

Industries first “universal” plasma mount becomes even more “universal.”

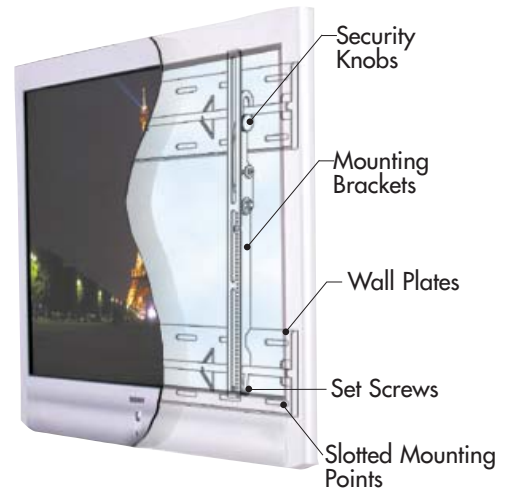

PRODUCT SPECS

The Universal Series uses the same components that installers have come to trust from Premier Mounts, with the addition of more universality and security than before.

Features:

- Multiple 16” mounting slots for easy wall mounting
(PCM-MS2 also has one set of 24” slots)
- Up to 12° continuously-adjustable tilt
- Built-in lateral shift for precise placement along the wall
- Universal design means just two models fit most LCD/plasma displays from 24” - 61”
- Unique Griplate System offers solid support without excessive torque
- Set screws and security knobs for increased safety

Premier Mounts, the undisputed leader in mounting solutions for LCD/plasma displays, proudly presents The Universal Series of flat-panel mounts.

Model # MS1 fits most LCD/plasma displays from 24"-36" and MS2 fits most displays from 37" to 61".

Model MS1 is available in a single-piece wall plate (CTM), while MS2 comes in either a single- (CTM) or -dual (PCM) wall plate design.

The uniqueness of the Universal Series design is based on Premier Mounts new Griplate System™ which uses a unique hole plate. The Griplate System accurately supports the appropriate mounting hardware and its 'teeth' set within detents along the mounting bracket for a solid fit while securing the display. This eliminates the need for excessive torque on the mounting hardware that most 'universal' products require.

Included set screws at the base of the mounting brackets and safety knobs at the top offer added security after installation and also serve to lock the display in place once lateral placement has been determined.

The Universal Series comes in an attractive dark gray finish and is backed by Premier Mounts unbeatable lifetime guarantee.

Universal Series Models:
CTM-MS1, CTM-MS2, PCM-MS2
