Table Boxes

T3U Series Table Boxes

The T3U series of table boxes are small, elegant additions to your conference tables, lecterns, and work spaces.

Plug in your laptop, power up your projector, plug in your microphone, or just access a cable for your computer, the T3U handles it gracefully and efficiently.

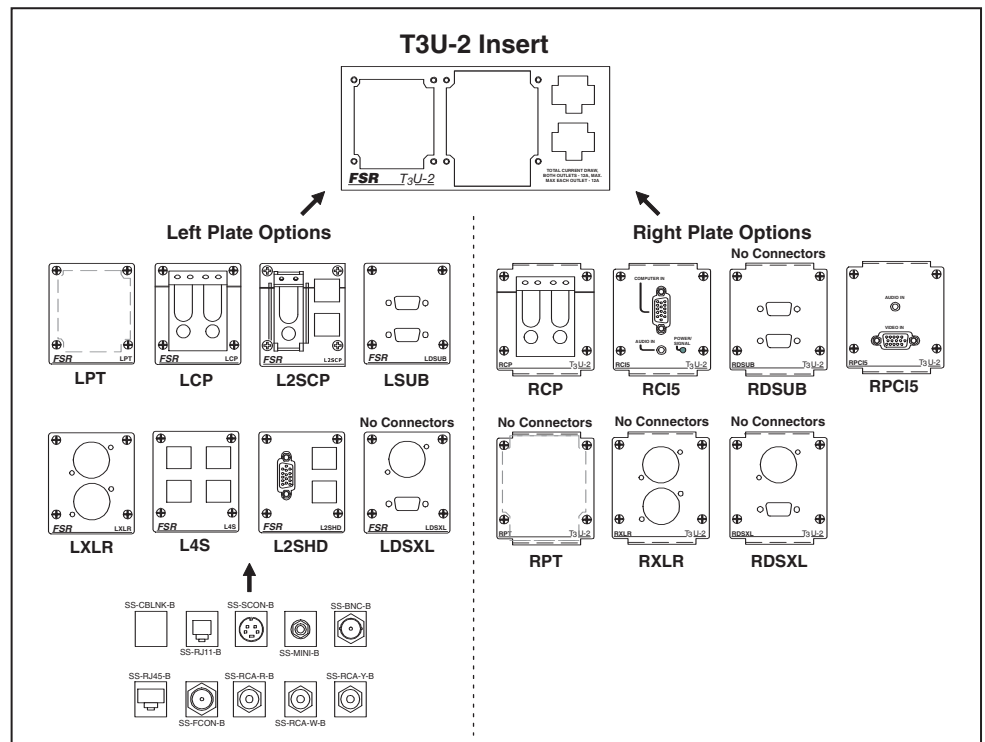

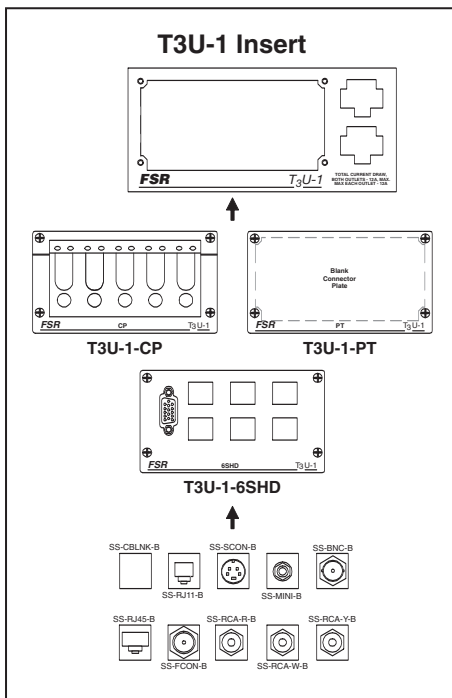

Available in a variety of finishes (black, brushed brass, brushed bronze or brushed nickel), these unique table boxes match your décor with style. Constructed of finely finished metals, the units offer a variety of connection possibilities using interchangeable mounting plates and connectors.

Pictured here is the T3U-R, rim version, which installs easily in your table surface. Space several of these boxes around the table for optimum participation at your meetings.

T3U-2R-NLK	Brushed Nickel	One set of T3U-2 Left and Right Insert Plates

(*) Also available without rim

Pop Up Table Boxes

Pop-Up Table Boxes are available in black or brass. These boxes pop out of your table ready to make your connection!

A simple push of your hand and the pneumatic gas spring system allows smooth lowering and raising of the box for that “high tech” look and feel.

The PTB series is available in 2, 3, and 4 gang sizes, and are supplied with 2 grounded AC receptacles on each side of the box. The PTB's easily handle your computer interfaces, audio, video, data and control on both sides of the box. Since this is a dual sided box, you handle both sides of the table. Add a variety of connections using standard electrical plates or the FSR line of “Simple Solutions”.

FSR provides a wide variety of table boxes that are unique and upscale, meeting the aesthetic demands of today's consultants, architects and clients.

TB-XG Series Boxes

This revolutionary line of boxes and their unique customizing options allow both the consultants and clients to select what the box will look like, and provide for today and tomorrow's connectivity requirements.

Cover finishes include brass or black, or order it without a cover to allow your woodworker to match the exact finish of the wood. You also have a choice of two cover styles. A finger lift door or a “push-to-open/close cover” uses the highest quality latches and construction.

The table boxes have an adjustable mounting frame on the inside to allow standard electrical back boxes to be installed with the appropriate connector plates. This series is available in 4, 5 and 6 gang configurations.

T3-MJ Series

The T3-MJ series is designed to accommodate a wide range of tables and lecterns.

The T3-MJ is the first elegant mount for a gooseneck microphone! This stylish, mini table box is available in three finishes (brass, silver or black) to match your table décor.

Designed to accommodate a wide range of tables and lecterns, the T3-MJ is perfect for conference and board-room tables, judicial benches, courtrooms, pulpits, state houses, and more.

These rich mini table boxes are also available to house a Crestron Crestnet connection, or they can be supplied with an RJ-45 connector.

Patent Pending

An option for 1 or 2 buttons is available to control peripheral equipment in the room. You have a choice of momentary or maintained buttons with a variety of button caps and led colors.

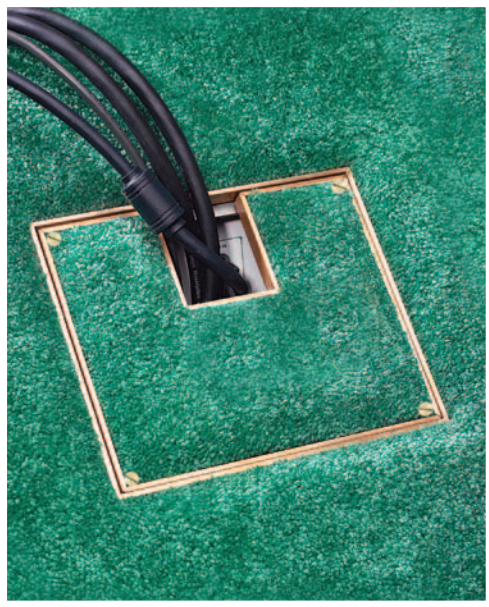

If you want to be elegant and practical, make the connection inside an FSR table, floor or wall box!

All boxes are drawn for you on our new CD ROM!
Featured on the CD is the complete FSR catalog with individual spec sheets and installation manuals.

Add an FSR Floor Box To Your Design

FSR's ADA friendly boxes provide a safe and practical approach to connecting audio, video, power, data, and more!

Match your table boxes with an appropriate floor box from FSR. To handle the rigors of a floor environment, a welded steel construction elegantly handles the floor traffic.

Whether you have a raised access floor, a concrete poured floor or a stage floor, FSR has a box to handle all your connections. Our ADA friendly boxes provide a safe and practical approach to connecting audio, video, power, data, and more!

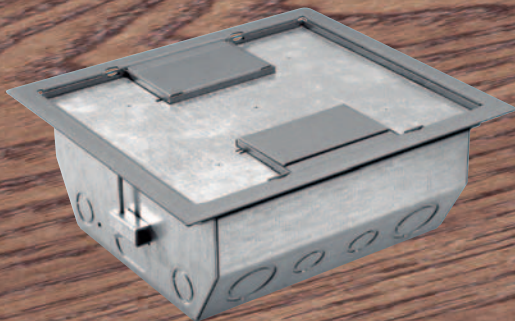

Pictured here is our FL-500P box installed in a carpet over concrete floor environment. The cables are coming through the cable access door. When not in use, the cables are stored in the box and the access door closes completely. The only thing visible is the hand mitered carpet flanges (available in brass or aluminum).

UL and Scrub Water Rated

Raised Access Floor Boxes

Pictured here are our raised access line of floor boxes. The all metal construction provides for one or two cable access doors, or a solid metal cover.

Standard trim colors are gray, black or clay, but we will happily custom match a color of your choice.

All FSR Table Boxes, Floor Boxes and Wall Boxes are drawn for you! Request our New CD with all the CAD Drawings. We did the work for you! Our Representatives in your area will be happy to stop by and show you samples. Just call us at 1-800-332-3771!
