IN3138HD Lamp Module Replacement Instructions: SP-LAMP-088
NOTES:

Always use the InFocus lamp module designed for your projector model. Using the wrong lamp module may cause premature lamp failure and possible damage to the projector.

You can order new lamps from www.infocus.com (in select areas), your retailer or your dealer. **Only genuine InFocus lamps are tested for use in this projector.** Use of non InFocus lamps may cause electrical shock and fire, and may void the projector warranty. InFocus is not liable for the performance, safety or certification of any other lamps.
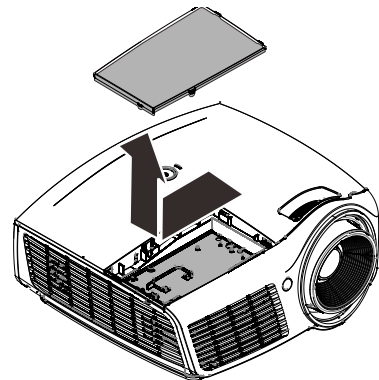

WARNINGS:

- The projector uses a high-pressure mercury glass lamp. The lamp may fail prematurely, or it may rupture with a popping sound if jolted, scratched, or handled while hot. The risk of lamp failure or rupture also increases as the lamp age increases; please replace the lamp when you see the "Replace Lamp" message.
- To avoid burns, allow the projector to cool for at least 60 minutes before you replace the lamp.
- Unplug the power cord before replacing the lamp.
- Do not drop the lamp module. The glass may shatter and cause injury.
- Do not touch the glass surface of the lamp module. Fingerprints can obscure projection sharpness and may cause the glass to shatter.
- Be extremely careful when removing the lamp module. In the unlikely event that the lamp ruptures, small glass fragments may be generated. The lamp module is designed to contain most of these fragments, but use caution when removing it.
- Before replacing a ruptured lamp, clean the lamp compartment and dispose of cleaning materials. Wash hands after lamp replacement.
- When replacing the lamp while the projector is ceiling-mounted, wear protective eyewear to prevent eye injury.
- Hg-Lamp contains mercury. Manage with accordance with local disposal laws. See **www.lamprecycle.org**

1) Loosen the single screw on the lamp compartment cover.

2) Remove the lamp compartment cover.

3) Remove the three screws from the lamp module.

4) Lift the module handle up.

5) Pull firmly on the module handle to remove the lamp module.

6) Reverse steps 1 to 5 to install the new lamp module. While installing, align the lamp module with the connector and ensure it is level to avoid damage.
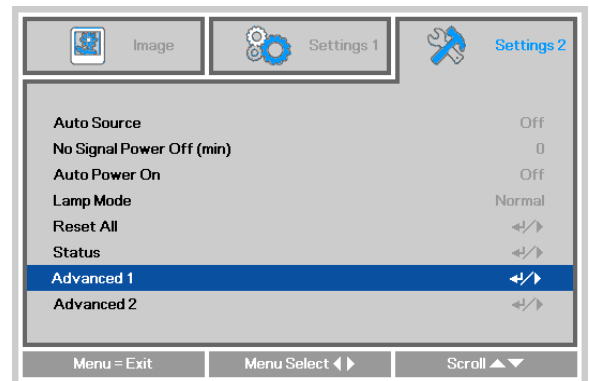

Note:
The lamp module must sit securely in place and the lamp connector must be connected properly before tightening the screws.
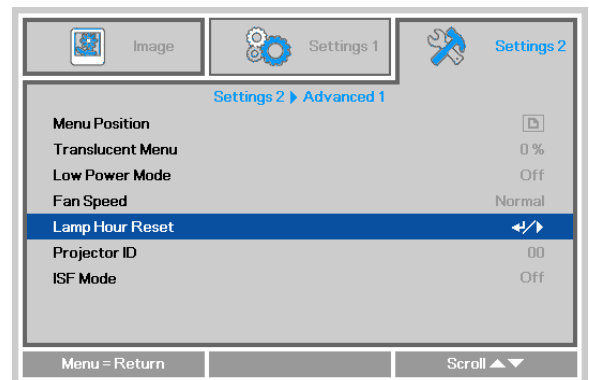

7) To reset the lamp timer: Press the **MENU** button to open the OSD menu.

8) Press the ◄► buttons to move to the **Settings 2** menu. Press the ▼ button to move down to **Advanced 1** and press enter.
