The contents of the dialogue box may differ depending on the type of printer.

The detailed print configuration including paper type and printing method are set according to the printer driver. Please refer to the manual of the printer currently being used.

Pressing the "PDF" button converts the current image to PDF format, allowing the user to check its condition before printing.

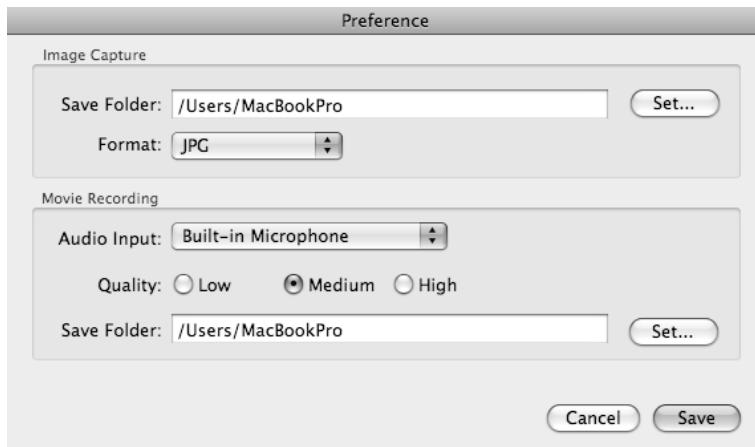

4. Copying Images

Press the "Copy" button in the capture window to copy an image to the clipboard. Images copied into the clipboard can be used also accessed by pressing the shortcut key "Ctrl-C" or selecting "Copy" in the "Edit" menu.

Movie Record

To record the image transmitted from the digital presenter, press the “Record” button. When the recording is on going, the recording area has the recording time and disc remaining capability are indicated, and the recording continues until the “Stop” button is pressed.

Though the configuration menu, user can select the quality of compression of movie file and audio input. (3 Selections of quality movie file)

User also can set the path for recording.

Troubleshooting(Macintosh Program)

Symptom	Solution
If the UF-130DX/ST Viewer does not run	To run the UF-130DX/ST Viewer, the digital presenter must be connected to a Macintosh. The digital presenter power must also be turned on. Check the USB connection and the digital presenter power.
The device is connected to the presenter but the screen display is slow.	Close any other applications that are running at the same time. The screen display may be slow for some systems with a low-specification graphics board.
If the performance of recording is very low (because of bad performance mac)	Turn off the audio for high speed recording.
