Important! You will need to adjust this product after installation is complete. Make sure all your equipment is properly installed on the product before attempting adjustments. This product should move smoothly and easily through the full range of motion and stay where you set it. If movements are too easy or difficult or if product does not stay in desired positions, follow the adjustment instructions to create smooth and easy movements. Depending on your product and the adjustment, it may take many turns to notice a difference. Any time equipment is added or removed from this product, resulting in a change in the weight of the mounted load, you should repeat these adjustment steps to ensure safe and optimum operation.

1 Mounting Height for Ergonomic Workstation

This mounting height is a recommendation for an ergonomic workstation that accommodates user heights of 5'3"-5'9" (160-175cm).

If user heights are different than this, you should change mounting height to accommodate user heights. (Change mounting height one inch for every one inch difference in user heights).

Mounting height assumes there is a 6" (152 mm) distance between the center of your monitor mounting holes and the top of the screen. If your distance is smaller, you should increase mounting height accordingly, if your distance is larger, you should decrease your mounting height accordingly.

ENGLISH

Determine mounting location:

Front view with arm pushed back against the wall.

Top view showing range of motion when pulled out from the wall.

2

Concrete Wall Mounting

HOLLOW WALL

Studs ≥ 25 gauge steel

Sheetrock $\geq 5/8''$

Stud spacing $\leq 16''$

WARNING: Because surfaces vary widely and the ultimate mounting method is out of Ergotron's control, it is imperative that you consult with appropriate engineering, architectural or construction professional to ensure that your Ergotron mounting solution is mounted properly to handle applied loads.

2 Concrete Wall Mounting

WARNING:

Mounting holes must be at least 3-1/8" (80mm) deep and must be located within solid concrete, not mortar or covering material. If you drill into an area of concrete that is not solid, reposition mounting holes until both anchors can be fully inserted into solid concrete!

WARNING:

Anchors that are not fully set in solid concrete will not support the applied load resulting in an unstable, unsafe condition which could lead to personal injury and/or property damage. Consult a construction professional if you have any doubt about what this means in regard to your particular situation.

Optional Weight Capacity Modification

Optional Weight Capacity Modification for Displays 18 - 25 lbs (8.2 - 11.3 kg) Only!

IMPORTANT: with this option display lift and tilt motion are no longer possible. To accommodate extra weight, the display is fixed at one of three heights (spaced 2.5" (64 mm) apart), and display tilt is fixed at 20°. If mounting a display 18 lbs (8.2 kg) or less, skip to next page.

Set Your Workstation to Work For YOU!

Learn more about ergonomic computer use at:
www.computingcomfort.org

- Height** Position top of screen slightly below eye level.
 Position keyboard at about elbow height with wrists flat.
- Distance** Position screen an arm's length from face—at least 20" (508mm).
 Position keyboard close enough to create a 90° angle in elbow.
- Angle** Tilt screen to eliminate glare.
 Tilt the keyboard back 10° so that your wrists remain flat.

To Reduce Fatigue
Breathe - Breathe deeply through your nose.
Blink - Blink often to avoid dry eyes.
Break • 2 to 3 minutes every 20 minutes
 • 15 to 20 minutes every 2 hours.
