

SS350M

Features

- Mini SILVERSTAT SOLDAPULLT[®] desoldering hand tool with micro tip
- One of the smallest micro tips on the market with a slightly longer tip shaft increases visibility and more effectively enables desoldering of tightly packed assemblies and compact boards
- Precision engineered metal barrel with conductive coating for extra static protection
- Compact size makes it portable and easy to store in any tool-kit
- Simple single-handed loading system
- Manufactured in California and backed by a 90 day warranty
