

Splicing WorkStation

Features

- Portable workbench
- Compact fold-up
- Quick-attach standoffs
- Large work surface
- Built in slots & holes for tools
- Heavy duty steel legs

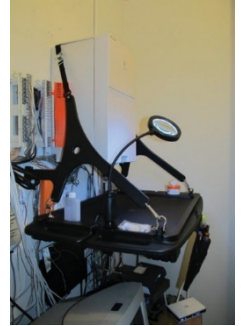

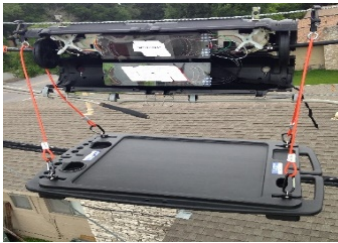

FiberFox is proud to offer the next generation Splicing Table Workstation to support fiber splicing professionals. The heavy duty, steel legs lock firmly to the work surface and stands at 31-1/2 inches tall and our unique Cable Management Bracket fits securely on either side of the workbench. Separate the work surface from the stand and quickly attach the two unique stand-off props with adjustable webbing and you can take your work table to new heights. Attach the Aerial Strand Cables and your table is right where you need it for working from an aerial bucket truck.

Slots and holes are molded into the table to conveniently hold tools and other splicing equipment. Durable, portable, and stable, this will become a standard in your splicing environment.
