# Quick Setup

Before using the projector, make sure you read the safety instructions in the online *User's Guide*.
Connect the projector

Before you can connect to the projector, you need to remove the screws and the cable cover.

Computer

Choose from the following connections. See the sections below or the online *User's Guide* for details.

VGA cable
USB cable

HDMI cable

USB port

Connect the square end of a USB cable to the projector's **USB-B** (square) port. Connect the flat end of the cable to any USB port on your computer.

Windows® Vista or later: After turning on the projector, follow the on-screen instructions to install the Epson® USB Display software (**EMP_UDSE.EXE**; only on first connection). If the software screen does not display automatically, open **My Computer** or **Computer**, then double-click **EPSON_PJ_UD**.

OS X 10.7.x or higher: After turning on the projector, the setup folder for USB Display appears in the Finder. Double-click **USB Display Installer** and follow the on-screen instructions to install the Epson USB Display software (only on first connection).

Computer port

Connect one end of a VGA cable to the projector's **Computer1** or **Computer2** port, and the other end to your computer's ▯ monitor port. If you are using a laptop, switch it to external display (see "Troubleshooting"). You can also connect an audio cable.
HDMI port

Connect one end of an HDMI cable to one of the projector's **HDMI** ports and the other end to an HDMI port on your computer.

External monitor and speakers

You can connect an external monitor and external speakers to your projector to enhance your presentations. See the online *User's Guide* for details.

Wired network

Connect the projector to your network using an Ethernet cable. See "Project over a network" for more information.

Note: *To connect the projector to a wireless network, you must install the optional Epson Wireless LAN Module (ELPAP10). To purchase the Epson Wireless LAN Module or other accessories, see "Optional accessories." For more information, see the online* User's Guide.
Microphone

Connect a dynamic microphone to the **Mic** port, using a 3.5 mm mini-jack cable.
Video device

Connect multiple video devices and use the **Source Search** button on the projector or remote control to switch between them. For more information on playing sound through the projector, see the online *User's Guide*.

| Audio cable | Component video to VGA cable | RCA video cable (composite video) | HDMI cable |

Mobile media device

Connect tablets, smartphones, and other devices that support the MHL™ standard to the **HDMI 1/MHL** port.

MHL cable

Some devices may require an adapter or may not require an MHL cable. Not all features or functions may be supported. Check your device's documentation for more information.
Camera, USB device, or document camera

Connect a digital camera, USB flash drive, USB storage device, or Epson DC-07 document camera to the projector's **USB-A** (flat) port.

If you connect a digital camera, USB flash drive, or USB storage device, you can use the projector's PC Free feature. You can also connect other Epson document cameras to the projector. See the online *User's Guide* for details.
Using the remote control

Install the batteries as shown (two AA batteries).

Turn projector on and off
Choose which source to display
Access projector menus
Navigate projector menus
Change presentation slides (USB only)
Control projector volume
Turn off projector display and sound
Access the Home screen

For more information on using the remote control, see the online *User's Guide*.

Turn on your equipment

1 Turn on your computer or video source.

2 Make sure the power cord is connected and plugged into an electrical outlet.

Status light

3 Press the ⏻ power button on the projector or remote control. The projector beeps, and the Status light flashes blue and then stays on.

Note: *To shut down the projector, press the ⏻ power button twice.*
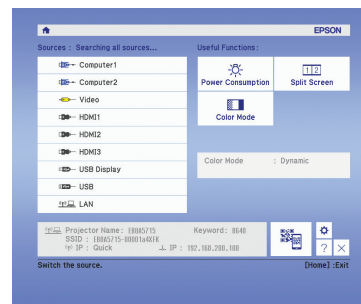

4 If you don't see an image, press the **Source Search** button on the remote control to select the image source.

Note: *If you still see a blank screen or have other display problems, see the troubleshooting tips on the back of this sheet.*

5 If you need to focus the image, first slide the switch on the side of the projector to open the air filter cover. Then raise or lower the focus lever to sharpen the image.

6 Use the arrow buttons on the remote control to highlight any of the options on the Home screen, then press ↵/⏿ to select it. You can display a QR code, switch between projection sources, and quickly access various adjustment options from this screen.

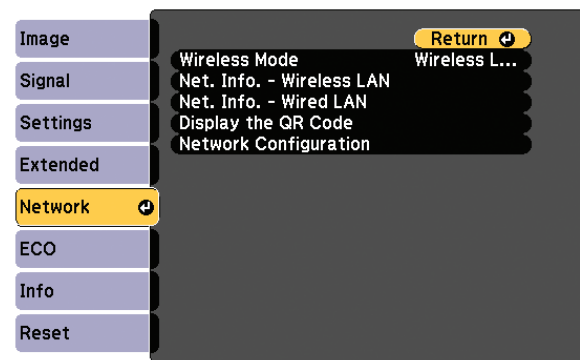

7 The default language of the menu system is English. To select another language, press the **Menu** button on the remote control. Select **Extended** and press ↵/⏿. Select **Language** and press ↵/⏿. Select your language and press ↵/⏿. Press the **Menu** button to exit the menu system.
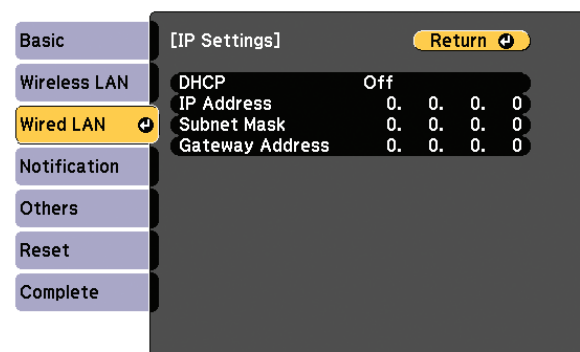

Wired network configuration

Follow the steps here to configure your projector for your wired network using the projector's menu system.

Note: *To connect the projector to a wireless network, you need the optional wireless LAN module. For more information about using the projector on a network, see the online* User's Guide.

1 Press the **Menu** button on the remote control, select the **Network** menu, then press ↵/⏿.

2 Choose **Network Configuration** and press ↵/⏿.

3 Select the **Wired LAN** menu and press ↵/⏿.

4 Choose **IP Settings** and press ↵/⏿. You see a screen like the following:

5 If your network assigns addresses automatically, turn on the **DHCP** setting. If not, make sure DHCP is off and enter the projector's **IP Address**, **Subnet Mask**, and **Gateway Address**, as needed. Then press **Esc**.

6 When you are finished, select **Complete** and press ↵/🐭 , then press ↵/🐭 again to save your settings.

7 Press the **Menu** button to exit the menu system.

Install the EasyMP® Multi PC Projection software on each computer that will project over the network. Use the CD labeled *EPSON Projector Software* to install the program.
For instructions on installing and using your network software, click the icon on your desktop to access the online *EasyMP Multi PC Projection Operation Guide* (requires an Internet connection). If you don't see the EasyMP Multi PC Projection Guide icon, you can install it from the projector CD or go to your product's support page (see "Where to get help").

To monitor and control your projector over the network, download and install the EasyMP Monitor software (Windows only) and manual. You can install a link to the downloads page from the projector CD or go to your product's support page (see "Where to get help").

Project over a network

If you need to configure the projector for a wired network, see "Wired network configuration" on the front of this sheet.

1 Press the **LAN** button on the remote control. You see this screen.

```
[LAN]

Projector Name      :
IP Address          :
Keyword             :
```
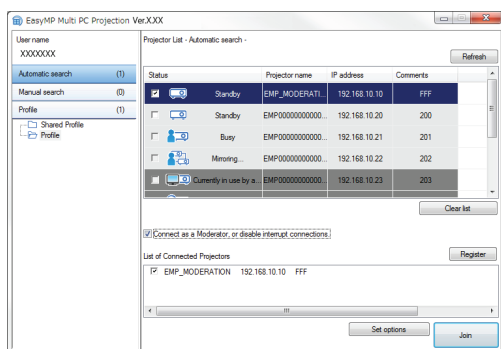

2 Start EasyMP® Multi PC Projection on your computer.

Windows 10/8.x: Navigate to the **Apps** screen or **All apps** menu and select **EasyMP Multi PC Projection Ver. 2.10**.

Other versions of Windows: Select 🪟 or **Start** > **Programs** or **All Programs** > **EPSON Projector** > **EasyMP Multi PC Projection**.

OS X: Double-click the **EasyMP Network Projection** icon in the Applications folder.

3 Select **Advanced Connection Mode** and click **OK**.

4 Select the projector you want to connect to, then click **Connect**.

If you don't see the projector you want, click the **Automatic search** button to find the projector automatically, or click the **Manual search** button to enter the projector's IP address.

5 If you see a message asking for a keyword, enter the four digits that appear on the LAN standby screen and click **OK**.

Your computer image is projected, with a floating toolbar:

When you're done presenting, click **Disconnect All** on the toolbar.

Mobile device

To project from an iOS or Android™ device, download and install the Epson iProjection™ app. Visit **www.epson.com/projectorapp** (U.S.) or **www.epson.ca/projectorapp** (Canada) for more information.
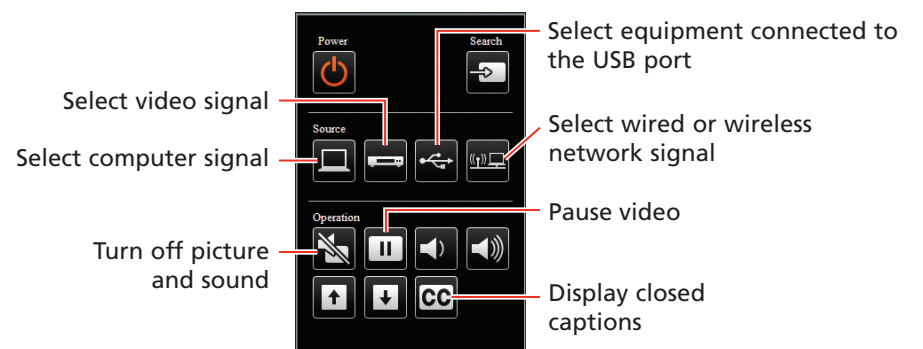

Using web remote

You can use a standard web browser to control the projector through the network. A "virtual remote control" on your computer screen lets you perform many of the same functions as you can with the physical remote control.
1 Open your web browser and enter the IP address of the projector you want to monitor in the browser window.

If you're not sure what the IP address of the projector is, turn the projector on and select **Net. Info. - Wired LAN** or **Net. Info. - Wireless LAN** from the Network menu to display the IP address of the projector. (Do not enter the leading zeroes.)

2 Enter **EPSONWEB** as the default user name and **admin** as the default password, then click **OK**.

3 From the Projector Control menu, select **Web Remote**. Use the on-screen buttons to operate the projector, as you would using the remote control.

Select video signal
Select computer signal
Turn off picture and sound
Select equipment connected to the USB port
Select wired or wireless network signal
Pause video
Display closed captions

Troubleshooting

If you see a blank screen or the **No signal** message after turning on your computer or video device, check the following:

- Make sure the Status light on the projector is blue and not flashing.

- Press the **Source Search** button on the projector or the remote control to switch to the correct image source, if necessary.

- Press the **Home** button on the projector or remote control to verify the source input and settings.

- If you're using a Windows laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled **CRT/LCD** or have an icon such as 🖥/🖵. You may have to hold down the **Fn** key while pressing it (such as **Fn** + **F7**). Wait a moment for the display to appear.

- If you're using a Mac laptop, open **System Preferences** and select **Displays**. Click the **Arrangement** tab and select the **Mirror Displays** check box.

- If you're using a Windows computer, press the Windows key and **P** on your keyboard, then select **Duplicate**.

Where to get help

Manuals

For more information about using the projector, click the icons on your desktop to access the online manuals (requires an Internet connection). If you don't have icons to the manuals, you can install them from the projector CD or go to your product's support page, as described below.

Telephone support services

To use the Epson PrivateLine® Support service, call (800) 637-7661. This service is available for the duration of your warranty period. You may also speak with a support specialist by calling (562) 276-4394 (U.S.) or (905) 709-3839 (Canada).

Support hours are 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday. Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Internet support

Visit your product's support page **www.epson.com/support** (U.S.) or **www.epson.ca/support** (Canada) for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

Registration

Register today to get product updates and exclusive offers. You can use the CD included with your projector, or register online at **www.epson.com/webreg**.

Optional accessories

For a list of optional accessories, see the online *User's Guide*.

You can purchase screens or other accessories from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at **www.epsonstore.com** (U.S. sales) or **www.epson.ca** (Canadian sales).
