

HDMI 2.0
Digital Ribbon Cable

DESCRIPTION

FSR's Next Generation Digital Ribbon Cables utilize a proprietary technology to allow high speed, high definition HDMI signal transmission over distances of up to 328 ft. This durable cable is fitted with a discreet stainless steel reinforced inner jacket and an outer black jacket that allows the cable to withstand rough service during and to blend in after installation. The hybrid fiber/copper cables deliver a speed of 18 Gb/sec video bandwidth. They can easily handle up to 4k 60Hz 4:4:4 HDR uncompressed HDMI video and are ARC compatible. The cables come pre-terminated in convenient lengths. These advanced technology cables use four glass fibers, seven copper wires and supply the necessary power to the embedded circuitry at both ends of the cable. They meet the HDMI 2.0 / HDCP 2.2 testing standards. The connector shells are labeled "source" and "display" to aid in proper connections.
