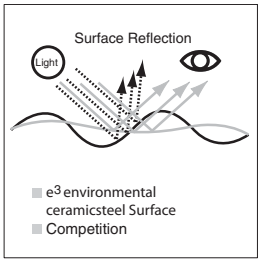
Low-Gloss surfaces will not erase as thoroughly as High-Gloss surfaces. When this occurs, a water-dampened cloth will be required to erase the surface.



Surface distortion (Orange Peel) has been reduced significantly in direct comparison with the competition's surface.

Cleanability

After normal erasing of Low-Gloss surfaces, solvents may be used to remove harder-to-erase dry marker inks and residue from other pens. Always clear water rinse after using any cleaning agent on the surface. Refer to: www.polyvision.com/e3 cleaning for further details.



The e³ environmental ceramicsteel surface maximizes the performance of reflected light and reduces surface glare, resulting in improved visibility under a wide range of lighting conditions.

e³ Cleaning/Daily Care and Maintenance

Maintenance

- Wipe board with a clean cloth moistened by a liquid markerboard cleaner or a solution of 50% water and 50% isopropyl alcohol.
- Rinse with clear water.
- Wipe dry with a clean cloth If your board is used daily, the cleaning should be performed at least 2-3 times a week.

More thorough cleaning may be required if writing is left on the board for more than two days.

Markers

Use any high-quality dry erase marker.

CAUTION! The use of Low Odor markers may cause ghosting to occur. If Low Odor markers have been used, the surface can be completely cleaned by following the cleaning instructions above. Remember to discard eraser if used with Low Odor markers.

Removing Permanent Marker

Option 1:

- Write over the top of the permanent marker ink with a dry-erase marker
- Simply erase

Option 2:

- Moisten a clean, dry cloth with isopropyl alcohol
- Wipe the board in a circular motion to loosen marker residue
- Rinse with clear water
- Dry the board with a clean cloth
- Repeat these steps as necessary

Installer's Instructions for Initial Cleaning at Time of Installation

NOTE: These initial cleaning instructions are shipped with every board.

- For initial cleaning, wipe your board with a clean cloth moistened by a mild, alcohol-based cleaner.
- Rinse with clear water. This step is simple, but very important.
- Wipe dry with a clean cloth.

For online access to these instructions, visit www. polyvision.com

e³ Application Information

Sizes

Sizes of tackboards and markerboards are nominal; refer to actual dimensions for exact specifications.

Tackboards

- Standard tackboard construction is 3/8" fiberboard over 1/8" hardboard.
- COM fabrics may be specified. COMs must be approved.

Spline Joints

- Spline joints allow larger format boards to be delivered in 2 equal pieces. Assembly required.
- Whiteboards weigh approximately 5lbs/ft.
- Assembly required on-site.
- Spline joints are an option, with upcharge on: Edge, Access, Denska, 110 Series, and 555 Series markerboards 10' and larger in length.
- Spline board joints are visible. Every effort is made to ensure a tight seam.
- Please be sure your client is aware that the spline joint will show.

CopyCam

Using CopyCam with Premium Whiteboards

- CopyCam works with all Premium Whiteboards.

IMPORTANT: Cables cannot be routed behind Senti, 110, or 555 Series boards.

- CopyCam works with boards 8' (2.4m) or less in width.
- CopyCam is only available in champagne finish.

Magnetic Mount Option (MGMT)

- Enables Senti boards, up to 48" x 48", to be mounted on flat, painted steel surfaces only.

NOTE: This mount is not intended for fabric or other coverings over steel.

Option	Description
PLMT01	2" over panel bracket/hook
PLMT03	3" over panel bracket/hook

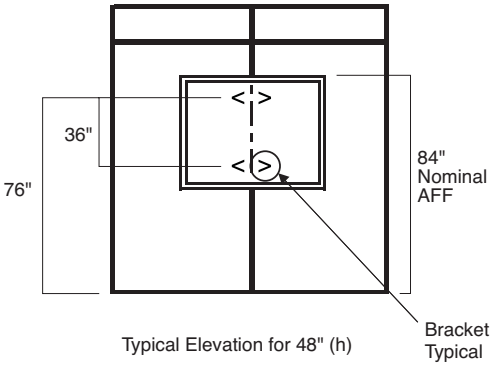
PPPW (Privacy Wall) and on/off Module Bracket Application Guide

PPPW (Privacy Wall) Bracket Application Guide

- On- and off-module bracket for installation of markerboards and tackboards on Privacy Wall, Answer, and Kick.
- Allows Premium Whiteboards to be mounted on Privacy Wall, Answer, Avenir, or Kick using a standard metal cleat mounting system.
- Ideal application on a Privacy Wall or when spanning multiple Answer/Kick panels with a single markerboard.
- Compatible with boards 48"H only.
- Not for use with Senti, FreeFlow, or Contractor Series.
- Cannot install two boards at right angles.
- Ships with six non-handed brackets for maximum application flexibility; field-modify for application by removing tabs per instructions.
- The required minimum number of PPPW (Privacy Wall) Brackets must be installed to ensure secure application of board.
- Brackets must be installed in the correct orientation; i.e. left or right hand, as indicated in the key and diagrams below.

NOTE: Space between panel face and rear of board is ± 1/4".

Standard Mounting Height and Centerline Application

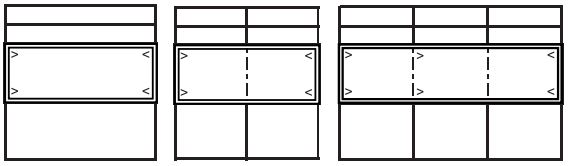


Typical Elevation for 48" (h) Board Applications

- 48"H x 48"W only

On-Module — Minimum Bracket Application

Board Width	48"	60"	72"	84"	96"	120"	144"	168"	192"
Minimum Number of Brackets	4	4	4	4	4	4	6	6	6



KEY:

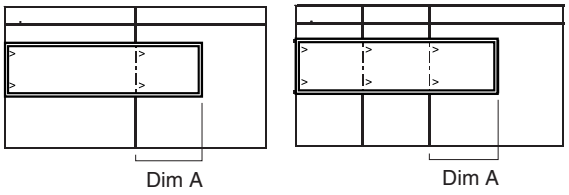
> Right Hand Application of PPPW Bracket

< Left Hand Application of PPPW Bracket

Asymmetrical Off-Module Overhang Allowances and Minimum Bracket Application

Board Width	60"	72"	84"	96"	120"	144"	168"	192"
Minimum Number of Brackets	4	4	4	4	4	6	6	6
Dimension A - Maximum Overhang	18"	22"	25"	29"	36"	38"	38"	38"

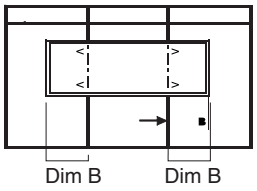
NOTE: Bracket direction must be the same as the overhang direction. This example shows right hand bracket installation with right hand overhang.



Symmetrical Off-Module Overhang Allowances and Minimum Bracket Application

Board Width	60"	72"	84"	96"	120"	144"	168"	192"
Minimum Number of Brackets	4	4	4	4	4	6	6	6
Dimension B - Maximum Overhang	18"	22"	25"	29"	36"	38"	38"	38"

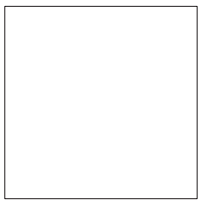
NOTE: Dimension B must be equal on both the left and the right. For example, a 60" board may have a maximum 18" overhang both left and right side.



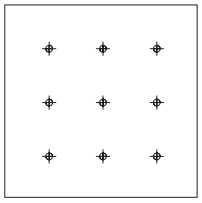
Screenprint Options

A selection of standard screenprint options are offered. Custom screenprint is also available. Screenprint graphics are permanently fused to the e³ environmental ceramicsteel surface. Screenprint is not available on boards with spline joints.

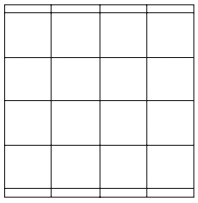
Standard Screenprint Options
Premium Whiteboards
Up to 10' Wide:



7655
e³ White

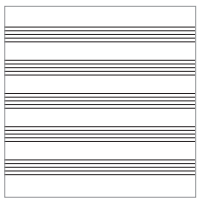


7656
Circular Dots
at 2" Intervals



7657
2" x 2"
Grid Pattern

Contractor Series
Whiteboards
Up to 8' Wide:



7658
Music Staff Lines
5 Lines per Staff

Standard Screenprint Options for Markerboards
Markerboards are available in 7655 High Gloss White e³ environmental ceramicsteel. Optional screenprint patterns are available to provide a guide for writing or drawing. Screenprint is not visible at a distance greater than 3' (0.9 meters), with the exception of Music Staff Lines which are printed in black.

Custom Screenprint Options for Markerboards
Custom screen printing is available in single or multiple colors on e³ environmental ceramicsteel. This service is available for both customer-provided artwork and Steelcase Visual Worktools standard artwork. Extended lead times apply. Artwork options include, but are not limited to:

- Planning boards
- Hospital boards
- Educational boards
- Corporate graphics and logos
- Maps

Please refer to screenprint guidelines.

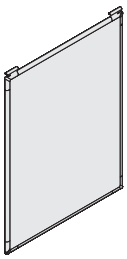
Huddleboard Markerboards and Photo Boards

▶Specifying, page 43



Markerboard
- Lightweight; weighs less than 5 pounds
- 6672 Platinum White frame
- Double-sided marker surface
- One year warranty

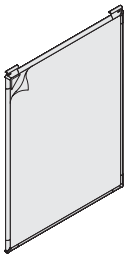


Photo Boards
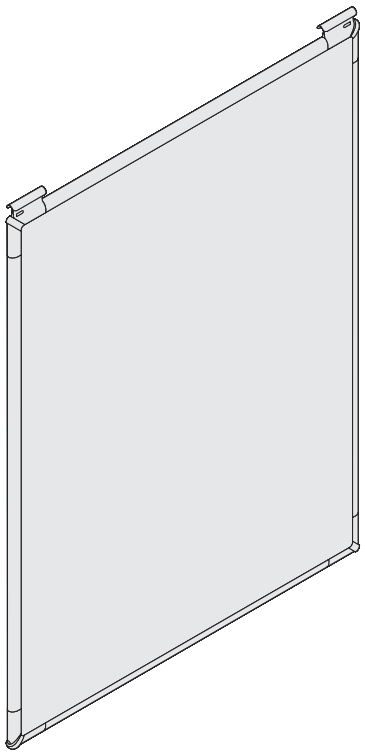
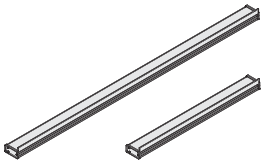
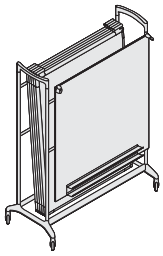
- Lightweight; weighs less than 5 pounds
- 6672 Platinum White frame
- Front side features 3M repositionable, adhesive, flexible cover allowing display without tack or push pins.
- Reverse side features white markerboard surface.
- Translucent plastic hanger hooks are standard with each board.
- One year warranty



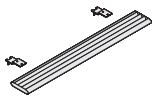
Product Details



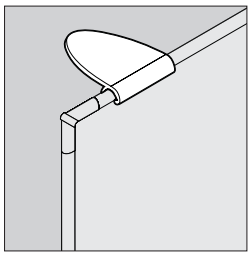
Worktool rail is double-tracked and comes standard in either clear or black anodized aluminum. Worktool rails mount directly into structural walls (drywall).



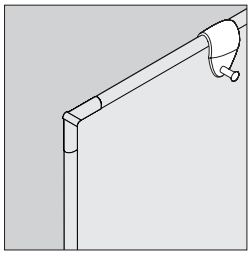
Mobile easel stores and transports up to ten Huddleboards. Display adjusts to three different heights: sitting (63"H), and standing (71"H and 73"H). Grips on the display board hold Huddleboards in either portrait or landscape orientation.



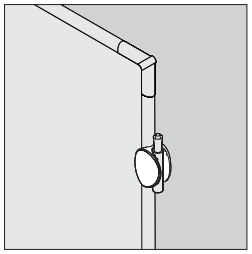
Panel-mounted trays come standard with drywall mounting brackets. Panel-mounted trays provide space for Huddleboards and storage for markers and erasers. Optional panel-mounting hardware for Avenir, Series 9000, Answer, Kick, and Privacy Wall is also available.



Ledge grabbers secure Huddleboards to furniture panels, storage cabinets, and other horizontal surfaces, in either landscape or horizontal orientation.



Flipchart pegs clip on to the Huddleboard frame to accept standard paper flipcharts.



Marker grips attach to any Huddleboard frame to hold a dry erase marker.

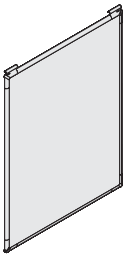
Actual Dimensions for Huddleboards

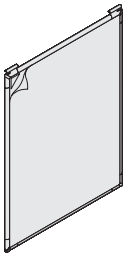
Depth	3/4"
Width	23 1/3" or 32"
Height	32" or 42"
Weight	Less than 5 lb

Actual Dimensions for Mobile Easels

	Landscape to top of board	Portrait to top of board
Sitting Height	52" or 1321 mm	63" or 1600 mm
Standing Height 1	59" or 1500 mm	71" or 1803 mm
Standing Height 2	66" or 1676 mm	78" or 1981 mm

Huddleboard Markerboards and Photo Boards





Tip: Markerboards are double-sided and available in two sizes.

Standard Includes	Required to Specify
▶ Need help? Product details, page 42	Style number
• Double-sided markerboard: 7655 High Gloss White • 3M repositionable adhesive on Photo Board and Markerboard on reverse side, if selected • Trim: 6672 Platinum White • Translucent plastic hanger hooks

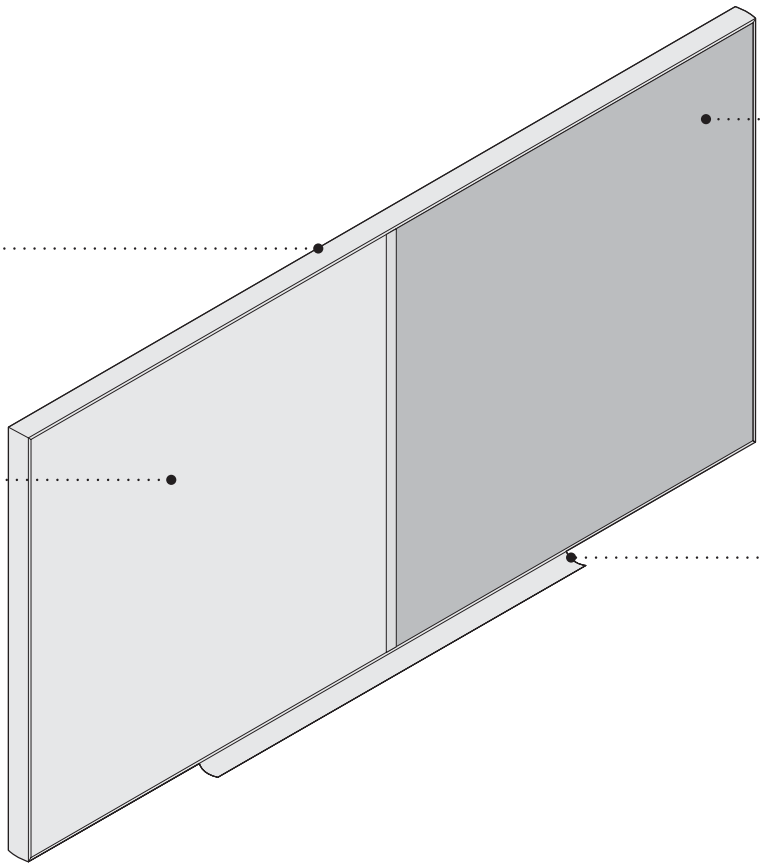
Combo Boards

▶Specifying, page 48

Combo boards are 1/2 marker, 1/2 tackable surface divided by a 3/4" vertical aluminum extrusion.

Combo boards are available with an easy-mount metal cleat-mounting system.

Writing surface is high-performance e3 ceramicsteel.



Tackable surface is available in a selection of standard or graded-in fabrics. COM is also available.

Marker tray is clear anodized aluminum and matches the aluminum frame.

Patient Room Board

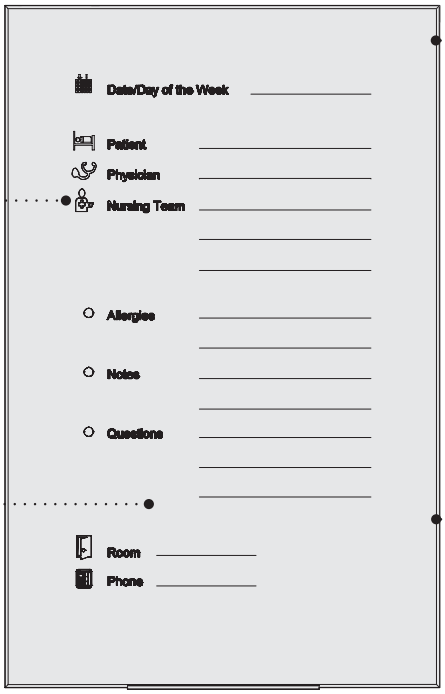
▶Specifying, page 55

Patient room boards are available as marker-board or combo board (1/2 markerboard, 1/2 tackboard).

Custom sizes, configurations, and graphics are available.

Markerboard weighs approximately 25 lb. Combo board weighs approximately 40 lb.

Markerboard comes standard with one of two graphics (Option A or B). Graphic Option B comes standard with Nurture logo (must specify "No Logo" if not desired).

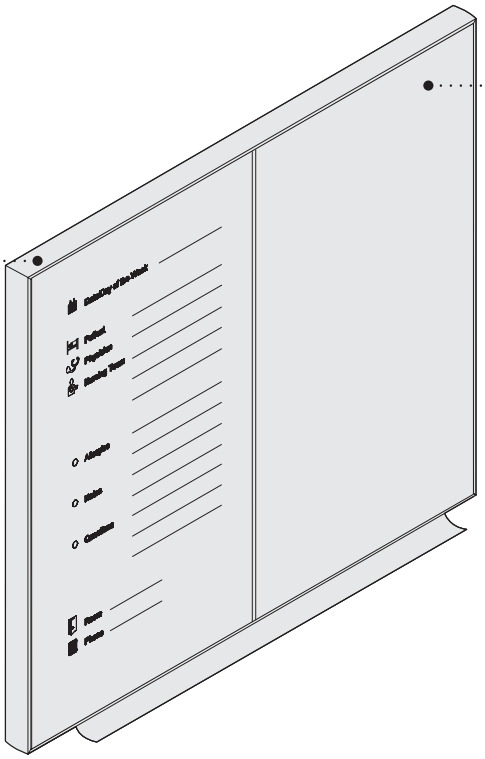


Icons make information easy to understand without multi-lingual text.

Writing surface is high-performance e3 ceramicsteel.

Trim is Edge Series clear anodized aluminum.

Patient room boards are available with an easy-mount metal cleat-mounting system.



Tackable surface is optional and available in a selection of standard or graded-in fabrics. COM is also available.

Patient room boards are 1/2 marker, 1/2 tackable surface divided by a 3/4" vertical aluminum extrusion.

Interactive Worktools

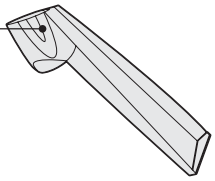
CopyCam Pro 74

RoomWizard II Scheduling System 78

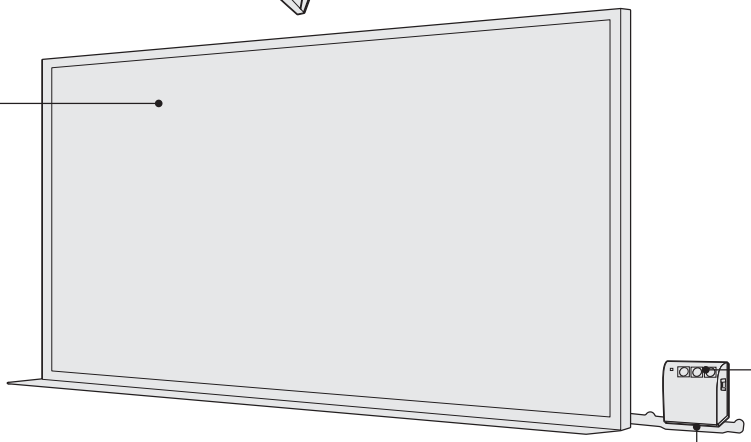
ēno Interactive Whiteboard by PolyVision 82

CopyCam Pro

3.5 mega pixel camera arm captures handwriting and line drawings in 4 colors.



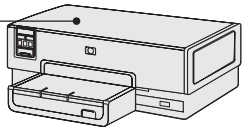
CopyCam captures a 48"H x 96"W area from any markerboard. When used with Premium Whiteboards, cables can be easily routed and concealed.



CopyCam Pro three-button control pad allows user to print, save to USB drive, or save to Local Area Network.

Optional cable management bridge conceals cables between whiteboard and CopyCam Pro control pad.

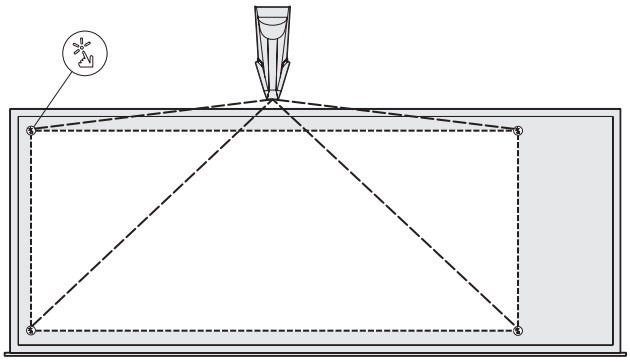
Network-enabled color printer is included.



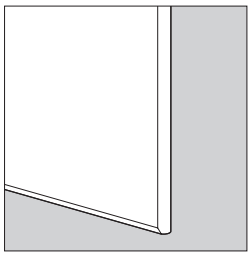
Actual Dimensions

	Width	Height	Depth
Control Pad	8⅜" (212.6 mm)	6⅛" (155.4 mm)	1¾" (44.5 mm)
Camera Arm		13½" (342.9 mm)	38" (965.2 mm)
Mounting Bracket	7½" (190.5 mm)	6" (152.4 mm)	
Control Pad Bridge	11⅞" (301.5 mm)		

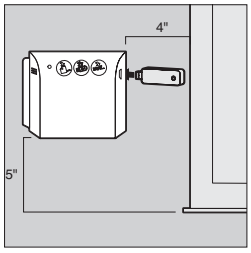
Product Details



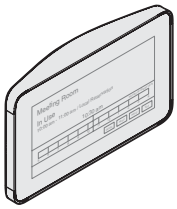
Four border buttons are provided to indicate the area that will be captured by CopyCam on boards that are wider than 8' or taller than 4'.
Tip: CopyCam will not produce a clean image from large blocks of solid color, photos, or 3D objects.
Tip: CopyCam must be installed in a location where the markerboard will have uniform illumination.



CopyCam is compatible with any markerboard or chalkboard and captures a 48"H x 96"W area. To add cable management capability, combine CopyCam with an Edge Series or other Premium Whiteboard.

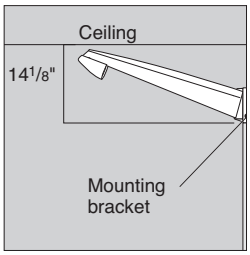


CopyCam Pro control pad may be mounted on either the left or the right side of the markerboard. When mounted on the left, the preferred distance from the edge of the markerboard to the control pad is 4", to allow access to the USB port.



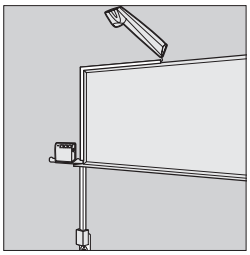
When used with RoomWizard II, One-Click Publishing sends captured whiteboard notes to all attendees via email.
▶Page 78

Connections

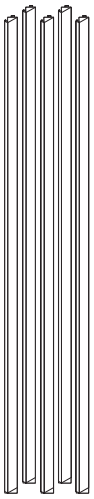


The position of the camera arm is critical to the proper function of the CopyCam lens and camera. A minimum of 14 1/8" above the board is required for installation of the camera arm. The whiteboard cannot be recessed or stand away from the wall more than four inches from the camera arm mounting bracket. The camera arm mounting bracket must be placed on the wall within four inches of the top of the whiteboard in order to focus properly.

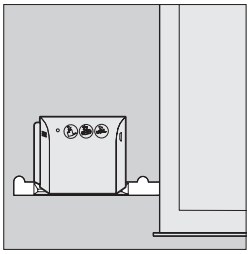
Wiring & Cabling



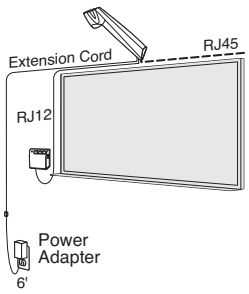
CopyCam wiring should be run within the wall for a clean installation, if possible. Wiring can also be managed against the wall if necessary with a cable raceway provided.



Five 4' sections of cable raceway are provided to conceal cables along one edge of the board and can be cut to length.

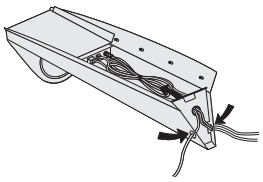


Cable management may be added between the CopyCam Pro control pad and whiteboard by specifying a cable management bridge for either the right or left side of the whiteboard.



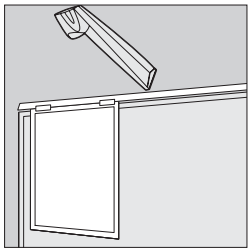
Three cable connections converge in the camera arm:
- Power adapter and its cable connect to the camera arm via a 17' extension cord.
- RJ45 ethernet cable connecting CopyCam to the Local Area Network (LAN) is not included.
- The RJ12 cable which connects the control pad to the camera arm.

Tip: The RJ12 cable is 12' long. This should be considered when using markerboards wider than 96".



Excess cable can be stored in the camera arm cavity through by pushing the cable through the exit hole at the end of the camera arm.

Application Topics



Huddleboard is a portable whiteboard solution that can be placed below the camera arm for image capture, then moved away for use elsewhere. A Huddleboard rail can be installed below the CopyCam arm and above the markerboard.

Tip: Flipcharts or other handwritten material can be attached to the markerboard and captured along with the notes written on the board.

Tip: CopyCam provides an option to exclude the printer, which meets the needs of customers who do not want image-to-print facility to accompany their CopyCam. It is not recommended that customers exclude the printer in order to use their current printers as CopyCam will not reliably process print commands to other printers.

Technical Specifications

USB Drive
- Writes images to a standard USB drive with Fat12, Fat16, or Fat32 partitions.
- Each 10MB of drive space holds approximately 70 images.

Built-in Web Server
- Holds approximately 40 images.
- Can be accessed from anywhere on a LAN using a standard web browser.
- Images are retained if there is power loss.
- Supports fixed IP addressing or DHCP protocol.

Power Requirements
100-240VAC, 50-60HZ, 18W
Energy Star Level IV compliant

Certification
FCC Class A, UL60950, CSA6095

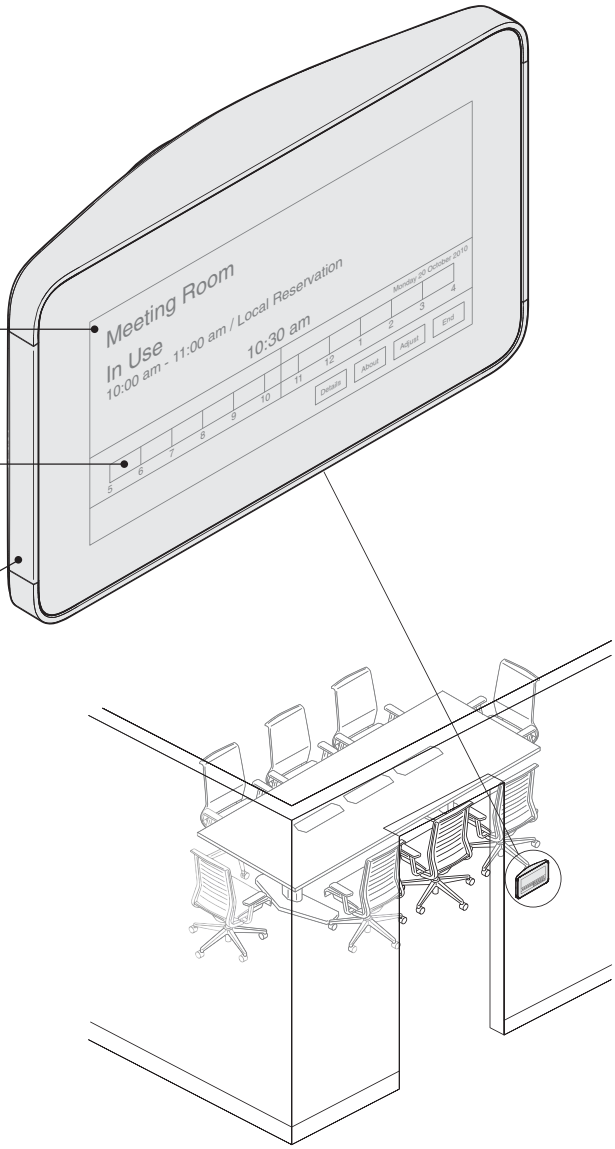
RoomWizard II Room Scheduling System

RoomWizard II is a web-based room scheduling system with touchscreen display.

Reserve a room from any networked computer, smart phone, or RoomWizard II device.

RoomWizard II can stand alone or synchronize with systems like Microsoft Exchange, Lotus Domino servers, and several other third party software systems.



Display of the room's schedule, hostname, meeting purpose, meeting times, room details, and timeline are shown.

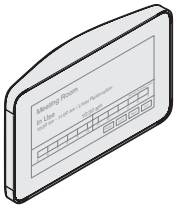
Touchscreen allows user to claim a room for an impromptu meeting, adjust meeting time, or end a meeting early.

Status lights are bright red and green which signal a room's availability from a distance.

Actual Dimensions

Width	8⅛"
Height	5⅛"
Depth	2¼"
Installation depth with mounting bracket	2¼"
Diagonal screen size	7"
Weight	1¼ lb

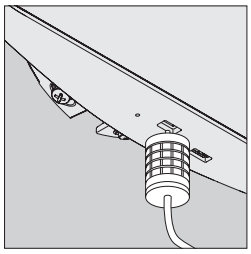
Product Details



RoomWizard II comes with everything needed to operate in classic mode, as a stand-alone system with standard firmware which is included. To operate in synchronized mode, the synchronization drivers must be purchased separately. *Tip: Firmware may be automatically updated via the internet or micro USB drive.*

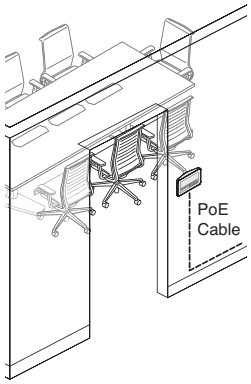
RoomWizard II screen can be wiped clean by using a microfiber cloth.

SnapTag, a downloadable iPhone app can connect with RoomWizard II to capture whiteboard notes and send to all attendees via email.



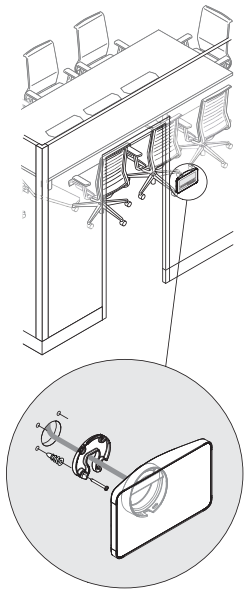
Built-in security holes allow RoomWizard II to be secured using a Kensington lock.

Wiring & Cabling

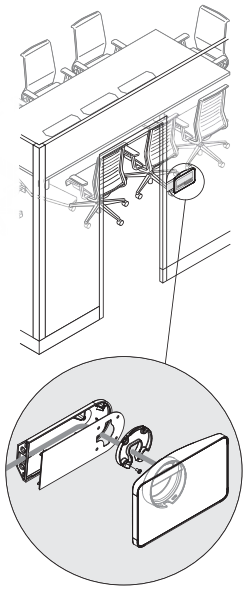


RoomWizard II connects to a network and is powered using Power over Ethernet (PoE). PoE cables run from the PoE switch typically located in the data closet. Industry standards set cable lengths at 100m. Contact your IT department to determine the PoE switch locations.

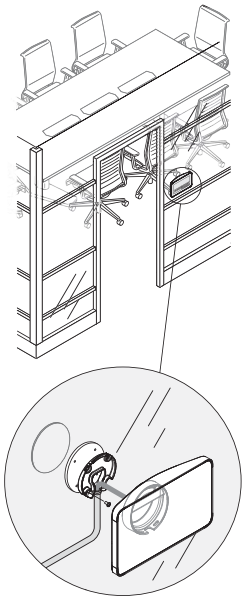
Mounting Options



The standard mount comes with each RoomWizard II and allows it to mount directly to hard surfaces.



The universal mount is an option and is used to mount to architectural mullions. It can also work for glass wall applications.



The direct-to-glass mount is an option and includes a vanity plate to visually conceal the hardware. It allows the RoomWizard II to adhere to glass surfaces.

Recommended mounting height is 54" from floor to top of unit.

Technical Specifications

Specifications
- Touchscreen: capacitive touchscreen
- Size: 7" diagonal
- Aspect ratio: 16:9
- Resolution: 800 x 430 WVGA
- Color depth: 16M colors

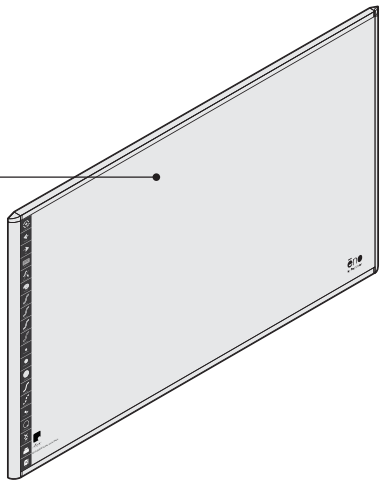
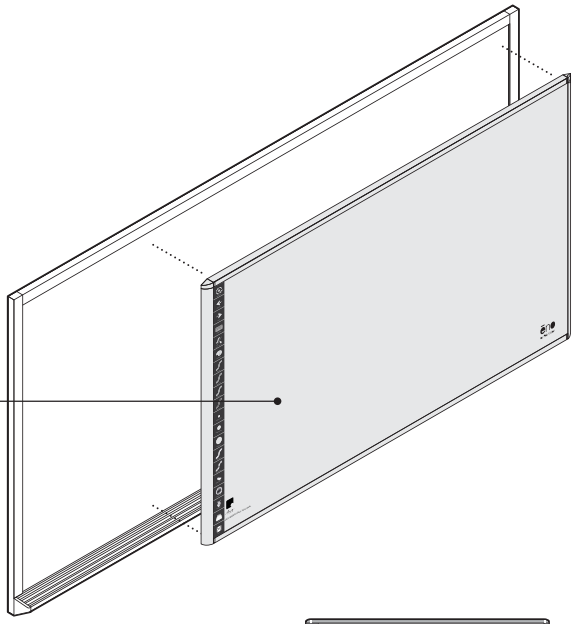
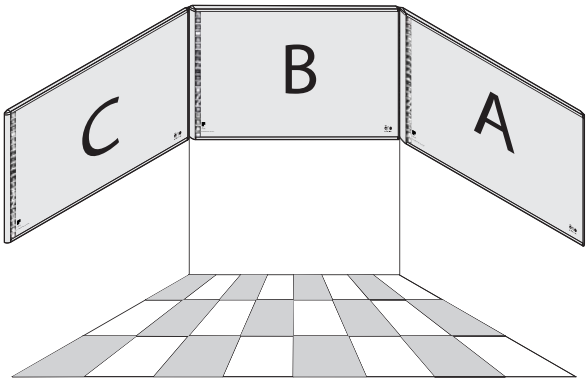
ēno Interactive Whiteboard by PolyVision



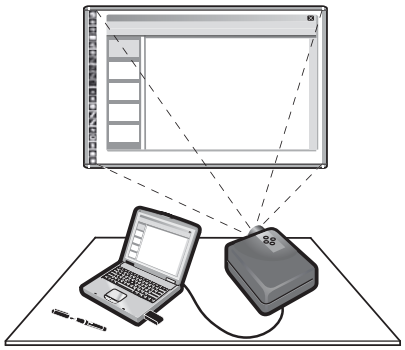
The ēno interactive whiteboard and ēno click interactive whiteboard can be used as a conventional whiteboard with any traditional dry erase marker, or as an interactive whiteboard with the use of a projector and an ēno stylus. The ēno board installs like any conventional whiteboard. No power or cables are required.



The ēno click interactive whiteboard uses magnetic mounting hardware and mounts instantly over an existing ceramic-steel chalkboard, whiteboard, or any other steel surface.



ēno interactive whiteboards are available in three different grid patterns, A, B, and C. This enables up to three boards to properly operate in the same room. ēno click interactive whiteboard is available in grid pattern A only.

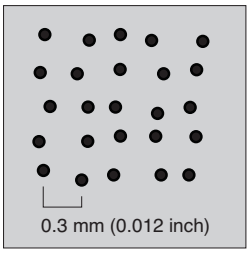


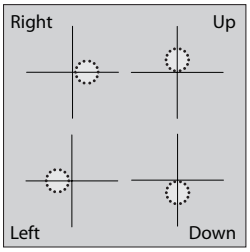
Interactive application: ēno can be used as an interactive whiteboard when used with the ēno stylus in conjunction with any Windows or Apple PC (not included with ēno) and any projector (not included with ēno). For best results short throw projectors are recommended.

Actual Dimensions

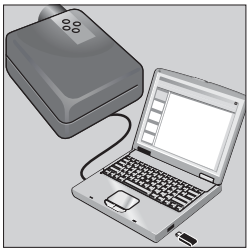
Dimensions include whiteboard frame	Depth	Width	Height
ēno 2610 interactive whiteboard	1"	64½"	48¼"
ēno 2810 interactive whiteboard	1"	85½"	48¼"
ēno 2650 click interactive whiteboard	1¼"	64½"	43¾"
ēno 2850 click interactive whiteboard	1¼"	85½"	43¾"

Product Details





ēno and ēno click interactive whiteboards features a pattern invisible to the naked eye. The pattern consists of numerous intelligent small black dots that can be read by the ēno stylus. The pattern indicates the exact positions of the ēno stylus.



Any blue-tooth enabled computer (Apple or Windows-based) with a PolyVision driver installed can be used to in conjunction with ēno to enable interactive whiteboard capability. Any projector can be used to project images from the computer to the ēno whiteboard.

The ēno stylus works with the ēno whiteboard to enable interactive capability with a blue-tooth enabled computer. For example, when a computer based presentation is projected onto the ēno whiteboard, the stylus can be used to guide the presentation or interact with a computer program similar to keyboard or mouse commands.

Each ēno and ēno click interactive whiteboard comes complete with:

- one ēno whiteboard with one of three dot patterns. Every ēno whiteboard features the PolyVision e^3 ceramicsteel writing surface
- a blue-tooth enabled stylus with one AAA battery
- two replacement stylus tips
- one blue-tooth receiver for Windows or Macintosh (USB interface)
- a PolyVision driver

Computer projector is not included.

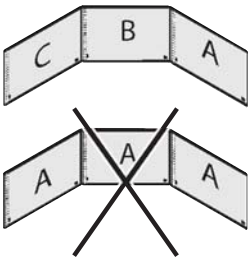
Installation

The ēno whiteboard installs like any conventional whiteboard. There are no power requirements and therefore no wires. Because it transmits to the computer via blue-tooth there are no communication cable requirements.

The ēno click interactive whiteboard comes with magnetic mounting hardware and mounts instantly over any ceramic-steel or steel surface.

ēno and ēno click interactive performance requires the installation of a PolyVision driver on the computer and the blue-tooth receiver included with ēno. For more information on recommended computer requirements go to: http://www.polyvision.com/ēno

Application Topics



ēno interactive whiteboards are available with A, B, and C grid patterns which allow up to three boards to operate properly in the same room. In a multiple interactive whiteboard application, no two whiteboard grid patterns can be the same.

ēno click interactive whiteboards are available in A grid pattern only.

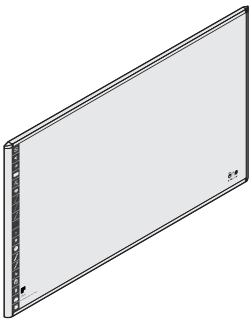
Environmental Certifications

- MBDC Cradle to Cradle Silver
- SCS Indoor Advantage
- RoHS

Warranty

For warranty details, go to www.polyvision.com. Warranty on system is two years. Whiteboard construction is ten years, and the writing surface is lifetime. Product registration is required for warranty to apply.

ēno Interactive Whiteboard by PolyVision



Tip: For additional information go to: PolyVision.com/ēno

Tip: ēno Interactive Whiteboards are available in three different grid patterns, A, B, and C. This enables up to three boards to properly operate in the same room. In a multiple interactive whiteboard application, no two whiteboard grid patterns can be the same.
