

eNook Standard

ERGOTRON®

eNook® Pro & eNook Standard Wall Desks

Highlights

- eNook is the wall-mounted workstation that fits where you don't have a lot of room
- Flip the door up to store your devices and lock them out of sight, or flip it down and you have a handy desk to work on
- Comes in two models: Standard (with key locks), and Pro (with programmable code lock)
- eNook Pro is intended for professional applications that require a monitor or a code lock system. Available with Silver Metallic metal, and a choice of 3 finishes for laminate: Dark Cherry, Maple, and Walnut
- eNook Standard is best suited for simple laptop applications that only need key locks. Available with Silver Metallic metal, blue fabric bulletin board, and a choice of 2 finishes for laminate: Dark Cherry and Maple

eNook Pro (shown with optional vertical small CPU holder PN: 80-063-200)

If you are space-challenged, then eNook is the workspace for you.

This wall-mounted workstation not only stores your equipment behind a secure locked door, but the door flips down for a handy desk. The innovative eNook takes up zero floor space (and only a few feet of wall space!) and earned the Best of NeoCon award from international leaders in product design.

Programmable code lock in eNook Pro records up to 3 combinations for multiple users

Standard model includes 2 keyed locks: on the main workspace door and lower cable channel

At the bottom of the eNook there's a separate area to plug in all your gadgets and hide all your cords

The side and top panels are ventilated to keep air moving so your equipment stays cool
