G-Touch Deluxe Range

an eye to the future

The ideal collaborative tool.

Collaboration Innovation

Sizes: 55", 65", 70" & 80"

future proof classrooms

The G-Touch Deluxe Range is one of Genee's most popular classroom touchscreens and features built-in Android.

The new slim line, lightweight design makes it ideal for use with a portable stand, and teachers benefit from the flexibility of uses. With 10-point touch technology, the G-Touch Classroom Range provide teachers with an array of collaborative teaching opportunities. Students can interact directly on the screen or respond via hand held devices. Crystal clear audio via the front facing speakers is ideal for video presentations, and the addition of a Genee Vision Visualiser allows live demonstrations to be displayed to the classroom.

All G-Touch Classroom Touchscreens include Genee's unique Interactive Classroom Software, SPARK & Project Flow which have been developed specifically with teachers in mind.

Allow integration of Educational Apps through the Genee App Store – expand the functionality of your screen. All Genee Deluxe touchscreens come complete with Android so no PC is required. Operating systems are upgradable with our simple 'plug and play' i3, i5 or i7 devices that simply slide into the back of your screen. No need for additional lighting or blinds as our screens come with anti-glare glass making for a clear view and a less stuffy classroom environment.

UPGRADEABLE BUILT-IN PC

Flexibility is key for evolving technology, and all G-Touch models have the option to add a built-in PC. Our simple 'slide and secure' fitting options allow for easy upgrades and simple accessibility.

BUILT-IN ANDROID

All G-Touch Deluxe models offer a full, built-in Android experience. Utilising built-in WI-FI, G-Touch Deluxe users benefit from a comprehensive array of Apps, and bespoke Genee Software.

SINGLE POWER CONTROL

No more fiddling around the side and back of the screen to find various on-off buttons. All G-Touch models come with a single, front facing power button which powers both Screen and Built-In PC.

EASY ACCESSIBLE CONNECTIVITY

Our technology is built with usability in mind. All G-Touch models come with an easily accessible front-facing connection panel, allowing simple plug & play connectivity with external devices.

Discover more about Genee's range of visualisers, interactive touchscreens, audience response systems and software.
