

MX-1 New Baseplate Installation Guide

WARNING: Before you begin installing the new MX-1 baseplate, make sure that your MX-1 unit is not plugged into anything else, including the optional ELMO Connect Box.

1

Fold up the MX-1 unit and flip it over so that the baseplate is facing upwards and the serial numbers are visible.

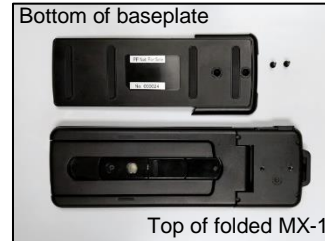

2

Using a screwdriver, carefully remove the 2 screws from the bottom of the baseplate. The baseplate is magnetized and will not come off until manually removed.

3

Take off the baseplate and screws. **Do not throw away your baseplate** – you may need the serial number for later reference.

4

Place the new MX-1 baseplate on the bottom of the unit, making sure that it is properly aligned with the unit.

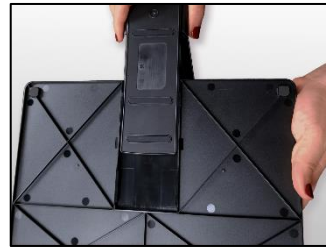

5

Replace the 2 screws and screw them back into the bottom of the new baseplate to finish installation.

MX-1 New Baseplate Installation Guide

- 6** To use the MX-1 Writing Board, slide the baseplate of the MX-1 unit into one of the two slots located on the bottom of the Writing Board. This will keep the camera in place as you write

- 7** The MX-1 Writing Board is now ready to be used! Simply connect the MX-1 to the input source of your choice.

- 8** When you are finished using the MX-1 and Writing Board, the MX-1 unit can be folded shut while it is still attached to the Writing Board.
