## Hazard Symbols Review

These symbols alert users of a safety condition that demands attention. All users should be able to recognize and understand the significance of the following Safety Hazards if encountered on the product or within the documentation. Children who are not able to recognize and respond appropriately to Safety Alerts should not use this product without adult supervision!

Symbol	Signal Word	Level of Hazard
	<b>NOTE</b>	A NOTE indicates important information that helps you make better use of this product.
	<b>CAUTION</b>	A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.
	<b>WARNING</b>	A WARNING indicates either potential for property damage, personal injury, or death.
	<b>ELECTRICAL</b>	An Electrical indicates an impending electrical hazard which, if not avoided, may result in personal injury, fire and/or death.

## Components

	A	B	C
1	1x 	1x 	1x 
2	1x 	1x 	1x 
3	1x  M4 x 6mm	2x  M4 x 14mm	4x  M4 x 25mm

## Tools Needed

**CAUTION:** Do Not Exceed Maximum SV LCD Cart Weight Capacity 35 lbs. (16 kg). This is the sum of LCD monitor, CPU, keyboard/mouse, camera and any worksurface load, including drawers, if present. Failure to heed this caution may cause serious Injury or property damage to occur.

- 1** a. Attach shelf to bracket using the provided M4x6mm Phillips screw.

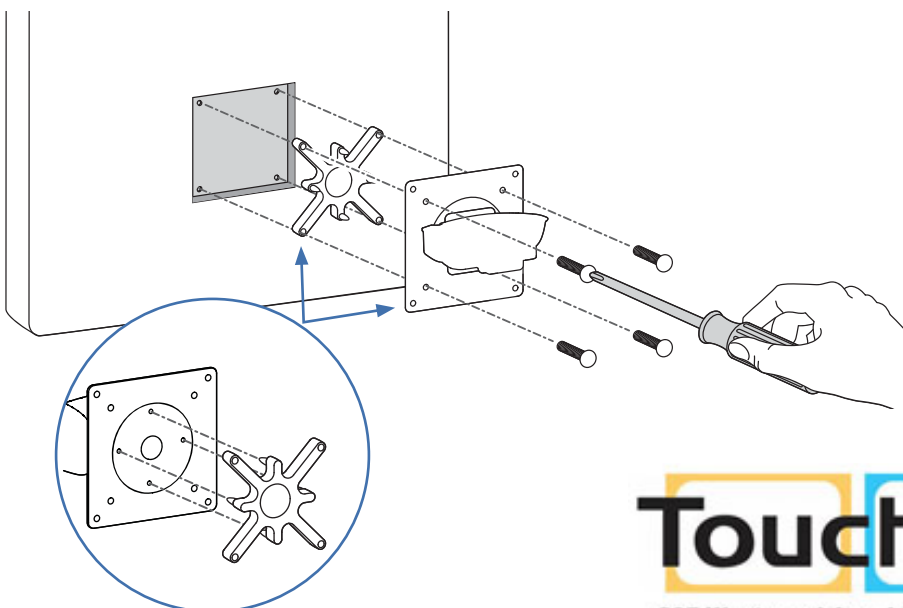

**1x**  M4 x 6mm

If your monitor has recessed mounting holes, you need to add the provided spacer between the monitor and the mounting plate.

- a. Remove the monitor from the cart and set aside on a clean and level surface. The monitor screws can be discarded.
- b. Attach the spacer to the monitor with the four provided M4x25mm Phillips screws.
- c. Reattach the monitor to the cart.
- d. When following step 2 instructions on next page, DO NOT discard the M4x25mm screws. The should be used to mount the shelf/bracket assembly.

**2**

a. Remove the top, left screw and discard. (If using spacer, do not discard the screw!)

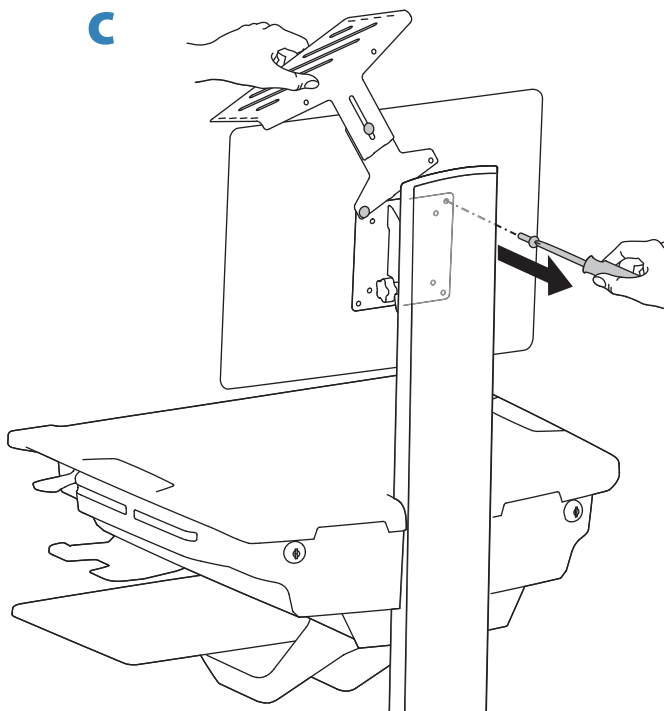

b. Slip the shelf/bracket assembly behind the monitor plate and insert one of the provided M4x14mm Phillips screw into the top, left hole. (If using spacer, reinsert the M4x25mm screw removed in step 2a, above.) Allow screw to be secure but not tight.

c. Remove the top, right screw and discard. (If using spacer, do not discard the screw!)

d. Slip the other end of the shelf/bracket assembly behind the monitor plate and insert a M4x14mm Phillips screw into the top, right hole. (If using spacer, reinsert the M4x25mm screw removed in step 2c, above.) Tighten both top screws.

**b** 2x   
M4 x 14mm

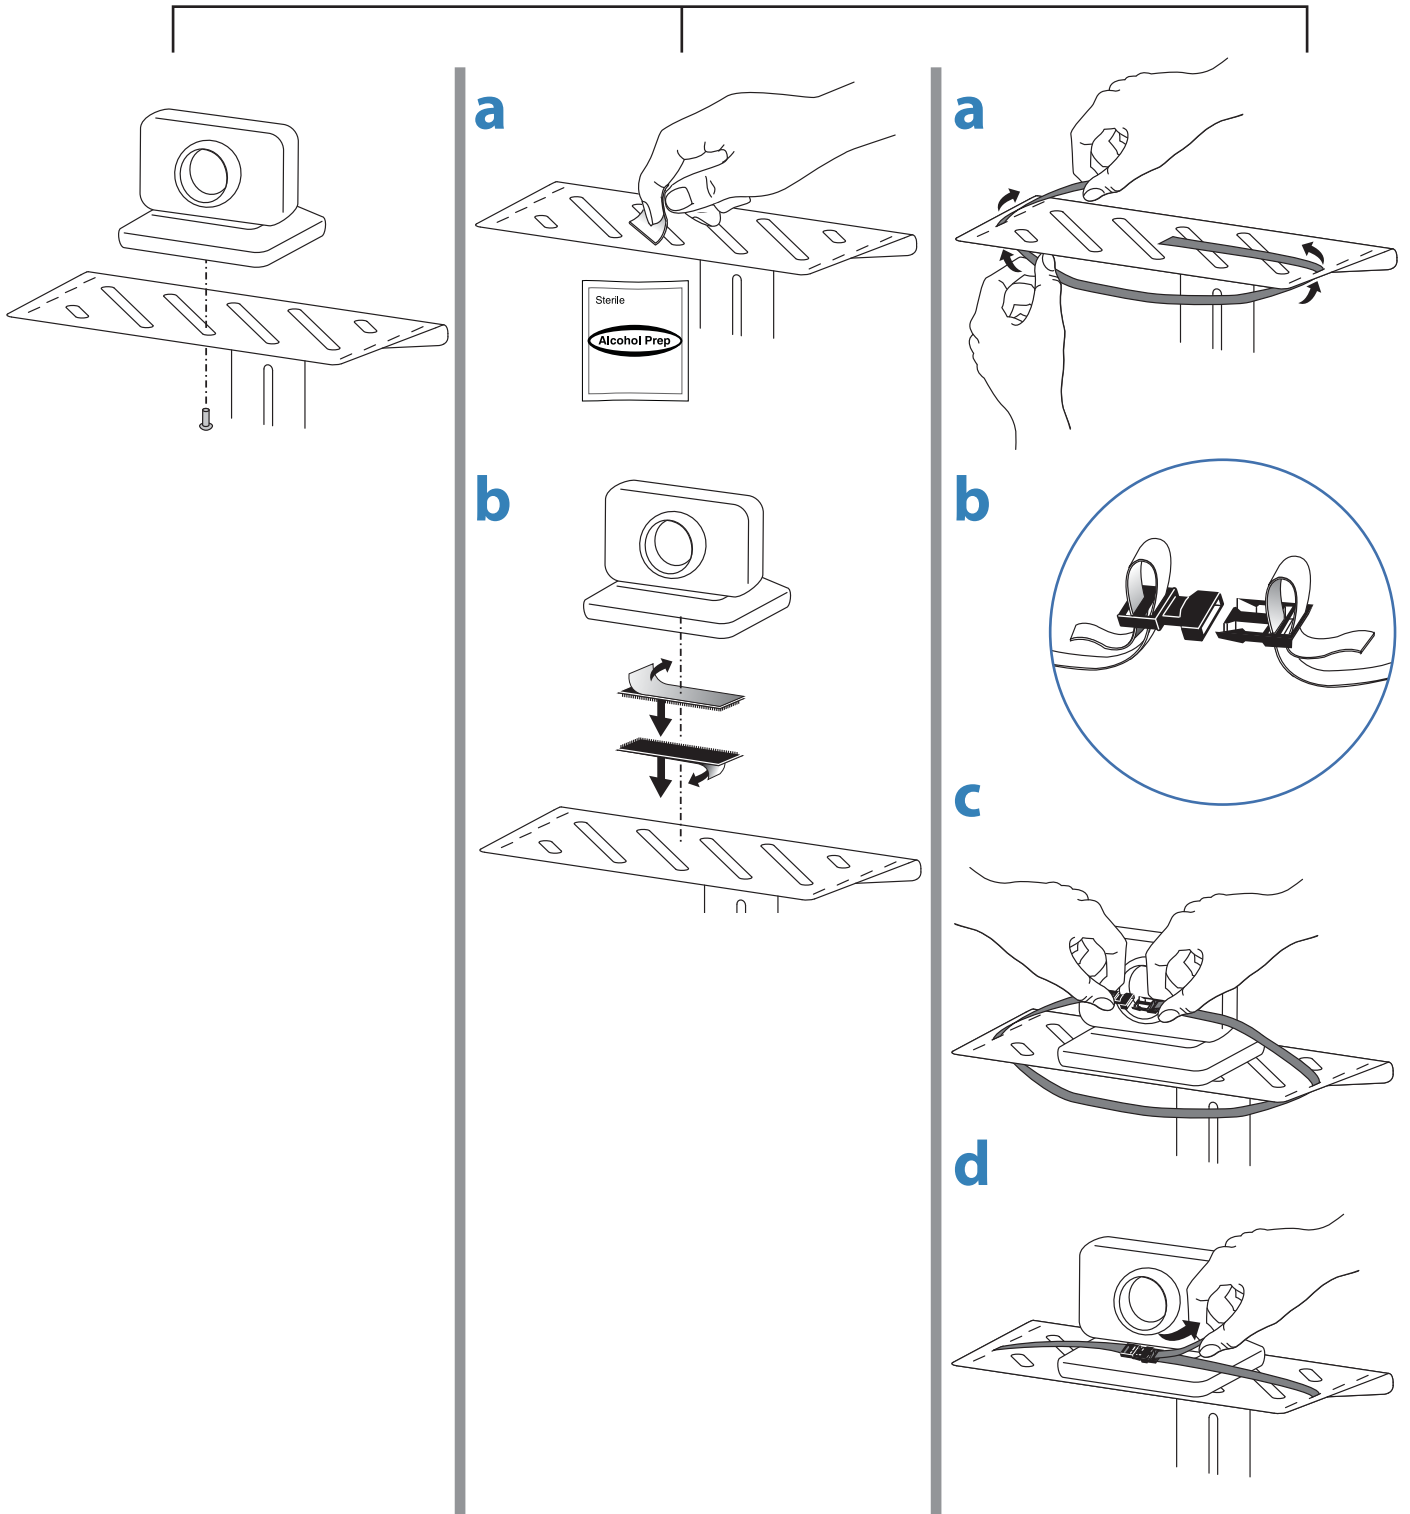

**d** 2x   
M4 x 14mm

# 3

## 3 Mounting Options

## 4 Adjustment Step

Lift – Up and down

Once the camera has been mounted to the shelf, it is important that you adjust the lift tension for the additional weight. Test the lift tension by moving the head unit up and down. If it travels smoothly and easily through the full range of motion, and does not drift up or sag down from the place you set it, the tension is good. If not, adjust as directed below:

To change lift tension:

- a. Remove cap.
- b. Turn adjustment nut with a 14mm (9/16") socket head.
- c. Test lift tension by lifting head unit up and down.
- d. When desired lift tension has been achieved, replace cap.

**b**

NOTE: Adjustment may require 40 - 60 revolutions.

**c**
