

# Fiber Optic Cleaning Kit

FiberFox now offers a complete fiber optic cleaning kit for field cleaning of bare fiber, connector end faces, adapter, and jumpers. Using our non-hazardous cleaning fluid and cleaning tips, the FiberFox cleaning kits deliver compact, safe, easy to use, reliable cleaning for all fiber applications. The kit combines items required to identify and remove easily the contaminants that can degrade overall splicing performance.

Environmental contamination such as dust, dirt, and fiber coating debris eventually find their way to the surface of your fiber end face and will eventually degrade performance. To solve cleaning needs, FiberFox includes the highest quality tools into an affordable and effective kit together in its own carrying case.

Only the best performing cleaning formulas tested are offered as FiberFox consumable products. That's the reason many technicians and installers trust that our various consumables including fiber optic cleaning supplies and tools are the very best in the industry.
