## HAKKO FR-810 PRESS RELEASE

### *Hakko Introduces the New FR-810 Hot Air Station*

VALENCIA, CA — The FR-810 Hot Air Rework Station sets a new bar for convective rework. The new, lightweight design features a quiet self-contained air supply capable of delivering approximately 100 L/min (free flowing). The new heating element design improves durability and provides a top end temperature of 600°C. New N51

Series Quick Change nozzles allows for tool-free installation and removal and the integrated holder provides an automatic safety cool down when the handpiece is not in use.

The FR-810 also features – Easy to read digital display for both temperature and air level • Slender handpiece with integrated Start/Stop button • 5 User Programmable Presets for temperature and airflow • New Preset Chain feature to allow consecutive execution of presets creating a rework profile • Auto Power-Off • Timer function for process consistency • Additional new single jet nozzles with larger sizes • Quick Change Adapter for compatibility with existing HAKKO nozzles • ESD Safe design • Password lockout to prevent unauthorized setup changes

Available May 2014

See it first at IPC/APEX EXPO, Mandalay Bay Convention Center, Las Vegas, NV, March 25-27, Booth #2285.
