CopyCam SI Control Panel

CopyCam Pro Control Panel

Wireless printer (included with system)

Elevate group dynamics to a new dimension with CopyCam Solutions.

Collaborate Spontaneously

Small workgroups often yield big ideas, so no one wants to slow down idea generation with tedious note-taking.

CopyCam Image Capturing System radically improves the efficiency of the idea generation process by transforming standard whiteboards into active copyboards. "Spontaneous collaboration" no longer requires pre-planning.

Capture Brilliance in a Snap

Allow ideas to flow freely without the worry of missing vital information. Simply write the way you would on any standard whiteboard; the intuitive control panel offers you the ability to save images to

an internal digital archive on the LAN, save to a floppy disk, or print to a wireless printer all at the touch of a button.

Give Me One Button

Sometimes you just need to see it on paper, but that doesn't mean you have to give up spontaneity. CopyCam SI Image Capturing System offers the same benefits as CopyCam Pro, with a simplified (one button) control pad. When you're ready to capture your brilliance on paper, just hit the button to print in full color to the system's wireless printer.

CopyCam Image Capturing System:
Capture ideas instantly.

POLYVISION
