

EVOKO PUSCO

The easy way out for public space communication.

Plug-in.

Evoko Pusco is a complete, all-in-one system made to improve public space communication. All aspects of public space communication have been merged into one simple and smart solution – Evoko Pusco. All you have to do is plug in two cables and you are good to go!

Prepare.

We have designed pre-made templates to make it easy to create the impact you are after – just select the applications that are right for your company. Create and schedule a playlist for each Evoko Pusco, or group them together. It's all very easy and guaranteed to look good, every time!

Reach out.

Make customers feel welcome in the reception, drive employee engagement through project updates and dashboards. Share your company values, twitter feed, latest news or provide an overview of meeting room status. Evoko Pusco will help increase customer satisfaction, employee motivation and efficiency!

EVOKO PUSCO

Simple, smart and spectacular.

SAMPLE OF AVAILABLE TEMPLATES:

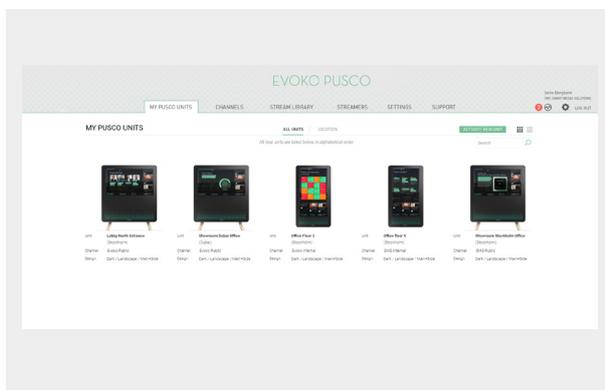

Guaranteed to look good.

You only have to focus on the message – Evoko Pusco takes care of the rest. With our library of pre-made templates, we guarantee that your public spaces look good. They will always provide the people accessing them with useful information. Information presented in an attractive and spectacular way.

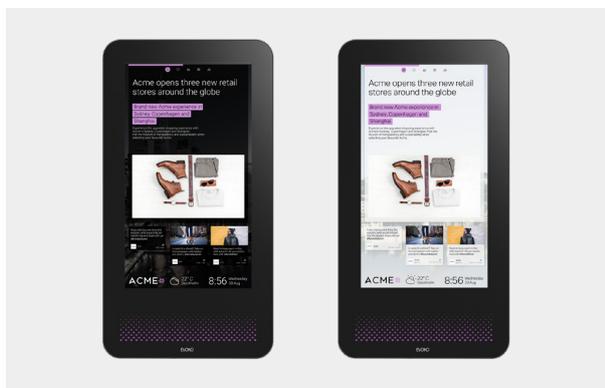

Easy to manage and to set up.

We've taken a whole new approach to how a "content management system" or "publishing system" should work. Forget complicated settings and having to spend time on configuration. Managing your Evoko Pusco is beautifully simple and thanks to our templates, different people in the organization can be responsible for updating just the content they are responsible for.

Make it yours.

To make Evoko Pusco fit your brand it can be personalized by choosing between a light and dark theme, set the background image and the accent color to match your company color. The accent color will be used for highlights on the screen, as well as the status light at the bottom of the unit. Evoko Pusco also has built-in speakers for playback sounds and to highlight and emphasize updated content.

Two ways to reach out.

Evoko Pusco comes in two different models; a wall mounted portrait version – ideal for the office – and a larger, free-standing floor version in landscape format, with beautiful wooden feet, perfect for bigger spaces and lobbies.
