

Flexi-Router® 100

The Next Generation Flexible-Shaft Drain Cleaner

General Pipe Cleaners redefines high-speed, flexible-shaft technology with the new Flexi-Router® 100 drain cleaner – the next-generation flexible-shaft machine! We've added an integral motor, stronger rod and unique ClogChopper cutters to a durable metal, easily maneuverable frame.

The stronger, stiffer rod is flexible enough to get through 2" lines, yet strong enough to cut roots in 4" drain lines up to 75 feet down the line. It's powered by an integral variable speed motor that lets you adjust the speed from zero to 2200 rpm. With the foot pedal you have both hands free to safely guide the rod into the line. You can use the Flexi-Router simultaneously with your sewer inspection camera system to instantly view your results.

General couples our unique ClogChopper® cutters that dig into debris and roots, easily grinding up stubborn clogs, with stainless steel and carbide-tipped chain cutters. Together, they make a formidable combination, capable of boring through tough stoppages, shredding obstructions and scouring pipe walls clean.

The durable metal frame includes 10" wheels and folding handle to make it easier to get the machine smoothly to and from the job. A safety slip clutch helps protect the rod. But *if* you ever do get into trouble, the rod is field repairable.

"Two-part cleaning array"

General's innovative, cutter system combines the unique ClogChopper® with Carbide-Tipped Chain Cutters to make a formidable combination. Together, they are capable of boring through tough stoppages and scale, shredding obstructions and scouring pipe walls clean.

Flexi-Router® 100

What is Flexible Shaft Technology?

Flexible shaft technology is faster and more thorough than traditional drain cleaners. The rod spins more than 10 times faster than drum machines. At speeds of 2000 RPM or more, the cutters quickly grind up stoppages and scour the walls of the pipe. The rod is safely protected inside a sheath so it's easy to handle – no spinning drums.

Flexi-Router Features

- Integral variable speed motor – from zero to 2200 RPM.
- Stronger, stiffer rod and durable sheath.
- Flexible enough to clear 2" lines, yet strong enough to cut roots in 4" lines.
- Clears lines up to 75 feet long.
- Foot pedal frees hands to guide the rod.
- Two-part cleaning array combines ClogChopper® with carbide-tipped chain cutters.
- Allows you to simultaneously clear stoppages and inspect results.
- Durable metal frame includes 10" wheels and folding handle.
- Safety slip clutch helps protect the rod.
- Rod is field repairable.
- Made in USA

Flexi-Router Units

Item #	Catalog #	Description
107570	FR100-A	Includes FR100, 50' x 5/16" Rod, Sheath and Coupler (50FR1A) and FR100-CS Cutter Set
107580	FR100-B	Same as FR100-A, plus 25' x 5/16" Rod Extension (25FR1A)

Flexi-Router Accessories

Item #	Catalog #	Description
106700	50FR1A	50' x 5/16" Rod, Sheath and Coupler
106770	25FR1A	25' x 5/16" Rod Extension with Sheath and Coupler
106780	FR100-CS	Flexi-Router 100 Cutter Set for 5/16" Rod, includes FR-2CK, FR-3-4CCK, and FR 1-1/2CG.
106710	FR-2CK	2" Stainless Steel Chain Cutter for 5/16" Rod
106720	FR-3-4CCK	3" – 4" Carbide Chain Cutter for 5/16" Rod
106900	FR-1-1/2CG	1-1/2 ClogChopper Cutter For 5/16" Rod
