

Variations of the standard 15A-GW are shown below. The cutting capacity for these tools are .010" soft wire.

### 15A-SW

### RADIUS FACED

Length 4.5"(115mm)

Similar to the 15A-GW with rounded blades. Designed to cut soft copper wire, gold, silver and magnet wire. Carbon Steel with corrosion preventing epoxy coating ESD safe (10<sup>5</sup>-10<sup>6</sup> ohms/sq). Made in Switzerland.

### 15A-C

### SHORT FINE BLADE

Length 4.5"(115mm)

Very fine cutting tweezers. Can be used either vertically or horizontally. Short .275in blade. Excellent for use in difficult cutting areas. Carbon Steel with corrosion preventing epoxy coating ESD safe (10<sup>5</sup>-10<sup>6</sup> ohms/sq). Made in Switzerland.

### 15A-RW-ET

### ERGONOMIC

Length 4.5"(115mm)

Same as the 15A-RW with an added Ergonomic cushion grip designed to combat operator fatigue. Also acts as a heat shield. Made in Switzerland.

### 15A-GW-ET

### ERGONOMIC

Length 4.5" (115mm)

Same as the 15A-GW with an added Ergonomic cushion grip designed to combat operator fatigue. Used in Electronic, Military and Biomedical assembly applications where prolonged use is required. Made in Switzerland.
