

## DASH FLEX 12 & APEX 12 STAT CENTRIFUGES

Always know when your STAT samples are ready: the unique flashing lid lights (patent pending) make it easy to track cycle status and keep TAT down. With your choice of digital display or repeatable two-button operation, both units can be programmed with your validated cycles and arrive preset with common STAT spin cycles for convenience.

### Easy to Monitor

LED lid lighting indicates when the centrifuge is ready (off), running (on), or done (flashing), reducing forgotten samples and keeping your average TAT down. The DASH Flex 12's digital display shows cycle parameters and time remaining.

### Easy to Use

Program up to 10 custom time, RPM, and g-force settings with the DASH Flex 12. Or, set and lock your three preferred cycles using the DASH Apex 12's two-button interface. Both arrive pre-programmed with the most common STAT settings and can spin 75-100 mm (3-10 mL) tubes with the same rotor and universal tube holders.

### Eliminate Wait Time

DASH centrifuges are so compact that they can be used in an array in accessioning. The array will allow spinning samples as soon as they arrive, further shortening your TAT. For a more compact unit, consider the 6 tube capacity DASH Apex 6.

### Safe and Durable

Enjoy years of worry-free operation with the DASH's brushless motor and rugged, reinforced carbon fiber components. Enhance lab safety with imbalance protection and a clear, shatterproof lid, which locks until the centrifuge has stopped completely.

### A Great Value

Each DASH centrifuge comes fully equipped and ready to run with a horizontal rotor, universal tube holders, and 2-year warranty included in the affordable price.

Choose the DASH Flex 12 for flexibility & cycle display. Choose the DASH Apex 12 for repeatability with set and lock controls.
