⚠ WARNING Fully relieve hydraulic pressure, disconnect hydraulic hoses and unplug AC power cord from electrical outlet before beginning any inspection, maintenance or repair procedures. Failure to observe these precautions could result in death or serious personal injury. Appropriate shop safety procedures are to be followed during disassembly and reassembly to minimize any possibility of injury.

ABOUT US

Enerpac is a global market leader in high pressure hydraulic tools, controlled force products, portable machining, on-site services and solutions for precise positioning of heavy loads. As a leading innovator with over a 100 year legacy, Enerpac has helped move and maintain some of the largest structures on earth. When safety and precision matters, elite professionals in industries such as aerospace, infrastructure, manufacturing, mining, oil & gas and power generation rely on Enerpac for quality tools, services and solutions. ✦ Included as part of pressure switch kit, ZE2PS-E3.				

Figure 26: Oil Return Line Filter (optional accessory)

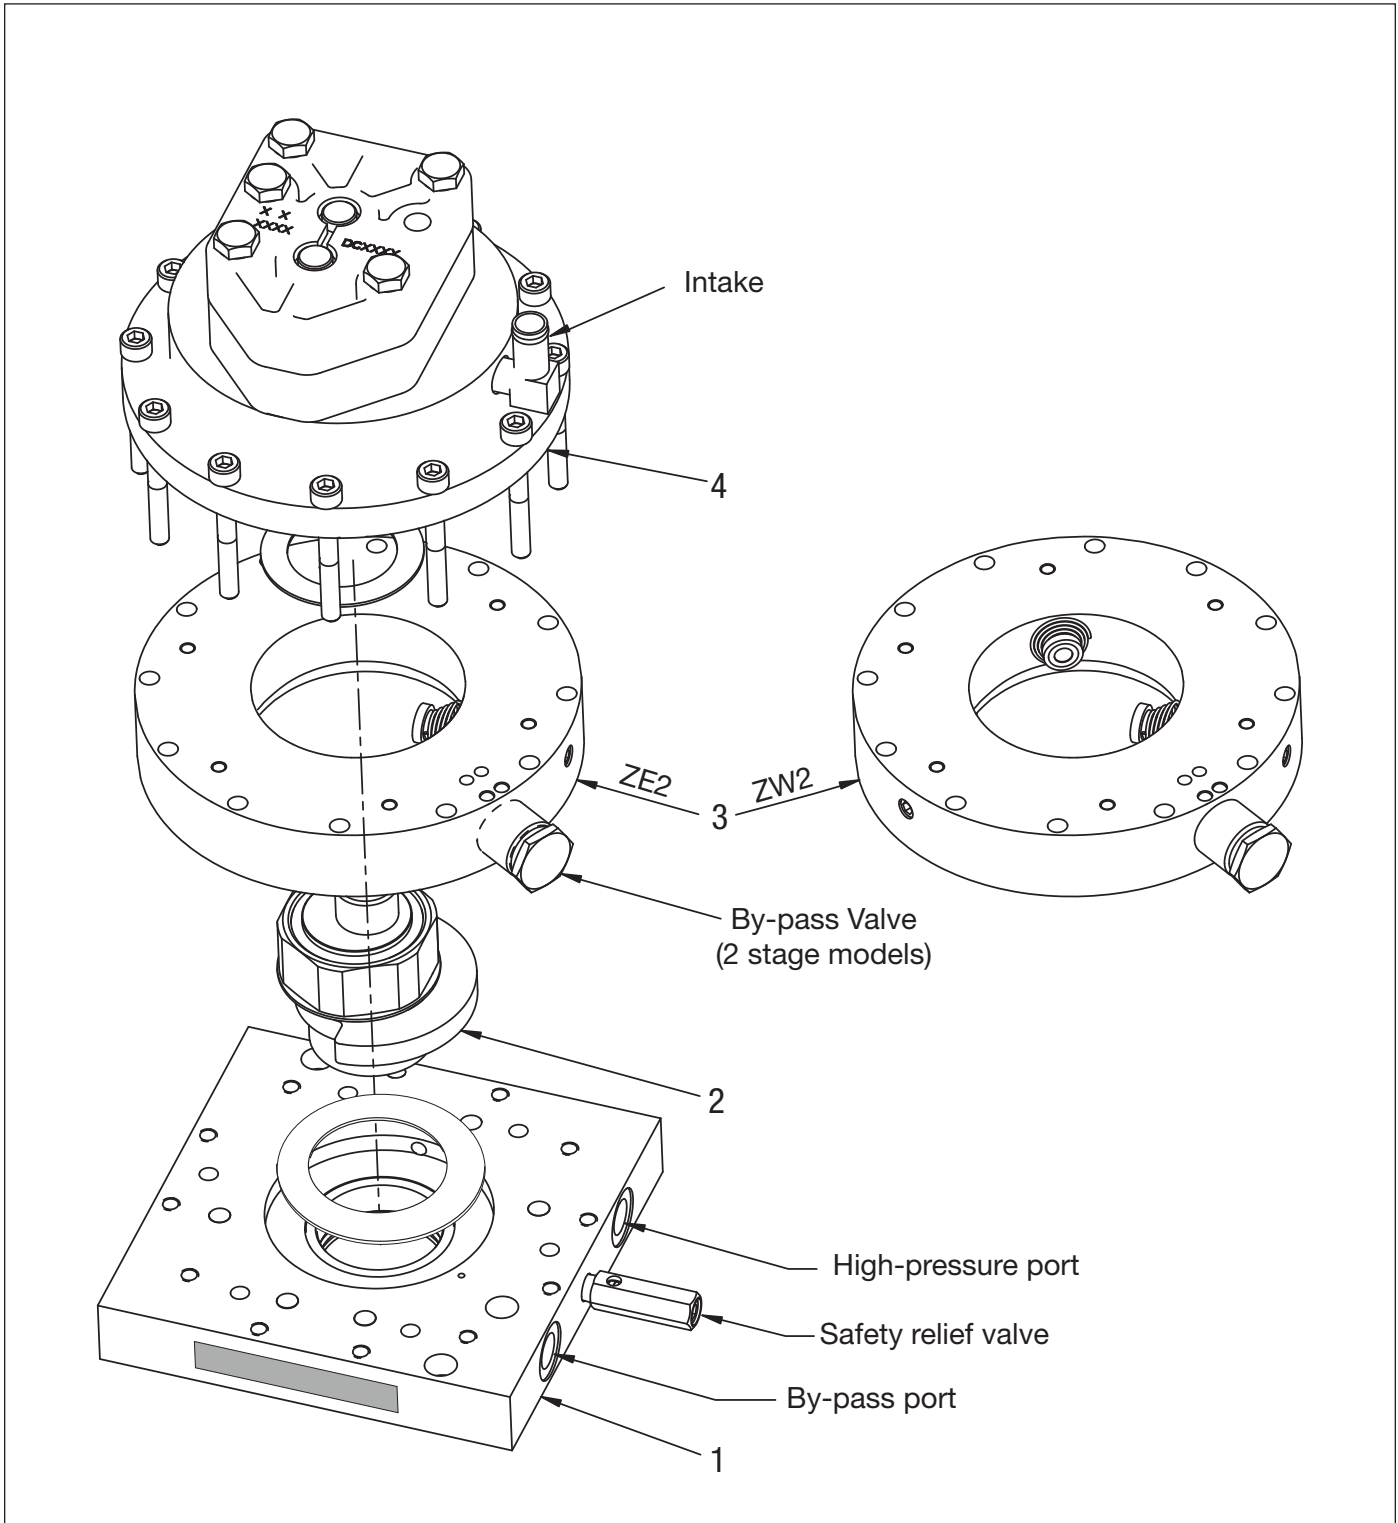

Notes:

- ⚠ Torque to 45-47 ft-lb [61 - 64 Nm].
- Ⓜ Remove plug from “T” Port on side of valve and reinstall in bottom of valve.
- Ⓝ Hand tighten filter element until snug. Then, tighten it an additional 1/4 turn with wrench.
- Ⓞ Connect to “T” port on valve.

Figure 27: Pump Element Assembly

Notes:

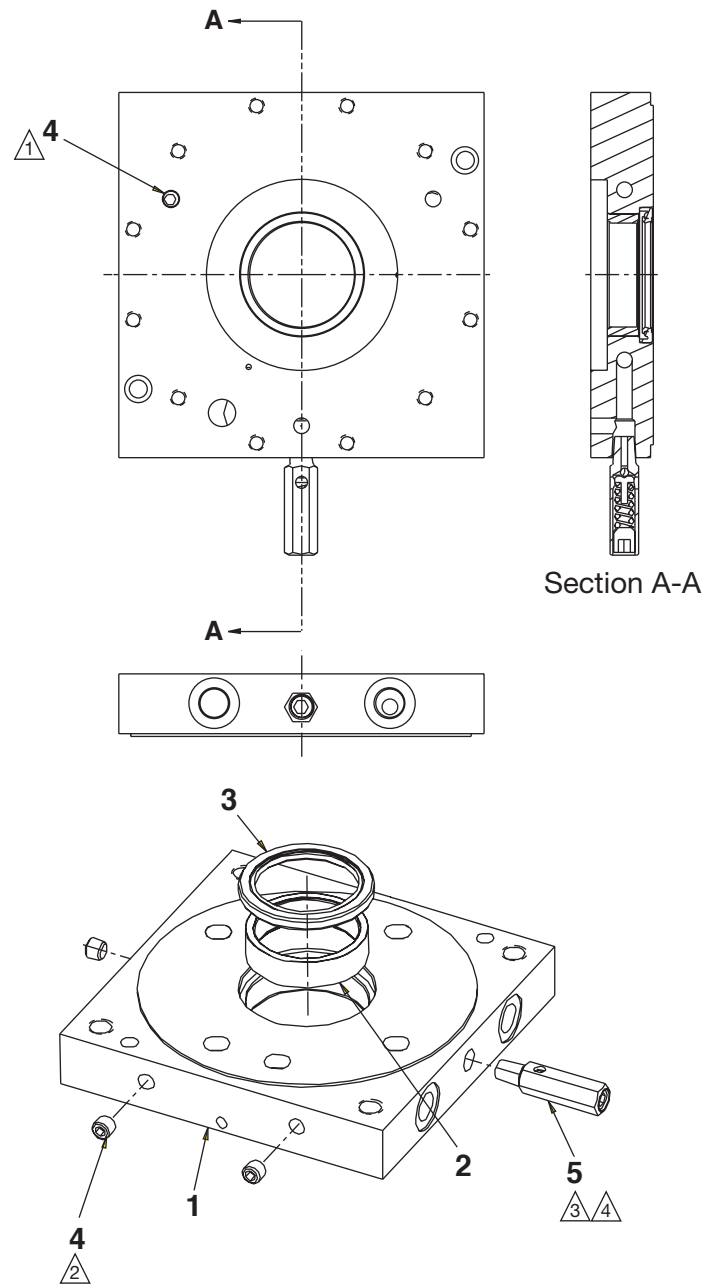

ZE2 models have one piston. ZW2 models have two pistons.

By-pass valve is functional only on 2 stage pumps.
