

CDB BLOCK CYLINDERS

L2329 Rev. H 09/2018

For Date Codes beginning with:
Letter "O" & "A" (Model No. CDB18202, CDB18502, CDB40252, CDB40502,
 CDB70252, CDB70502, CDB180252, CDB180502, CDB280562)
Letter "A" & "B" (Model No. CDB10162 and CDB10362)

NOTE: Lubricate all seals prior to assembly.
 Item #3 (Stop Ring) must be replaced when parts from any CDB seal kit (★ or ★★) are installed.
 To service: Drill out stake. After service, stake lightly once, 90° from installation notch or hole.

Item #6 (U-Cup):
 For older cylinders, a U-Cup replaces the o-ring and back-up that was previously used on 10kN and 18kN models.

Item #10 (BSPP Plug) torque as follows:
 .125 BSPP: 45-50 in-lbs. [5,1-6,2 Nm]
 .250 BSPP: 40-70 in-lbs. [4,5-7,9 Nm]

Item #12 (Plug Bolt) torque as follows:
 For 10, 18, 40, & 70 kN: 8-10 in-lbs. [0,9-1,1 Nm]
 For 180 & 280 kN: 34-36 in-lbs. [3,8-4,0 Nm]

IMPORTANT:

Plunger replacement information:

- The old-style plunger (item 5) is no longer available. A new-style plunger must be ordered if plunger replacement is necessary.
- Refer to Repair Parts Sheet L4161 for part number of new-style plunger (replaces item 5).
- The new-style plunger O-ring (replaces item 8) **MUST** be used with the new-style plunger. The new-style plunger O-ring is included only in seal kits ending in "K1" (See RPS L4161).
- The old-style plunger O-ring (item 8) is **NOT USED** with the new-style plunger and should be discarded.
- The Glyd Ring (item 9) is **NOT USED** with the new-style plunger and should be discarded.
