EPSON®
EXCEED YOUR VISION

Epson iProjection™ and Epson Projectors — Your Wireless Display Solution

Epson iProjection is the wireless display solution for today's BYOD classrooms, boardrooms and workspaces. With true multi-platform support, users can wirelessly mirror content from Chromebooks, PCs and macOS®, iOS® and Android™ devices[1] to most Epson® projectors.

Plus, with the built-in Moderator function, available for Chromebooks, computers and mobile devices, up to 50 users can connect to the display simultaneously[1], sharing content from as many as four devices at a time. It's the perfect tool for displaying a variety of content—or for comparing work side by side.

All projected images simulated.

Display and Annotate
- Browser content
- Documents
- PDFs
- Photos and more

Device Management
- Wirelessly connect and manage up to 50 devices simultaneously[1]
- Display content from up to four devices at a time on the screen

Advanced Functionality (available with select projectors)
- Two-way content sharing — push content from the projector to connected devices
- Real-time mobile camera display — use your device's camera like a document camera or Web cam

Full Chromebook™ Support[2]
- Screen mirroring capabilities
- Display content from Google Docs™, Google Slides™ and Google Sheets™
- Display Web content from a Chrome™ browser

Epson iProjection Features

Feature Name	Description	Platform				
		PC	Mac	Chromebook	Android	iOS
Moderator Function[2]	The Moderator function allows one device to see and manage the display of other connected devices. Up to 50 devices can be connected at a time[1]. Moderator control can be passed from one user to any of the other connected devices.	X	X	X	X	X
Share Image from Projector*	When using supported Epson projector models, users can push the image being displayed by the projector to other Epson iProjection-connected devices.	X	X	X	X	X
View of Shared Images	Allows Epson iProjection-connected devices to receive display content that is pushed from supported Epson projectors.	X	X	X	X	X
Thumbnail Preview*	Allows the Moderator to see connected devices and preview their content before displaying to the projector.	X	X	X	X	X
Projector Keyword*	Lets you turn on a security password to prevent access to the projector by unauthorized users. When the keyword is set, the Epson iProjection user must enter the keyword to display to the projector.	X	X	X	X	X
Projector Remote	Allows users to control the projector with the Epson iProjection virtual projector remote, rather than using the physical remote control.	X	X	–	–	–
Multi-Projector Display	Users can display from their device to multiple networked projectors simultaneously.	X	X	X	X	X

* Depends on model. Please refer to your Epson projector for more details.
  Feature is both hardware and software-dependent. May not be supported by all projector models.
