Reglar ≥ 25-gauge stål  
25ゲージのスチールよりも強力なスタッド  
板墙筋为不小于 25 标号的钢材

# 1 Mounting Height for Ergonomic Workstation

This mounting height is a recommendation for an ergonomic workstation that accommodates user heights of 5'0"-6'1" (152-185cm) when set up for standing and user heights of 5'0"-6'4" (152-193cm) when set up for sitting.

If user heights are different than this, you should change mounting height to accommodate user heights. (Change mounting height one inch for every one inch difference in user heights).

Mounting height assumes there is a 6" (152 mm) distance between the center of your monitor mounting holes and the top of the screen. If your distance is smaller, you should increase mounting height accordingly, if your distance is larger, you should decrease your mounting height accordingly.

## Determine mounting location:

Front view with arm pushed back against the wall.

Top view showing range of motion when pulled out from the wall.

# 2

**WARNING:** Ensure that the wall structure is capable of supporting four times the total weight of mounted equipment. Mounting to wall surfaces that do not meet this criteria may result in an unstable, unsafe condition which could lead to personal injury and/or property damage. Consult a construction professional if you have any doubt about what this means in regard to your particular application.

**CAUTION:** Make sure the wall mount bracket is level, flush and snug to the wall surface. **DO NOT OVERTIGHTEN THE BOLTS.**

# 13 Adjustment Step

Important! You will need to adjust this product after installation is complete. Make sure all your equipment is properly installed on the product before attempting adjustments. This product should move smoothly and easily through the full range of motion and stay where you set it. If movements are too easy or difficult or if product does not stay in desired positions, follow the adjustment instructions to create smooth and easy movements. Depending on your product and the adjustment, it may take many turns to notice a difference. Any time equipment is added or removed from this product, resulting in a change in the weight of the mounted load, you should repeat these adjustment steps to ensure safe and optimum operation.

## a Lift - Up and down

### Increase Lift Strength

If the mounted weight is too heavy or this product does not stay up when raised, then you'll need to increase Lift Strength:

### Decrease Lift Strength

If the mounted weight is too light or this product does not stay down when lowered, then you'll need to decrease Lift Strength:

**CAUTION: DO NOT** overtighten fasteners. Overtightening may cause damage to your equipment.

**WARNING! Stored Energy Hazard:** The arm mechanism is under tension and will move up rapidly, on its own, as soon as attached equipment is removed. For this reason, **DO NOT** remove equipment unless the arm has been moved to the highest position! Failure to follow this instruction may result in serious personal injury and/or equipment damage!

**b** Tilt – Forward and Backward

4mm

**+** **Increase Friction**  
If this product moves too easily, then you'll need to increase friction:

**-** **Decrease Friction**  
If this product is too difficult to move, then you'll need to decrease friction:

**CAUTION: DO NOT remove screw. Removing screw may cause damage to equipment.**

**c** Arm Swing – Side-to-side

2.5mm

**+** **Increase Friction**  
If this product moves too easily, then you'll need to increase friction:

**-** **Decrease Friction**  
If this product is too difficult to move, then you'll need to decrease friction:

**d** Rotate – Portrait/Landscape

0°

M3 x 6mm

## How to remove this tilting feature:

Save these screws incase you want to add this feature later.

2x  M4 x 14mm

**Set Your Workstation to Work For YOU!**

Learn more about ergonomic computer use at:  
[www.computingcomfort.org](http://www.computingcomfort.org)

- Height** Position top of screen slightly below eye level.  
Position keyboard at about elbow height with wrists flat.
- Distance** Position screen an arm's length from face—at least 20" (508mm).  
Position keyboard close enough to create a 90° angle in elbow.
- Angle** Tilt screen to eliminate glare.  
Tilt the keyboard back 10° so that your wrists remain flat.

**To Reduce Fatigue**  
**Breathe** - Breathe deeply through your nose.  
**Blink** - Blink often to avoid dry eyes.  
**Break** • 2 to 3 minutes every 20 minutes  
• 15 to 20 minutes every 2 hours.
