

FP-2 Floor Pocket

FSR
Metal Products Group

FP-2

The FP-2 floor box offers an economical solution for AV and Data cable access and is designed for use in raised floor applications. It is ideal for conference rooms, auditoriums, computer rooms, churches and general meeting spaces. The FP-2 provides easy access to standard 2 gang wall plates for audio, video, telecommunications and data connectivity.

The large hinged access door provides easy access to internal connector plates and stored cables. A smaller hinged cable access door, when opened, provides a pass-through opening for cables. When the unit is not in use, the cover may be completely closed, providing maximum protection of internal stored cables and connectors. This low profile housing is painted with a durable Black textured finish for a rugged yet professional appearance.

FEATURES

- Low cost without sacrificing quality
- 12 gauge steel cover and 16 gauge back box
- Rugged 1/8" barrel hinge on door
- Textured paint finish
- Cable entry door allows for routing of cables when cover is closed
- Accommodates standard 2 gang wall plates
- Simple installation
- For raised access floors only
- Made in USA

APPLICATIONS

- Conference Rooms
- Auditoriums
- Computer Rooms
