

End of Life Announcement SR-X-MC Replacement Oxygen Sensor

10/24/2014

At Honeywell Analytics, we're constantly evaluating and updating our product line to meet the evolving gas detection needs of customers around the world. In some cases, this means discontinuing an offering and focusing our efforts on others.

The original GasAlertMicroClip and the GasAlertMax XT multi-gas detectors have been discontinued for several years and service and replacement components for these products are increasingly more difficult to obtain. Accordingly, the SR-X-MC oxygen replacement sensor will no longer be available to order after December 30, 2014.

Alternative Offering

Unfortunately there is no replacement sensor available, so users of detector versions which use the oxygen sensor should migrate to one of the available replacement models. The newer, improved models of these portable multi-gas detectors are available to help you improve safety, ensure compliance and manage costs while relying on the ease of use and worker safety you know and expect from BW Technologies by Honeywell.

If you are using the original GasAlertMicroClip, choose the GasAlertMicroClip XL.
If you are using the GasAlertMax XT, choose the GasAlertMax XT II.

Last Order Date

The last order date for the SR-X-MC replacement oxygen sensor will be **December 30, 2014**. We will accept orders based on material availability.

Discontinued SKU

Order Number	Description
SR-X-MC	Replacement Oxygen Sensor

Service and Support

We will continue to offer service components for these detectors on a limited basis as availability allows.
