

Complete Unified Communications Solution for Small or “Huddle” Type Meeting Rooms

Image: HuddleSTATION Sound Bar and Wide-Angle HD Camera Module (above) and MicPOD Dock (below)

Part Numbers:

999-8910-000 North America, 999-8910-001 International

The Vaddio™ HuddleSTATION was designed with the small working conference room in mind. It's a complete Unified Communications (UC) solution incorporating all the audio & video functions for the small group collaboration in a small meeting room. To say the HuddleSTATION is multipurpose is like calling a fish wet. This system can be used for local presentations, PC-based UC applications (i.e. Lync®, Jabber®, Skype®, WebEx® etc...), VoIP audio conferencing, voice add-on and more.

The HuddleStation is made up of a table-based MicDock and a wall mounted HuddleSTATION Sound Bar Camera module. The MicDock contains the mics, the user interface, and the docking connectors for the PC and UC application. Four (4) cardioid mic elements each with independent wideband AECs (acoustic echo cancellers), provides a 360° pickup pattern. Vaddio's SmartMic technology ensures that pristine, crystal clear audio is maintained for both local and far-end participants with hands-free operation. A capacitive-touch user interface on the MicPOD Dock provides for dialing and conference control. PC, laptop or tablet connections include HDMI or VGA (RGBHV) to locally extend the PC's display to the room monitor.

The HuddleSTATION sound bar incorporates a pair of bi-amped, 2-way loudspeakers, four (4) 25-Watt amplifiers and an integrated native HD camera. Like the WideSHOT™ camera, the HuddleSTATION camera has a super wide-angle lens providing greater than 82° horizontal field of view (16:9) for even the smallest of rooms. It has a manual pan/tilt mechanism and a 3X varifocal zoom lens that further tailors the image for the small room. The HuddleSTATION also includes an HDMI output for the room LCD monitor extending the PC's monitor when docked. A supplied single Cat-6 SSTP shielded cable (25-feet) connects the HuddleSTATION with the MicPOD Dock carrying power, video, audio, control and network. A premium wall mounting system with integrated cable tray and 4-in-1 Dock/PC Interface Cable (with HDMI/RGBHV/USB2.0/Network) are available as accessories.

SYSTEM INCLUDES

The Vaddio HuddleSTATION System includes

- One (1) HuddleSTATION MicPOD Dock
- One (1) HuddleStation Sound Bar and HD Camera Wall Unit
- One (1) 25' (7.62m) Cat-6SSTP Shielded Cable
- One (1) 24 VDC 3.0 A Power Supply
- One (1) Manual/Documentation
- Accessory Wall Mount and Dock Interface Cable available as options in Basic System, Deluxe System and Premier System Packages

GENERAL SPECIFICATIONS

HuddleSTATION Camera/Sound Bar	HD Camera with 3.3mm-10.5mm Varifocal Zoom lens, Manual Pan/Tilt, 1/3" CMOS Sensor, 1.3MP	HuddleSTATION Mic Dock	Dialing Pad, Volume Control, Mute, Power On/Off (Stand-by) and ON Screen Display of user controls (for dialing support)
Minimum Illumination	0.1 LUX (1/30 shutter speed)	Microphones	Four (4) Cardioid Elements with Independent AECs, 360 ° pickup
Horiz. Viewing Angle	82.2° Wide Angle Horizontal Field of View (16:9)	USB Interface	Connector: USB Micro-B, USB 2.0 UVC and UAC Compliant
Speakers	1-Pair Bi-amped 2-way Speakers	Video Inputs	HDMI Video Input and DE-15 Input for RGBHV (switchable)
VoIP	SIP User Agent (OSD for Dialing)	Network Interface	Connector: RJ-45, 10/100 Base-T, RTSP & HLS Supported
Inputs/Outputs	Power Jack (coaxial 5.5mm x 2.5mm), RJ-45 for Cat-6e Shielded LINK Cable, HDMI Out to Monitor, Network RJ-45 Connection (LAN/WAN)	Supported UC Video Clients	Skype, Cisco Jabber, Adobe Connect 8, Microsoft Lync, WebEx, Citrix GoToMeeting, LifeSize ClearSea, Polycom M100, Vidyio, Google Plus (see FAQ for more options)
Optional Accessory	999-8901-000 Premium Wall Mount with Cable Tray	Opt. Accessory	999-8902-000 Premium Dock/PC Interface Cable
