

No Strings Attached

Wireless Measurements Even Behind a Blower Door

Now you can take your HVACR measurements wirelessly with the new LT17AW Digital Multimeter, so you're not limited by your test leads.

Measurements like indoor wet bulb and blower motor amperage can be transmitted directly to your multimeter from up to 75' away.

Wireless measurements make your job more convenient, plus the LT17AW is made specifically for HVACR technicians with:

- Remote Real-time HVACR Readings for Better Analysis
- Packed with HVACR Measurements
- 75' Wireless Signal Range
- Easy-to-Use One Button *Wireless Sync*
- *Wireless Transmitter Works with any Fieldpiece Accessory Head*

Visit www.fieldpiece.com today to learn how you can start working with no strings attached.

model LT17AW

Wireless Transmitter
& Current Clamp
Head included

Professional-grade instruments for field service

The Everyday Meter You Won't See Everyday

Because it has all the measurements you use everyday, the LT17AW is the perfect HVACR meter; and because it's wireless, it's like no other digital multimeter on the market.

The LT17AW connects to any Fieldpiece accessory head via the included wireless transmitter so you can easily monitor measurements from up to 75" away -- with no strings attached.

For instance, simply hook up your amp clamp to the blower motor, close the door, and receive your wireless reading anywhere on the job site. Or receive your indoor wet bulb measurement while you're adjusting the system at the condenser. Because your measurements are taken in real-time, you can easily get a more accurate diagnosis of the system.

Plus the LT17AW is loaded with parameters and ranges you need for HVACR troubleshooting. You can easily measure current, resistance, voltage, capacitance, frequency, continuity and temperature.

Press SYNC on the LT17AW and ET2W for instant wireless signal

ET2W Wireless Transmitter connects to any accessory head

LT17AW Components

The LT17AW comes complete with ET2W Wireless Transmitter, ACH4 Amp Clamp, K-type thermocouple, deluxe silicone test leads, removable probe tips, velcro strap and carrying case.

- LT17AW - Digital Multimeter
Sends and receives wireless measurements
- ET2W - Wireless Transmitter
Connects to any Fieldpiece accessory head to transmit measurements wirelessly
- ACH4 - Current Clamp Head
Measures AC Amps from 1A to 400A
- ADLS2 - Deluxe Test Leads
- ATB1 - K-type Thermocouple
- ANC5 - Large Single Meter Case

Additional Fieldpiece Wireless Products

HVAC Guide® System Analyzer, HG3

The HG3 is a wireless, full system analyzer that gives you real-time measurements for up to 13 parameters.

- More Accurately Diagnose Systems with Real-time Data
- 12 Wireless Measurements at One Time
- Monitor System While Making Adjustments
- Wireless Signal from 100' Away
- Comes with 1 Transmitter and 1 Temp Accessory Head

Electronic Handle, EH4W

The wireless electronic handle and wireless transmitter are a perfect pair to transform any Fieldpiece accessory head into a wireless standalone meter.

- Instant Readings for Better Analysis
- Monitor System While Making Adjustments
- Wireless Signal from 75' Away
- Comes with 1 Electronic Handle and 1 Transmitter
