AnthroCart[®] 2

Anthro Only Gets Better With Age!

Our Most Popular AnthroCart2 Features

Strong

Sturdy 1" thick industrial grade high density particle board shelves, 16 gauge steel tube legs and our patented shelf support mechanism means AnthroCarts can hold up to 150 pounds of your equipment!

Original AnthroCarts from 1984

Flexible

Shelves install at 1" increments along the vertical tubes so you can place your work surface and additional storage at whatever height best fits your needs. Best of all, the adjustability and wide array of accessories mean the cart grows with you.

Durable

Vinyl T-molding around the shelf surfaces prevents dings on edges. The baked-on powder coat finish on the legs is the toughest finish available! All these details add up to make an AnthroCart able to withstand the daily wear and tear that comes with any work environment.

Easy to Assemble

The simple design of the AnthroCart means you won't have to spend a lot of time putting your AnthroCart together. Detailed assembly instructions and all the necessary tools are included with every cart.

Mobile

Soft rubber 2 3/8" twin wheel casters provide easy and quiet rolling. The front two casters also lock. Casters insert into a solid steel shaft in the base tube so they stay snug over uneven surfaces. Need a more robust option? Upgrade to large 4" casters!

AnthroCart[®] 2

Anthro Only Gets Better With Age!
