

DuPont™ Tychem® 6000 TF611T

Trusted Tychem® protection with an innovative elastomeric interface hood

Elastomeric interface hood

Rear-entry design with double storm flaps

- Hooded coverall with liquid-tight seal for most common respirator facepieces.
- Rear-entry design keeps closure away from direct contact with frontal chemical exposure.
- Double storm flap covers zipper.
- Passes both blood (ASTM F1670) and viral penetration (ASTM F1671) standards.
- Garment design eliminates need for taping of potential leak spots, such as gloves, boots, hood and zipper.
- Provides barrier protection against hazardous dry particulate contaminants including potential CBRN particulate hazards.**
- Fabric provides at least 30 minutes of protection against >250 chemical challenges*, including chemical warfare agents and toxic industrial chemicals (TICs).

Taped seams

Elastic waist

Attached inner gloves

Attached dissipative socks with boot flaps

Broad spectrum TIC protection

Elimination of taping for potential leak spots

>480 min protection for CWAs

Law enforcement

Emergency response

Industrial manufacturing & cleaning

Petrochemical plants

Reference TF611T

Color Gray

Size SM-5X

*Please check DuPont™ SafeSPEC™ for permeation data that meets your specific needs based on the hazards identified in your hazard assessment.

**Hazardous dry particulate contaminants may refer to unknown or potentially harmful particulate hazards down to 0.3 micron in size such as chemical hazards e.g., fentanyl, cocaine, methamphetamine, and biological hazards e.g., anthrax, ricin.

How we're differentiated

Safety Optimization Services—Comprehensive resources for protective apparel, training and compliance, including:

DuPont™ SafeSPEC™

SafeSPEC™

A digital tool and app that leverages an extensive chemical permeation database to help select our most effective chemical protective apparel for every job.

DuPont™ SafeGUIDE™

SafeGUIDE™

An on-site field assessment program that provides a customized, multi-tiered solution to enhance and standardize your chemical protective apparel inquiries.

WARNING: Most Tyvek®, ProShield®, and Tychem® garments, should not be used around heat, flames, sparks or in potentially flammable or explosive environments.

Garments should have slip-resistant or anti-slip materials on the outer surface of boots, shoe covers or other garment surfaces in conditions where slipping could occur. Some Tychem® garments have attached socks made of the garment material. These attached socks must be worn inside protective outer footwear and are not suitable as outer footwear. These attached socks do not have adequate durability or slip resistance to be worn as the outer foot covering.
