

HV-1000 4 PERSON TABLE BOX SYSTEM

DESCRIPTION

The HuddleVU system allows for multiple users to share and view their laptops, tablets, and smart phones screens on a main display. Unlike conventional presentation systems, anyone participating can be a presenter or the audience at any given time at the push of a button. LED's indicate which user is currently live and when the system is busy to each user.

HuddleVU creates the ideal environment for people to view and share ideas. The systems include all the necessary video switching equipment, control hardware, display power control and color-coded captive HDMI cables. It is a very simple yet effective system to quickly install and use.

There are two model styles available:

The **HV-1000** single table box system employs a single FSR HV-T6 table box that allows 1 to 4 users to plug in and power their laptops or other input devices and simply push a button to display their desktop information on the main display. Any user can switch to their own laptops, tablets, and smartphones at any time simply by pushing their own button on the T6 housing.

The individual **HV** systems accommodate from 3 to 7 users depending on the model. Each user has their own FSR HV-T3 table box to plug into. Each table box contains a pullout HDMI cable and an AC outlet. A single push of a button on each T3 is all that is needed to display the laptop or iPad's desktop information onto the main display.

An HV-CTL Controller and up to two DV-HSW-41 HDMI Switchers are included on all systems. The HV-CTL has a power switch, two AC outlets to power the DV-HSW-41 HDMI Switchers and an additional AC outlet to power the main display. The HV-CTL is the main termination point for the system components. When four or less inputs are used the HV-CTL switching can be serially controlled by an external control system.

FEATURES

- Collaborate and share ideas on your computer screen with others
- One button press inclusion of users
- No software or programming required
- Simple installation
- Create attractive workspaces
- Hardware and cables included
- Conversion kits available for VGA and audio input
- Systems with four or less inputs can be controlled by an external control system
- One of the existing HDMI inputs on an HV-T3 table box (up to two on an HV-T6) can be converted to a VGA / Stereo audio input using an HV-1PC-INP converter kit. (See back)

APPLICATIONS

- Classrooms
- Libraries
- Conference rooms
- Educational facilities
- Corporate Teleconference Rooms
- Learning Centers
- Training Rooms
