Heavy Duty Welded Steel 2-Post Rack *DNRRHDW Series*

UL 2416 Rated 1,500 lbs|680 kg Weight Capacity

When strength and reliability is the highest priority, be sure to choose the Data/Networking Robust Rack (DNRR) from Hammond Manufacturing. Designed to support your rack mount infrastructure, regardless of the application, the DNRR includes premium features not found on most other racks.

Features

- The DNRR Heavy Duty Welded Rack Series boasts an industry leading 10-Gauge welded steel frame which is the most robust steel rack on the market.
- Our automated tapping process provides EIA compliant threaded rails on both the front and back to ensure flexibility when mounting equipment.
 - Includes marked rack unit dividers to aid in equipment mounting.
- When connecting multiple racks together, numerous holes for mounting power distribution, cable management and other accessories are provided.
- Bonding is a breeze with two (2) pairs of integrated 10-32 ground studs, spaced 5/8" apart. Stud pairs are conveniently located across from each other inside the rail channel. For added convenience, a pair is located near the top of the rack, while the other at lower side.
- To keep it looking great, the DNRR undergoes a three-stage paint process which includes a coat of premium smooth black powder paint.
- Before sending the DNRR on it's way we cover the rails and base with a thick layer of cardboard to prevent any damage that may occur during transportation.

Specifications

- Heavy duty, 10-gauge steel construction.
- UL Listed 2416 rated for up to 1,500 lbs (680 kg) static load rating.
- TAA Compliant.
- RoHS Compliant.
- Manufactured in North America.

On a budget? The RB-2P 2-Post Rack Series is 12-Gauge Steel and supports 1,000 lbs. [Click here to learn more.](#)

Looking for even more weight capacity? The DRZ4 is UL rated for up to 2,000 lbs. [Click here to learn more.](#)
