General description	
Part number	MR12
Part name	Ball probe moisture sensor accessory
<p>The MR12 is a moisture sensor accessory for FLIR moisture meters MR60, MR160 and MR176. The Ball tip design makes it easy to run over, and around objects on the measuring surface. This combined with the non-invasive measurement principle, allows you to cover a large target area in short time without leaving a mark. Use with the optional MR04 extension pole to reduce the need for a ladder, or to optimize ergonomics for 'high' and 'low' measuring targets.</p> <p>The MR12's extended range reduces the risk of underestimating the remediation work scope by missing moisture problems not present at, or close to the measuring surface.</p> <p>With up to 100 mm (4 in) penetration depth, depending on material type, vs the 19 mm (¾ in.) for typical pin- less sensors on the market, the MR12 is the 'must have' sensor on jobs where deeply situated moisture problems pose a risk.</p> <ul style="list-style-type: none"> • Wide range of common building materials supported. • Handgrip designed to avoid hand interfering with measurement. • 'set relative zero' feature. • Robust/ rugged/ Reliable 	
Measurement	
Measurement Range	0% to 100%
