Gen-Eye X-POD Plus®

Video Pipe Inspection System

Plus Battery Adapter
Plus Wi-Fi
Plus Distance Counter

The Gen-Eye X-POD Plus® sewer camera system includes the Gen-Pack™ battery adapter, Wi-Fi transmitter, and an on-screen distance counter as standard equipment to boost productivity and profitability!

X-POD Plus makes recording and sharing inspections easier. You can record videos and photos on a flash drive using the USB port or send the recording to your customers via your smartphone or tablet with the built-in Wi-Fi transmitter.

The on-screen distance counter shows how far the camera has traveled down a line – in feet or meters. And for optimum accuracy, settings can be adjusted for full size or mini-reel configurations.

The lightweight, popular X-POD systems combine camera, reel, and monitor into one compact package. A durable docking arm supports the Command Module – and permits height and angle adjustments for optimal viewing.

Just grab it and go! The full size X-POD Plus features a self-leveling color camera and 200 ft. Gel-Rod for inspecting 3" to 10" drain lines. The compact Mini-Reels carry 100 ft. or 200 ft. of Gel-Rod with mini self-leveling color camera for trouble-shooting 2" and 3" lines. Full size reels include 10" wheels to easily roll the camera to and from the job.

Gen-Pack™ Battery Adapter

Depending on battery type and settings, the built-in Gen-Pack battery adapter lets you operate the camera system for up to 12 hours in remote locations with limited access to power. Fuse-protected to safeguard your equipment investment, the Gen-Pack battery adapter is also available separately. Compatible with Milwaukee M18 battery or equivalent. Battery and charger are not included.
