Blazing fast, never-fail sampling High-speed isolation measurement at 200 MS/s

1/19/0017

Superior processing capacity lets you save data while measuring Save data in real time, 32 times faster than conventional models

User-friendly design for accurate and smooth operation Intuitive operation via large 12.1-inch touch screen

## Overwhelming high speed technology A revolutionary approach to measurement, recording and analysis

## MEMORY HICORDER MR6000

The MR6000 overcomes all barriers to reach new ground and meet challenges that are yet to be seen. World class specifications, operability and design - Hioki's newest memory recorder has been re-engineered from top to bottom, delivering unprecedented performance that will change how you look at waveform recording. Redefining the world standard for recorders - that is the Hioki MR6000.

## 200MS/s

High-speed optical isolated measurement

## Instant saving Real-time save

Intuitive operation

Touch screen

Increased efficiency of inverters and improved performance of energy-saving technologies have been achieved in the power electronics, renewable energy, and automotive industries. We have drastically improved the technology used in our Memory HiCorders, developing the MR6000 Memory HiCorder to meet the advanced demands of all industries.

# Series-Leading Measurement Performance

## High-speed isolated measurement at 200 MS/s Up to 32 ch in the analog unit and up to 128 ch in the logic unit

The Hioki Memory HiCorder lineup now includes a powerful input unit that unlocks the full measuring potential of the MR6000. The HIGH SPEED ANALOG UNIT U8976 boasts the highest sampling rate in its entire series, an order of magnitude faster than conventional models, enabling the unit to perform isolated measurement at 200 MS/s. Combine multiple modules of the 4ch ANALOG UNIT U8975, which provides 4 channels of input with a speed of 5 MS/s at 16 bits, to perform multi-channel measurements up to 32 channels. Make the most of the Memory HiCorder's capabilities as we continue its development to meet your advanced measurement needs.

#### Blazing fast, never-fail sampling Record high-precision waveforms

NEW HIGH SPEED ANALOG UNIT U8976

You need accurate detection of switching waveforms in inverter evaluation tests, which requires a high level of efficiency. We developed the HIGH SPEED ANALOG UNIT U8976 to meet those needs. In addition to high-speed sampling at 200 MS/s, the unit supports frequency bands up to 30 MHz. Adapted to the Memory HiCorder's direct input feature, it supports inputs up to 400 V DC.

Available r duration	record	ding		cond con ding at 20	
Sampling rate	1 ch	2 ch	3 to 4 ch	5 to 8 ch	9 to 16 ch
200 MS/s	5 s	2.5 s	1 s	0.5 s	0.25 s
100 MS/s	10 s	5 s	2 s	1 s	0.5 s
50 MS/s	20 s	10 s	4 s	2 s	1 s
20 MS/s	50 s	25 s	10 s	5 s	2.5 s
:	:	:	:	:	:

\*Internal memory used \*U8976 installed in 8 slots

#### Install up to 8 units with 4 channels each Measure multiple points simultaneously

NEW 4ch ANALOG UNIT U8975

Our lineup now includes a 4ch Analog Unit with 4-channel input on a single unit, improving the multi-channel measurement performance of the Memory HiCorder. The unit supports direct inputs up to 200 V DC, and its sampling rate is five times faster than conventional models. In addition, its high 16-bit resolution allows you to measure voltage with superior accuracy.

Conventional sampling (20 MS/s)

200 MS/s High-speed sampling

## Isolated input with optical isolation devices

Connections between analog input channels, and between the input channel and the main unit, are fully isolated. This means that, unlike an oscilloscope, measurements can be made without concern with negative effects from potential differences.

Simultaneous measurement of multiple locations in 32 channels at 5 MS/s

5

### A rich unit lineup for detecting a wide range of phenomena

Combine multiple units to record a range of phenomena.

A high-voltage unit with a direct input of 1000 V DC is ideal for measuring global power lines, including

uninterruptible power supplies (UPS) and commercial power supplies.

Use multiple logic units to measure relay ON/OFF signals or PLC (programmable logic controller) signals across up to 128 channels simultaneously.

Unit interchangeability

The unit types compatible with the MR6000 are identical to the ones compatible with the MEMORY HiCORDER MR8827, MR8847A, MR8740, and MR8741. Use any of the 12 types listed in the unit selection guide below. However, the U8975 and U8976 can only be used with the MR6000.

#### Unit selection guide (All 12 types)

	Measured signal	Model	Description	No. of channels	Fastest sampling	Bandwidth	A/D resolution	DC accuracy	Max. input voltage	Sensitivity (#1)	Max. sensitivity range	Isolation	Supplement

## Concentration of sensing technologies with superior accuracy: A rich set of functions suitable for all measuring purposes

The sensing technology that serves as the inlet for measurement data is essential for detecting various phenomena in multiple channels. The MR6000 is a high-spec model that fully utilizes the capacity of Hioki's high-precision sensors.

## Compatible with high-precision sensors for measuring large currents

Combine the CURRENT UNIT 8971 and a current probe or current sensor designed and manufactured by Hioki to use the system within a wide temperature range or measure large currents with a high level of precision at solar power plants or development sites for EVs/HEVs. The convenient, built-in sensor identification function lets you simply connect the sensor to easily configure the scaling settings through automatic recognition.

Combine the HIGH SPEED ANALOG UNIT U8976 and a Hioki current probe or clamp-on probe for high-precision wideband observation of current waveforms. Furthermore, install the optional PROBE POWER UNIT Z5021 to drive these probes from the MR6000 main unit.

## Triggers that detect targeted events

Set triggers on any channel to record data whenever an event occurs.

Level trigger	Compares to one voltage value.
Window trigger	Compares to two voltage values.
Voltage drop trigger	Detects voltage drops in commercial power lines.
Period trigger	Monitors periods.
Glitch trigger	Detects anomalies in pulses.
Pattern trigger	Compares when the logic signal is ON/OFF.

Clear trigger system diagram

#### Setting multiple triggers for a single channel

Set up to 4 triggers for a single channel.

If, for instance, you set the glitch, level, window-in, and window-out triggers for the same input waveform, that waveform is monitored according to the set trigger conditions.

Up to 4

Various triggers ×

Settable for any channel

# Observe long-term fluctuations without any sampling rate losses

Input

Input

The system uses the envelope measurement method to record maximum and minimum values at set intervals while performing oversampling at 100 MS/s.

The internal memory has a capacity of 1 G-words, which ensures that the measuring process continues for a long time without any data losses. Save data in real time while measuring.

Over sampling speed	Recording intervals	1 ch	 9 to 16 ch

\*Without the U8975, MR8990, or real-time waveform processing calculations

# Numerical calculation function boasting high analytical performance

#### ALL Installed in MR6000, MR6000-01

The measured waveforms are analyzed with numerical parameters. The MR6000 features some new numerical calculations including overshoot and undershoot calculations. In addition to analog and logic channels, this model performs calculations on real-time waveform processing channels. It also features the numerical judgment function.

#### ONLY Installed in MR6000-01

#### Calculate measurement data during measurement : Real-time waveform processing

The MR6000-01 features powerful optional equipment for real-time waveform processing. This function performs the four arithmetic operations (addition, subtraction, multiplication, and division), differentiation calculations, or integration calculations during the measuring process. This lets you use waveforms to check the calculation results while measuring. The equipment also saves and computes the calculation results numerically after the measuring process.

#### ONLY Installed in MR6000-01

#### Observe clear waveforms without noise : Digital filter calculation

This function removes harmonic noise or specific frequency noise from measurement data. Use it to eliminate the noise that cannot be resolved with the standard filter installed in the unit.

Simultaneous calculations of up to 16 out of a total of 33 computations

Average value	Rise time	Duty ratio	Amplitude
RMS value	Fall time	Pulse count	Overshoot
Peak to peak value	Standard deviation	Four arithmetic operations	Undershoot

# Highest Transfer Speed in the Entire Series

## Data transfer up to 32 times faster compared to conventional models Outstanding real-time save function that saves data during measurement

The MR6000 features a brand new interface that makes data transfer up to 32 times faster. In addition, faster internal processing allows data to be saved to external media in real time during measurement.

#### Drastically increased data transfer speed

Data transfer to storage devices is now up to 32 times faster. While conventional models transferred data at 1 MS/s in a single channel, the MR6000 transfers data for 32 channels.

\*Compared to other recorders in the Hioki Memory HiCorder series. \*Results vary according to measurement conditions.

#### Saving data directly to your PC

Transfer measurement data directly to your PC by using the FTP sending function together with the real-time save function. This makes it easier to observe data after the measuring process.

## Longest Continuous Recording in the Entire Series

## Long-term recording and high-speed sampling in multiple channels All in a single measurement

The real-time save function controls the available measurement duration without relying on the capacity of the internal storage memory. For long-term recording, we recommend a high-capacity SSD or HD unit. You can also use a more convenient USB memory stick or SD memory card. All phenomena can be recorded at a high sampling rate over a long period of time. This feature is ideal for situations where it is hard to predict the nature of a phenomenon or for measurements that can only be performed once. When saved in real time, data is split into several 512 MB files.

d: days h: hours min: minutes s: seconds

#### Available real-time save duration for various media

Save destination	Sampling speed	Number of channels	Available measurement duration	Maximum sampling rate for real-time save *1
SSD UNIT U8332 (256 GB)	1 MS/s	32 ch	Approx. 1 h	20 MS/s
HD UNIT U8333 (320 GB)	1 MS/s	16 ch	Approx. 2 h 40 min	10 MS/s
USB DRIVE Z4006 (16 GB)	1 MS/s	8 ch	Approx. 16 min	5 MS/s *2
SD MEMORY CARD Z4003 (8 GB)	1 MS/s	8 ch	Approx. 8 min	5 MS/s
PC	1 MS/s	8 ch	Depends on PC capacity	5 MS/s

\*1: For 2 channels (no settings for 1 channel) \*2: When using the USB 3.0 connector

## Long-term measurements for more efficient testing

The real-time save function boasts high-speed sampling and multi-channel measurements. Perform an approximately 1-hour measurement at 20 MS/s in 2 channels or 1 MS/s in 32 channels.

# User-Friendly Flexible Design

HIOKI

## Fast and convenient touch screen Operation as smooth as silk

The capacitive touch screen delivers intuitive operability.

Select a setting item directly by tapping the screen, and use your fingers to enlarge the part you want to see.

The new user interface makes setting measurement items for multiple channels easier compared to the more complicated conventional models where you had to press the keys several times to configure a setting.

▲ Use the rotary knobs to move the tracing cursor.

Touch screen 12.1 inches Large LCD

▲ Simply tap the screen to switch between the items you want to set.

# Easy method for pinpointing a specific waveform within large amounts of measurement data

Set the peak values or trigger conditions you want to search for to have the relevant data retrieved and displayed automatically. Our new Memory HiCorder Concierge function automatically calculates the characteristics of the reference waveform you have set and searches all of the measured data to detect and array any waveforms with low similarity as anomalous waveforms. This drastically reduces the amount of time required to search for anomalies by eliminating the need to scroll through measured waveforms and check them visually.

## Memory HiCorder Concierge

#### Use the Concierge to look for anomalous waveforms.

A new waveform search function finds anomalous waveforms in all of the measured data. This function is ideal for situations where it is difficult to set the right triggers before measuring because the nature of potential anomalies cannot be predicted.

Automatically search for waveforms with low similarity to the reference waveform

#### Rich set of search functions

Registering a reference waveform

#### Peak search

Search for the maximum value, minimum value, local maxima, or local minima in all of the measured data, and mark the search point in the waveform.

#### Trigger search

Set trigger conditions for all of the measured data again to search for points where the conditions are fulfilled, even if no triggers were set during the measuring process.

#### Jump

New function Waveform

Search Automatically search

for anomalous

waveforms

Jump to an event mark you made while measuring, to the cursor position on the display, or to the location measured at a specified time.

### Radically improved data saving time

Transferring very large amounts of data measured over a long period of time used to be very time-consuming. The MR6000 features a brand new interface and faster internal processing, reducing the time required to save measurement data to media. This saves you the trouble of waiting for data to be saved and improves work efficiency.

USB 2.0	Existing models	
036 2.0	MR6000	Reduced to 1/5
USB 3.0	MHOUUU	<ul> <li>Further reduced to 1/10</li> </ul>

# Multifunctional Interface

## Only 6 keys in total New recorder design

Use the touch screen to configure all the basic settings.

Open or close the top panel of the main unit. Z4006 USB DRIVE installable.

For outputting the screen display External sampling terminal For inputting various external sampling signals External control terminal For inputting various external signals to control the device

Dedicated power supply terminal for current clamp For supplying power to the current sensor (Option)

Install input units appropriate for the measurement target

For reducing the internal

For USB 3.0 connectors (USB memory sticks only)

## Operability and visibility suited for a variety of work environments

## Ergonomical operating angle

Our search for a touch screen with the best operability and visibility angle led us to develop retractable feet that maximize those two important attributes. Tilting the MR6000 with the feet reduces the strain on your wrists when you use the device on a desk, and keeps your line of sight at a natural level. The rear side also features the same retractable feet, making is easy to use the device on the floor.

# Easy handling

The rubber handle boasts excellent grip and makes it easy to carry the device with either one or both hands. The grips on either side of the device can also be used to lift it with both hands.

Simple protectors on the top and bottom right side of the device protect the interface and unit input terminals from sudden physical shocks.

Compared to conventional models 1/2 size When compared to 8861-50

Easy multi-touch

Horizontal and vertical

### Space-saving size

We have achieved a design that is compact while still delivering blazing fast processing speeds by using thermal liquid analysis to optimally position the air inlets, heating components, and cooling fans. The smaller form factor requires less space for installation, making the device just right for tight workspaces.

## Sleek details

HIOKI

Refined attractive shape

Convenient long handle

Robust design

The bevelled chassis edges give the device a compact and sleek look. The left side is slightly curved with slits to match the mesh of the air outlet. The air outlet is therefore in harmony with the design of the flat and solid-looking chassis. The simple and refined appearance achieved by these efforts well suits a device used for R&D purposes.

## **Product Specifications**

	ed for 1 year, Post-adjustment accuracy guaranteed for 1 year) Normal: Regular waveform recording
Recording method	Envelope: Periodically recording maximum and minimum values *Envelope setting not available with external sampling
No. of channels	Analog with up to 32 channels (with 4ch ANALOG UNIT U8975) Logic with up to 128 channels (LOGIC UNIT 8973)
Maximum sampling rate	*Common GND for the logic probe input connector and main unit 200 MS/s (all channels at the same time) (with HIGH SPEED ANALOG UNIT U8976) External sampling (10 MS/s)
Memory capacity	1 G-words
Operating	Indoors, pollution degree 2, altitude up to 2000 m (6562.20 ft)
environment	induors, politition degree 2, alitude up to 2000 m (6562.20 ft)
Operating temperature and humidity range	$0^{\circ}\text{C}$ to $40^{\circ}\text{C}$ (32°F to 104°F), less than 80% RH (no condensation)
Storage temperature and humidity range	-10°C to 50°C (14°F to 122°F), 80% RH or less (no condensation)
Compliance standards	Safety: EN61010, EMC EN61326
Power supply	Rated supply voltage: AC 100 V to 240 V (consider ±10% voltage fluctuations for rated supply voltage)
Max. power	Rated power supply frequency: 50 Hz / 60 Hz Anticipated transient overvoltage: 2500 V
consumption	300 VA
Clock	Auto-calendar, leap-year correcting 24-hour clock
Backup battery life	Approx. 10 years (at 23°C (73°F)) for clock and settings
PC interface (overview) External dimensions	LAN, USB, SD, SATA, monitor 353 mm (13.90 in) W x 235 mm (9.25 in) H x 154.8 mm (6.09 in) D (excluding protrusions)
	6.5 kg (229.3 oz) (main unit only)
Mass	6.7 kg (236.3 oz) (with Z5021, U8332, or U8333 installed) 8.9 kg (313.9 oz) (with HIGH SPEED ANALOG UNIT U8976 installed) Devrement Online Orient Online (Manual (Analysis)) constrained in the Analysis of Section 2014
Accessories	Power cord, Quick Start Manual (booklet), operating precautions (booklet), application disk (CD-R), Instruction Manual (detailed edition) (CD-R), Instruction Manual (calculation edition (CD-R), blank panel (blank slot only)
Accuracy	
Accuracy guarantee conditions	Temperature and humidity range: 23°C ±5°C (73°F ±9°F), 80% RH or less
Time axis accuracy	±0.0005%
Display	
Display type	12.1 inch XGA TFT color LCD (1024 x 768 dots) with capacitive touch screen
LAN Interface Compatibility	
specifications	IEEE 802.3 Ethernet 1000BASE-T, 100BASE-TX, 10BASE-T
Functions	DHCP, DNS, FTP, HTTP, e-mail sending function
Connector USB interface	RJ-45
Compatibility	
specifications	USB 3.0 compliant x 3, USB 2.0 compliant x 4
Host	Connector: Series A receptacle Connected devices: Keyboard, mouse, USB memory stick
Available options	Z4006 USB MEMORY STICK (16 GB)
SD card slot	
Compatibility specifications	Compliant with SD standards x 1 (compatible with SD, SDHC, SDXC memory cards)
Available options	Z4001 SD MEMORY CARD (2 GB), Z4003 SD MEMORY CARD (8 GB)

	Output type	Open drain output (active low, with 5 V voltage output)
	Output voltage	4.0 V to 5.0 V for high level, 0 V to 0.5 V for low level
Trigger output	Maximum input voltage	50 V DC, 50 mA, 200 mW
	Output pulse	Level or pulse selection possible Level: Sampling period x data number after trigger
	width	Pulse: 2 ms ±1 ms
Output terminal for Output signals	1	ion signals Hz ±1% square waves
Functions		9666 100:1 PROBE correction
Dedicated power s	upply terminal	for current sensor
Number of terminals	8	ement (with Z5021 PROBE POWER UNIT installed)
Output voltage	±12 V ±0.5 V DC	
Trigger *Not availab Trigger type	le when the rea Digital comparison	I-time save function is used
Trigger conditions		on for trigger sources and interval trigger
Trigger source	When STÂRT or S "Up to 4 analog 1 "Up to 4 logic tri "Up to 2 analog 1 When START&ST Analog: Up to 16 p Real-time wavefor "Up to 2 trigger Logic trig External trigger	time waveform processing TOP is selected: Up to 32 channels figgers can be set for each analog channel. gers can be set for each chail or probe. Top is selected: Up to 16 channels / group channels / group (Up to 2 channels per unit can be selected.) obes / group (Up to 2 probes per unit can be selected.) tops from each group can be set for each rate of group pyes from each group can be set for each analog channel. ggers from each group can be set for each analog channel. gress from each group can be set for each logic probe. In is activated if all trigger sources are turned off.
	Level trigger	Triggering occurs when the set level rises (falls).
	Voltage drop trigger	Triggering occurs when peak voltage drops below the set level. (For a 50 Hz (60 Hz commercial power supply only) "Disabled when sampling rate is set to 200 MS/s. "Not available with MR890 or ø970 "Not available with envelope setting
	Window trigger	Sets the upper and lower limit for trigger level. Triggering occurs when leaving (OUT) or entering (IN) the area. *Disabled when sampling rate is set to 200 MS/s.
Analog triggers	Period trigger	Sets the period reference value and cycle range. Triggering occurs when the rising (falling) reference value period is measured and determined to be outside or within the cycle range. *Disabled when sampling rate is set to 200 MS/s. *Not available with MR8990 or 8970 *Not available with envelope setting
	Glitch trigger	Sets the reference value and pulse width (glitch width). Triggering occurs if the value is below the set pulse width from rising or falling of the reference value. *Disabled when sampling rate is set to 200 MS/s. *Not available with MR8990 *Not available with envelope setting
	Specifying events	Specifying events (1 to 4000) Counts the number of times conditions were fulfilled for each trigger source. Triggering occurs when the set number of times is reached. *Not available when the trigger conditions are set to AND
Logic trigger	Pattern trigger usin	g 1, 0, or x triggering can be prioritized over all trigger sources.)
Forcible trigger		e at specified measuring intervals (hours, minutes, or seconds)
Interval trigger		ns are fulfilled when the measuring process starts. Afterwards, the trigger at the set measuring intervals. OFF, 10, 20, 50, 100, 150, 200, 250, 500, 1000, 2000, 5000, 10,000
Trigger filter	Normal Envelope	OFF, 1ms, 10 ms
Level setting resolution	1 LSB	
Pre-trigger	0% to 100% (any va pre-trigger	alue set in 1% steps available), displaying the recording time for
Post-trigger	1 00	
	0% to 40%, display	ing the recording time for post-trigger

## Option Specifications (sold separately)

Dimensions/mass: approx. 106 mm (4.17 in) W  $\times$  19.8 mm (0.78 in) H  $\times$ 196.5 mm (7.74 in) D, approx. 280 g (9.9 oz) Accessories: None

HIGH SPEED ANALOG L	JNIT U8976 (Accuracy at 23 ±5°C/73 ±9°F, 20 to 80% RH after 30 minutes of warm-up time and zero adjustment; Accuracy guaranteed for 1 year, Post-adjustment accuracy guaranteed for 1 year)
Measurement functions	No. of channels: 2, for voltage measurement
Input terminals	Isolated BNC connector (input impedance 1 M $\Omega$ , input capacitance 22 pF) Max. rated voltage to ground: 1000 V AC, DC (with input isolated from the unit, the maximum voltage that can be applied between input channel and chassis and between input channels without damage)
Measurement range	100, 200, 400 mV f.s. 1, 2, 4, 10, 20, 40, 100, 200, 400 V f.s., 12 ranges AC voltage for possible measurement/display: 280 V rms Low-pass Filter: 5/500/5 k/1 MHz
Measurement resolution	1/1600 of measurement range (using 12-bit A/D conversion)
Maximum sampling rate	200 MS/s (simultaneous sampling in 2 channels)
Measurement accuracy	±0.5% f.s. (with filter 5 Hz, zero position accuracy included)
Frequency characteristics	DC to 30 MHz -3 dB (with AC coupling: 7 Hz to 30 MHz -3 dB)
Input coupling	AC/DC/GND
Maximum input voltage	400 V DC (with direct input), 1000 V DC (with 9665)

18-10

Accessories: None	
DC/RMS UNIT 8972	(Accuracy at 23 ±5°C/73 ±9°F, 20 to 80% RH after 30 minutes of warm-up time and zero adjustment; Accuracy guaranteed for 1 year, Post-adjustment accuracy guaranteed for 1 year)
Measurement functions	No. of channels: 2, for voltage measurement, DC/RMS selectable
Input terminals	Isolated BNC connector (input impedance 1 M $\Omega$ , input capacitance 30 pF) Max, rated voltage to ground: 300 V AC, DC (with input isolated from the unit, the maximum voltage that can be applied between input channel and chassis and between input channels without damage)
Measurement range	100, 200, 400 mV f.s. 1, 2, 4, 10, 20, 40, 100, 200, 400 V f.s., 12 ranges AC voltage for possible measurement/display: 280 V rms Low-pass filter: 5/50/500/5 k/100 kHz
Measurement resolution	1/2000 of measurement range (using 12-bit A/D conversion)
Maximum sampling rate	1 MS/s (simultaneous sampling in 2 channels)
Measurement accuracy	±0.5% f.s. (with filter 5 Hz, zero position accuracy included)
RMS measurement	RMS accuracy: ±1% f.s. (DC, 30 Hz to 1 kHz) ±3% f.s. (1 kHz to 100 kHz) Response time: SLOW 5 s (rise time from 0 to 90% of full scale), MID 800 ms (rise time from 0 to 90% of full scale), FAST 100 ms (rise time from 0 to 90% of full scale) Crest factor: 2
Frequency characteristics	DC to 400 kHz -3 dB (with AC coupling: 7 Hz to 400 kHz -3 dB)
Input coupling	AC/DC/GND
Maximum input voltage	400 V DC (the maximum voltage that can be applied across input pins without damage)

Dimensions/mass: approx. 106 mm (4.17 in) W × 19.8 mm (0.78 in) H ×

Dimensions/mass: approx. 106 mm (4.17 in) W × 19.8 mm (0.78 in) H × 196.5 mm (7.74 in) D, approx. 250 g (8.8 oz) Accessories: None

ANALOG UNIT 8966	(Accuracy at 23 ±5°C/73 ±9°F, 20 to 80% RH after 30 minutes of warm-up time and zero adjustment; Accuracy guaranteed for 1 year, Post-adjustment accuracy guaranteed for 1 year)
Measurement functions	No. of channels: 2, for voltage measurement
Input terminals	Isolated BNC connector (input impedance 1 M $\Omega$ , input capacitance 30 pF) Max, rated voltage to ground: 300 V AC, DC (with input isolated from the unit, the maximum voltage that can be applied between input channel and chassis and between input channels without damage)
Measurement range	100, 200, 400 mV f.s. 1, 2, 4, 10, 20, 40, 100, 200, 400 V f.s., 12 ranges AC voltage for possible measurement/display: 280 V rms Low-pass filter: 5/50/500/5 k/50 k/500 kHz
Measurement resolution	1/2000 of measurement range (using 12-bit A/D conversion)
Maximum sampling rate	20 MS/s (simultaneous sampling in 2 channels)
Measurement accuracy	±0.5% f.s. (with filter 5 Hz, zero position accuracy included)
Frequency characteristics	DC to 5 MHz -3 dB (with AC coupling: 7 Hz to 5 MHz -3 dB
Input coupling	AC/DC/GND
Maximum input voltage	400 V DC (the maximum voltage that can be applied across input pins without damage)

Dimensions/mass: approx	. 106 mm (4.17 in) W $\times$ 19.8 mm (0.78 in) H $\times$
196.5 mm (7.74 in) D, approx	230 g (8.1 oz)

	Measurement range	Using 9272-10 (20 A), CT6841: 2 A to 100 A f.s., 6 ranges Using CT6862: 4 A to 200 A f.s., 6 ranges Using 9272-10 (200 A), CT6843, CT6863: 20 A to 1000 A f.s., 6 ranges Using CT6844, CT6845, 9709, CT6846*1, CT6865*1: 40 A to 2000 A f.s., 6 ranges *1: The conversion ratio needs to be set to 2 for scaling.
	Measurement accuracy (with 5 Hz filter ON) Note: Add the accuracy and attributes of the current sensor being used.	±0.65% f.s. RMS accuracy: ±1% f.s. (DC, 30 Hz to 1 kHz), ±3% f.s. (1 kHz to 10 kHz) RMS response time: 100 ms (rise time from 0 to 90% of full scale) Crest factor: 2 Frequency characteristics: DC to 100 kHz ±3 dB (with AC coupling: 7 Hz to 10 kHz)
	Measurement resolution	1/2000 of measurement range (using 12-bit A/D conversion)
	Maximum sampling rate	1 MS/s (simultaneous sampling in 2 channels)
	Other functions	Input coupling: AC/DC/GND, Low-pass filter: 5/50/500/5 k/50 kHz

Measurement mode	P9000-01: For waveform monitor output, Frequency characteristics: DC to 100 kHz -3 dB P9000-02: Switches between waveform monitor output/AC effective value output Wave mode frequency characteristics: DC to 100 kHz -3 dB, RMS mode frequency characteristics: 30 Hz to 10 kHz, Response time: Rise 300 ms, Fall 600 ms
Division ratio	1000:1, 100: 1 switchable
DC output accuracy	±0.5% f.s. (f.s. = 1.0 V, division ratio 1000:1), (f.s. = 3.5 V, division ratio 100:1)
Effective value measurement accuracy	$\pm1\%$ f.s. (30 Hz to less than 1 kHz, sine wave), $\pm3\%$ f.s. (1 kHz to 10 kHz, sine wave)
Input impedance/ capacitance	H-L: 10.5 MΩ, 5 pF or less (at 100 kHz)
Maximum input voltage	1000 V AC, DC
Max. rated voltage to ground	1000 V AC, DC (CAT III)
Operating temperature range	-40°C to 80°C (-40°F to 176°F)
Power supply	<ol> <li>AC ADAPTER Z1008 (100 to 240 V AC, 50/60 Hz), 6 VA (including AC adapter), 0.9 VA (main unit only)</li> <li>USB bus power (5 V DC, USB micro-B connector), 0.8 VA</li> <li>External power source 2.7 V to 15 V DC, 1 VA</li> </ol>
Accessories	Instruction manual ×1, Alligator clip ×2, Carrying case ×1

ood for 1 v

Dimensions/mass: approx. 106 mm (4.17 in) W × 19.8 mm (0.78 in) H × 204.5 mm (8.05 in) D, approx. 240 g (8.5 oz) Accessories: Ferrite clamp x 2			
TEMP UNIT 8967 (Accuracy at 23 ±5°C/73 ±9°F; 20 to 80% RH after 30 minutes of warm-up time and za adjustment; Accuracy guaranteed for 1 year, Post-adjustment accuracy guaranteed			
Measurement functions	No. of channels: 2, for temperature measurement with thermocouple (voltage measurement not available)		
Input terminals	Thermocouple input: Push-button terminal block, Recommended wire diameter: single-wire 0.14 to 1.5 mm <sup>2</sup> / braided wire 0.14 to 1.0 mm <sup>2</sup> (conductor wire diameter $\phi$ 0.18 mm or more), AWG 26 to 16 Input impedance: min. 5 M $\Omega$ (with line fault detection ON/OFF) Max. rated voltage to ground: 300 V AC, DC (with input isolated from the unit, the maximum voltage that can be applied between input channel and chassis and between input channels without damage)		
Temperature measurement range Note: Upper and lower limit values depend on the thermocouple	200°C (392°F) f.s. (-100°C to 200°C (-148°F to 392°F)), 1000°C (1832°F) f.s. (-200°C to 1000°C (-328°F to 1833°F)), 2000°C (3632°F) f.s. (-200°C to 2000°C (-328°F to 3632°F)), 3 ranges Measurement resolution: 1/20,000 of measurement range (using 16-bit A/D conversion)		
Thermocouple range (JIS C 1602-1995) (ASTM E-988-96)	K: -200°C to 1350°C (-328°F to 2462°F), F: -200°C to 1100°C (-328°F to 2012°F), E: -200°C to 800°C (-328°F to 1472°F), T: -200°C to 400°C (-328°F to 752°F), N: -200°C to 1300°C (-328°F to 2372°F), R: 0°C to 1700°C (-32°F to 3092°F), S: 0°C to 1700°C (-32°F to 3092°F), B: 400°C to 1800°C (-752°F to 3272°F), W (Re5-26): to 2000°C (-32°F to 3632°F) Reference junction compensation: internal/external (switchable), line fault detection 0N/OFF possible		
Data refresh rate	3 methods, Fast: 1.2 ms (digital filter OFF), Normal: 100 ms (digital filter 50/60 Hz), Slow: 500 ms (digital filter 10 Hz)		
Measurement accuracy	$\label{eq:constraints} \begin{array}{l} Thermocouple K, J, E, T, N: \pm 0.1\% f.s. \pm 1°C (\pm 1.8°F), (\pm 0.1\% f.s. \pm 2°C (\pm 3.6°F) \\ at -200°C to 0°C (-328°F to 32°F)) \\ Thermocouple R, S, B, W: \pm 0.1\% f.s. \pm 3.5°C (\pm 6.3°F)(at 0°C (32°F) to less than \\ 400°C (752°F); However, no accuracy guarantee at less than 400°C (752°F) for \\ B), \pm 0.1\% f.s. \pm 3°C (\pm 3.4°F) (at 400°C (752°F) or more) \\ Reference junction compensation [RJC] accuracy: \pm 1.5°C (\pm 2.7°F) (added to measurement accuracy with internal reference junction compensation) \end{array}$		

Dimensions/mass: approx. 106 mm (4.17 in) W  $\times$  19.8 mm (0.78 in) H  $\times$  196.5 mm (7.74 in) D, approx. 250 g (8.8 oz) Accessories: None

Accessories. None	
FREQ UNIT 8970	(Accuracy at 23 ±5°C/73 ±9°F, 20 to 80 % RH after 30 minutes of warm-up time; Accuracy guaranteed for 1 year, Post-adjustment accuracy guaranteed for 1 year)
Measurement functions	No. of channels: 2, for voltage input based frequency measurement, rotation, power frequency, integration, pulse duty ratio, pulse width
Input terminals	Isolated BNC connector (input impedance 1 M $\Omega$ , input capacitance 30 pF), Max, rated voltage to ground: 300 V AC, DC (with input isolated from the unit, the maximum voltage that can be applied between input channel and chassis and between input channels without damage)
Frequency mode	Measurement range: Between DC to 100 kHz (minimum pulse width 2 µs), 20 Hz to 100 kHz f.s., 8 ranges Accuracy: ±0.1% f.s. (exclude 100 kHz range), ±0.7% f.s. (100 kHz range)
Rotation mode	Measurement range: Between 0 to 2 million rotations/minute (minimum pulse width 2µ3, 2 kr/min to 2 Mr/min f.s, 7 ranges Accuracy: ±0.1% f.s. (exclude 2 Mr/min range), ±0.7% f.s. (2 Mr/min range)
Power frequency mode	Measurement range: 50 Hz (40 to 60 Hz), 60 Hz (50 to 70 Hz), 400 Hz (390 to 410 Hz), 3 ranges Accuracy: ±0.03 Hz (50, 60 Hz), ±0.1 Hz (400 Hz range)
Integration mode	Measurement range: 40 k-counts f.s. to 20 M-counts f.s. 6 ranges Accuracy: ±0.0025% f.s.
Duty ratio mode	Measurement range: Between 10 Hz to 100 kHz (minimum pulse width 2 µs), 100% f.s. Accuracy: ±1% (10 Hz to 10 kHz), ±4% (10 kHz to 100 kHz)
Pulse width mode	Measurement range: Between 2 µs to 2 s, 10 ms to 2 s f.s. Accuracy: ±0.1% f.s.
Measurement resolution	0.0025% f.s. (Integration mode), 0.01% f.s. (exclude integration, power frequency mode), 0.01 Hz (power frequency mode)
Input voltage range and threshold level	$\pm 10$ V to $\pm 400$ V, 6 ranges, selectable threshold level at each range
Other functions	Slope, Level, Hold, Smoothing, Low-pass filter, Switchable DC/AC input coupling, Frequency dividing, Integration over-range keep/return

Dimensions/mass: approx. 106 mm (4.17 in) W  $\times$  19.8 mm (0.78 in) H  $\times$  196.5 mm (7.74 in) D, approx. 190 g (6.7 oz) Accessories: None

LOGIC UNIT 8973	
Measurement functions	No. of channels: 16 channels (4 ch/1 probe connector × 4 connectors)
Input terminals	Mini DIN connector (for HIOKI logic probes only) Compatible logic probes: 9320-01, 9327, MR9321-01

Cable length and mass: Main unit cable 1.3 m (4.27 ft), input section
cable 46 cm (1.51 ft), approx. 350 g (12.3 oz)

DIFFERENTIAL PRO	DBE 9322 (Accuracy guaranteed for 1 year)		
Functions	For high-voltage floating measurement, power line surge noise detection, RMS rectified output measurement		
DC mode	For waveform monitor output, Frequency characteristics: DC to 10 MHz (±3 dB), Amplitude accuracy: ±1% f.s. (1000 V DC or less), ±3% f.s. (2000 V DC or less) (f.s. = 2000 V DC)		
AC mode	For detection of power line surge noise, Frequency characteristics: 1 kHz to $10 \text{ MHz} \pm 3 \text{ dB}$		
RMS mode	DC/AC voltage RMS output detection, Frequency characteristics: DC, 40 Hz to 100 kHz, Response speed: 200 ms or less (400 V AC), Accuracy: ±1% f.s. (DC, 40 Hz to 1 kHz), ±4% f.s. (1 kHz to 100 kHz) (f.s. = 1000 V AC)		
Input	Input type: balanced differential input, Input impedance/capacitance: H-L 9 M $\Omega$ /10 pF, H/L-unit 4.5 M $\Omega$ /20 pF, Max. rated voltage to ground: when using grabber clip: 1500 V AC/DC (CAT II), 600 V AC/DC (CAT III), when using alligator clip: 1000 V AC/DC (CAT III), 600 V AC/DC (CAT III)		
Maximum input voltage	2000 V DC, 1000 V AC (CAT II), 600 V AC/DC (CAT III)		
Output	Voltage divider for 1/1000 of input, BNC connectors (output switchable for 3 modes DC, AC, RMS)		
Power supply	Any of the following: (1) supply from the AC ADAPTER 9418-15, (2) supply from the PROBE POWER UNIT Z5021 via the POWER CORD 9248		

Cable length and mass: Main unit cable 1.5 m (4.92 ft), input section cable 30 cm (0.98 ft), approx. 150 g (5.3 oz) Note: The unit-side plug of the 9320-01 and 9327 is different from that of the 9320.

LOGIC PROBE 9320-01/9327		
Functions	Detection of voltage signal or relay contact signal for High/Low state recording	
	4 channels (common ground between unit and channels), digital/contact input,	
Input	switchable (contact input can detect open-collector signals)	
	Input impedance: 1 MΩ (with digital input, 0 to +5 V)	
	500 k $\Omega$ or higher (with digital input, +5 to +50 V)	
	Pull-up resistance: 2 k $\Omega$ (contact input: internally pulled up to +5 V)	
Digital input threshold	1.4 V/ 2.5 V/ 4.0 V	
Contact input	1.4 V: 1.5 kΩ or higher (open) and 500 Ω or lower (short)	
Contact input detection resistance	2.5 V: 3.5 k $\Omega$ or higher (open) and 1.5 k $\Omega$ or lower (short)	
	4.0 V: 25 k $\Omega$ or higher (open) and 8 k $\Omega$ or lower (short)	
Response speed	9320-01: 500 ns or lower, 9327: detectable pulse width 100 ns or higher	
Maximum input valtage	0 to +50 V DC (the maximum voltage that can be applied across input pins without	
Maximum input voltage	damage)	

Cable length and mass: Main unit cable 1.5 m (4.92 ft), input section cable 1 m (3.28 ft), approx. 320 g (11.3 oz) Note: The unit-side plug of the MR9321-01 is different from that of the MR9321.

#### LOGIC PROBE MR9321-01 Detection of AC or DC relay drive signal for High/Low state recording Functions Can also be used for power line interruption detection 4 channels (isolated between unit and channels), HIGH/LOW range switching Input Input impedance: 100 k $\Omega$ or higher (HIGH range), 30 k $\Omega$ or higher (LOW range) 170 to 250 V AC, ±DC 70 to 250 V (HIGH range) Output (H) detection 60 to 150 V AC, ±DC 20 to 150 V (LOW range) 0 to 30 V AC, ±DC 0 to 43 V (HIGH range) Output (L) detection 0 to 10 V AC, ±DC 0 to 15 V (LOW range) Rising edge 1 ms max., falling edge 3 ms max. (with HIGH range at 200 V DC, LOW Response time range at 100 V DC) 250 V rms (HIGH range), 150 V rms (LOW range) (the maximum voltage that can be Maximum input voltage applied across input pins without damage)

#### System Chart of Options

## R&D Tests and Critical Analyses Meeting the High Demands of a Broad Range of Industries

## High-speed 200 MS/s measurement of inverter waveforms

Perform high-speed isolated recording across 16 channels at 200 MS/s by installing 8 units of U8976.

MEMORY HICORDER	MR6000	1 unit
HIGH SPEED ANALOG UNIT	U8976	8
10:1 PROBE	9665	16

#### Multi-channel measurement for ECU development

Perform multi-channel recording across 32 channels at 5 MS/s by installing 8 units of U8975.

MEMORY HICORDER	MR6000	1 unit
4ch ANALOG UNIT	U8975	8
CONNECTION CORD	L9790	32
ALLIGATOR CLIP	L9790-01	32

Perform mixed multi-channel measurements across 16 analog and 64 logic channels by installing 4 units of U8975 and 4 units of 8973.

MEMORY HICORDER	MR6000	1 unit
4ch ANALOG UNIT	U8975	4
CONNECTION CORD	L9790	16
ALLIGATOR CLIP	L9790-01	16
LOGIC UNIT	8973	4
LOGIC PROBE	9327	16

#### Remove harmonic noise

The MR6000-01 comes with a digital filter calculation function that removes specific frequency noise from measurement data.

MEMORY HICORDER	MR6000-01	1 unit
ANALOG UNIT	8966	8
CONNECTION CORD	L9790	16
ALLIGATOR CLIP	L9790-01	16
