

# Fluke 378 FC Industrial Clamp Meter

## Simultaneous voltage and current measurements on one screen, with one measurement

The Fluke 378 FC true-rms clamp meters use FieldSense™ technology to make testing faster and safer, all without touching a live conductor. You get accurate voltage and current measurements through the clamp jaw in a single measurement. Simply clip the black test lead to any electrical ground, put the clamp jaw around the conductor and see reliable, accurate voltage and current values on a single display screen, at the same time.

- Single-action voltage and current measurements without touching a live wire
- Easy-to-read dual measurement display
- Rapid 3-phase and phase rotation measurements
- Power quality indicator shows power quality issues automatically
- Record, analyze, share results with Fluke Connect™ software

## Fluke 378 FC Industrial Clamp Meter

P/N 5111812

Includes:

- Fluke 378 FC True-rms AC/DC Clamp Meter
- TL224 Test Leads
- TP175 TwistGuard™ Test Probes
- AC285 black grounding clip (1 only)
- i2500-18 iFlex® Flexible Current Probe 18 in. (48 cm)
- TPAK ToolPak™ Magnetic Meter Hanger
- Premium carrying case
- Quick reference guide

## Fluke 378 FC/B Industrial Clamp Meter–Bulk\*

P/N 5365222

Includes:

- Fluke 378 FC True-rms AC/DC Clamp Meter
- TL224 Test Leads
- TP175 TwistGuard™ Test Probes
- AC285 black grounding clip (1 only)
- TPAK ToolPak™ Magnetic Meter Hanger
- Quick reference guide

\*Bulk option applicable to orders of 25 units or more. Contact your local Fluke representative for pricing.
