**IR PATROL™**

640x480 THERMAL MONOCULAR

## IR PATROL... Changing the Rules...

"Excellence in innovation" would be the best term to describe the new IR patrol thermal monocular. The IR PATROL monocular features an advanced user interface with a military grade, five position thumb stick that is the perfect size. The monocular's ergonomic design provides users optimum functionality. The menu system is engineered to be intuitive and efficient to use.

# IR PATROL M250

Actual Image Taken with PVS-14 3rd Gen

Actual Image Taken with IR PATROL M250

**IR PATROL™**

## IR PATROL™ IN USE.....

As seen in the images above the IR Defense thermal systems are outperforming Night Vision on even a full moon night. Because of this high resolution thermal imagery is an absolute necessity for law enforcement. At the heart of the IR PATROL monocular is a twelve micron, 640x480 resolution BAE thermal core. Images taken by the core are displayed on an integrated super contrast OLED display. This advanced technology provides military and law enforcement officers one of the best images available in a hand held thermal device.

# IR PATROL M300W

## IR PATROL™ M300W

The M300W takes the IR PATROL platform to a new level with the implementation of the weapon sighting mode. This allows the system to turn into a dedicated thermal weapon sight that is ideal for mounting on M4 style rifle. If you already have a day optic sighted in the M300W should be able to be placed in front and used as a Clip-On device.

**ADVANCED THERMAL MONOCULAR**

**FULLY DIGITAL ARCHITECTURE**

*We went the extra mile to make the IR PATROL the highest quality system at an affordable price. Our goals were to make the perfect mix of technology, ergonomics, tactical design and high performance of which we believe we have surpassed. The system with all its advanced capabilities and accessories will fit your budget and your requirements.*

# IR PATROL™

## 640x480 THERMAL MONOCULAR

**IR PATROL SYSTEM SPECIFICATIONS**

Sensor Type	BAE Uncooled VOx LWIR
Thermal Sensitivity	<50mk
Sensor Resolution	640 x 480
Sensor Pitch	12um (micron)
Frame Rate	60hz M250 M300W / 30hz LE100 LE100C
Spectral Responce	8 - 12um
Display	Monochrome Emagin OLED 640x480
Basic Features	E-Zoom, Polarity, DFC
Advanced Features	DCE - Edge Detection Mode
Start Up Time	>4 Seconds
Battery Type	1 each CR123 / 2 each with Adapter
Battery Life	1 each - 2.5 Hours @ 30hz / 2 each - 4 Hours @ 30hz
Weight	454g
Dimensions	5.95" L x 2.0" H x 2.95" W LE100/LE100C
Diopter	-6 / +4
Eye Relief	27mm
Environmental	-40c to +55c Operating / -45c to +75c Storage
Video Output	Analog RS-170 (with Optional Cable)

**HAND HELD SYSTEM**  
**LE100**

**PERFORMANCE - RESOLUTION - DETECTION**

The IR PATROL has the highest performance thermal core, along with the leading 640x480 VGA OLED Micro Display, together these two features provide the user optimal detection capabilities. All IR PATROL systems are made to superior quality and stringent US standards and are 100% made in the USA. Bottom line creating American jobs.

**TACTICAL SYSTEM**  
**M250**

Modular by Design.....

*The M250 and M300W systems come with an integrated Wilcox shoe interface, permitting use with numerous Wilcox mounting solutions. Helmet mounted with a Wilcox G24 mount the IR patrol provides a tactical advantage for both law enforcement and military users.*

**WEAPON SYSTEM**  
**M300W**

The IR PATROL™ M300W is a mini weapon mountable system that works as a dedicated or Clip-On thermal weapon sight. When the monocular is not in use, the Wilcox Side-Flip Mount conveniently flips the monocular out of the way to not obstruct your day sight.

**L1 OPERATING SYSTEM Level 1**  
Basic Functions and Controls

**POLARITY** - Controls the MaxPol feature for 3 white hot and 3 black hot polarity modes. In the M250 and M300W it also has the Edge Detect.

**E-ZOOM** - Turns on the digital zoom function enabling digital magnification of 2x, 4x and 8x. Each increase in Electronic Zoom reduces the system resolution.

**BRIGHTNESS** - Controls the brightness level of the display.

**DFC** - Sets the Digital Focus Control which will soften or sharpen the image. This feature pulls details out in the image but too much DFC can also increase the noise levels of the image.

**DCE** - Controls the Digital Contrast Enhancement feature which is used with the DFC to help improve the image quality. This feature when used will make the black and white stand out more.

**NUC** - When selected it will apply a "NUC" or Non-Uniformity Calibration to improve the image quality.

## L2 OPERATING SYSTEM Level 2 Image Capture Controls

**CAPTURE IMAGE** - When selected it will allow an image to be captured with the thumb stick controller. Up to 99 images can be captured and saved before the memory is used.

**REVIEW IMAGES** - When this mode is active the user can scroll through the saved images to view them. The user also can apply the Maxpol, DFC and DCE features to any saved image.

**DELETE IMAGES** - Activating the Delete images will only erase all stored images. The only way to erase individual images is with the PC Software and the download cable.

**DOWNLOAD MODE** - The IR PATROL images are set to the systems current settings when they are downloaded. This feature sets the system to a factory optimized setting for image download.

## L3 OPERATING SYSTEM Level 3 Configuration Settings

**FRAME RATE** - Controls the Frame Rate setting to select 60hz or 30hz power save mode. This is only available in the M250 and M300W, the LE100 and LE100C only are available in 30hz.

**VIDEO OUTPUT** - Turns on the video output signal so that a video output cable can be connected.

**START-UP SETTINGS** - Lets the user decide if the system is to recall the last settings or if it comes on as factory default on power up.

**SLEEP MODE** - This setting lets the user select how many seconds until the icons disappear on the display. 8, 15 and "OFF" are the selections.

**AUTO DIMMER** - Sets the auto dimming feature on the display to slowly decrease the brightness level over 30 minutes to limit eye fatigue.

**ICON FLIP** - When selected it will invert all of the icons on the display so that the unit can be used upside down.

## L4 OPERATING SYSTEM Level 4 Weapon Sight Controls

**SIGHTING MODE** - This setting changes the system from a Monocular/Viewer to a weapon sight. This setting has four positions that are for Viewer, Reticle (dedicated mode) or Clip-On and Zoom Center for Clip-on alignment.

**RETICLE LOCK** - Needs to be selected in order to unlock the reticle to adjust zero. This is used as a safety device so that the zero position is not adjusted accidentally.

**ELEVATION ZERO** - When active it will allow the user to zero the scope with the thumb controller moving the reticle up and down.

**WINDAGE ZERO** - When active it will allow the user to zero the scope with the thumb controller moving the reticle left and right.

## IR PATROL™ **LE100** HAND-HELD MODEL

- 640x480 High Performance
- Advanced Thumb Stick Controller
- Ruggedized System Design
- Full Digital Display

Optional 2X and 3X Magnifiers

THERMAL WEAPON SIGHT

IR HUNTER... MULTI USE SIGHT...

The IR HUNTER MK2 and new IR HUNTER MK3 are both designed and built to be the perfect dedicated thermal weapon sights. They can also be used in various other applications such as a clip-on sight, hand-held system or even a forward observation device. Now that's a flexible system...

# IR HUNTER MK2

## IR HUNTER™ IN USE.....

The IR Hunter MK2 is high resolution thermal weapon sight that is powered by the MicroIR thermal core from BAE. The core features a 12 micron, 640x480 sensor that is matched pixel to pixel with a Emagin OLED display giving it the best image possible. As seen above that even when the image is enlarged it still remains clear with clarity and detail that enables identification.

**IR HUNTER™ MARK II**  
THERMAL WEAPON SIGHT

# IR HUNTER MK3

2 METER SCALE

100 METERS

IR HUNTER™ MARK III

## IR HUNTER™ MARK III

The new IR HUNTER MK3 combines the high performance and features of the IR HUNTER MK2 with the addition of an advanced ballistic feature set which intergrates a stadiametric Range Finder, advanced reticle features, and a Dual LaRue Throw Lever Mount. All these new features make MK3 the most lethal thermal weapon sight on the market.

# IR HUNTER™ SERIES

**STANDARD SYSTEMS**

**PERFORMANCE - PRECISION - PERFECTION**

The IR HUNTER combines the performance of a military thermal sight with the precision of a high end rifle scope. Never before has there been a thermal sight that is so easy and intuitive to use with so many options and features. The best way for us to show you how good the IR HUNTER works is to put it next to the competition.

**TACTICAL SYSTEMS**

**Tactical by Design.....**

*Engineered to be balanced on your weapon system this state of the art Thermal Sighting platform is ready to rock. From its unmatched image to the tactical turret knobs this is the one. A truly affordable, precision optical device that operates 24-7 all year round.*

**CLIP-ON SYSTEMS**

The IR HUNTER™ is not just your everyday thermal sight, it can easily convert into a Clip-On thermal sight.

- Built-In Alignment Software
- Operation is Simple
- Easy to Switch Modes
- Best of Both Worlds
- Ask about recommended optics

# INTELLIGENT RETICLES

The IR Hunter uses its processing power to deliver precision sighting reticles.

MOA Calibrated

Works the Same as First Focal Plane

Selectable Reticles

Intelligent Auto-Contrast

## LEARN MORE - HD Looking Reticles

We generate our reticles so that they are 1:1 to the pixels in the display so our reticles are ultra crisp and detailed. Many companies generate the reticles using the processor of the thermal engine and you will notice that when the image is sent to the display it is not a 1:1 pixel ration so the reticles will appear blurred.

## OUR WEAPON RECOIL MACHINE

Model No.	Lens Size	Zoom Level	Sensor	Field of View	Pixel Per MOA	MOA Per Pixel
IRHM2-640-19	19mm	1x	640x480	22.4°	0.5	2.1
IRHM2-640-35	35mm	2x	640x480	6.2°	1.7	0.6
IRHM3-640-35	35mm	2x	640x480	6.2°	1.7	0.6

1X ZOOM

2X ZOOM

4X ZOOM

**TSR - THERMAL SUBTENSION RETICLE**

For shooting at extended distances the TSR reticle provides some basic ranging data for the user. The width for each of the elevation marks is based at 36" wide for the distance readout in yards to the right of the mark. As you zoom in the reticle works the same as a first focal plane sight where the reticle scales as you zoom. It is just that easy.

RETICLE SUBTENSIONS

1X ZOOM

2X ZOOM

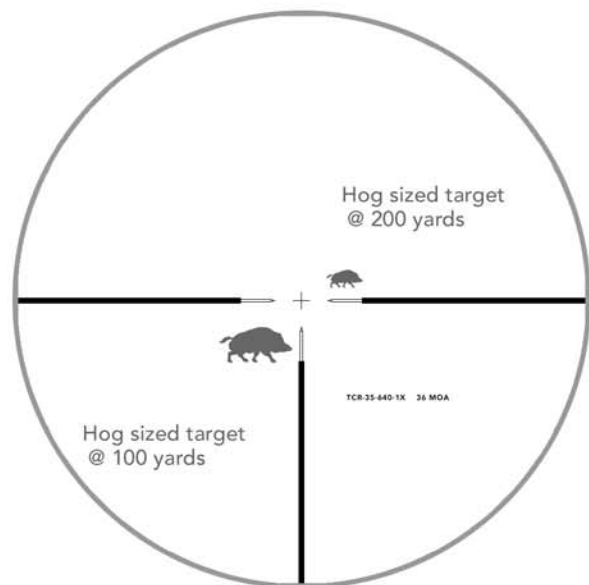

4X ZOOM

### TCR - THERMAL COMBAT RETICLE

One of the easiest reticles to use is our TCR Thermal Combat Reticle that is a simple crosshair in the center. The width of the crosshair is always 36 MOA or 36" at 100 yards. Half of the crosshair is 18 MOA which is the width of a man at 100 yards. If a man sized target is the height of the crosshair then he will be 200 yards out. As you zoom the reticle also zooms so you are always 36 MOA.

### RETICLE SUBTENSIONS

**TDR - THERMAL DOT RETICLE**

The IR HUNTER along with other thermal weapon sights is primarily used at night and with lower magnifications than standard day optics. Because of this the engagement ranges at night are much shorter. To deal with this the IR HUNTER uses a DOT reticle system similar to the Mil DOT but instead of each dot representing 1000:1 our system is calibrated at 100:1, so the distance between dots is 100 yards.

Please Note - All Images are 100% taken with the IR Hunter System and are actual images.

# THERMAL SENSOR

The eye of the IR PATROL using military technology to detect the slightest temperature difference.

The IR Patrol™ utilizes the MicroIR thermal core from BAE Systems. Featuring a 12um (Micron) detector, the core delivers high performance, clean 640x480 imagery at an outstanding 60hz frame rate.

12um MICRON

LWIR (Long Wave Infra-Red)

Uncooled Technology

\*60hz High Speed Frame Rate

VOx (Vanadium Oxide)

High Sensitivity

Miniaturized Circuitry

Longer Battery Life

Integral Heat Sync

For Thermal Stability

\*M250 and M300W only - the LE100 and LE100C are only 30hz.

Sensor	Type	Spectral Band	Native Resolution	Micron Pitch	Sensitivity
640x480 MicroIR	VOx	7.5 - 13.5 μm	640 x 480 pixels	12 μm	<50 mK at f/1.0

MICRO DISPLAY

IDENTIFY.... DETECT....

The IR Patrol™ offers unsurpassed image clarity and detail because of its 1:1 pixel to pixel ratio (sensor to display). Many thermal systems on the market upscale or downscale their imagery, and in the process, lose detail.

Actual Image taken with IR PATROL at night.

Display	Display Type	Resolution	Color	Gray Levels	Contrast	Rate	Pitch
EMAGIN	OLED	VGA 640x480	30 Bit	256	10,000:1	60hz	15 μm

## MICRON PITCH

### Advanced Technology

Most thermal sights on the market today feature 17 micron cores and 5 years ago 25 micron was the standard. We are focused on tomorrow bringing you 12 micron core technology.

What this means is that you get more magnification using the same identical lens, about 50% more. To prove this we took a 35mm lens and attached it to 12, 17 and 25 micron cores providing the images below to show you exactly the difference between the different technologies and just what Micron Pitch can do for you.

## ETR ENHANCED TARGET RECOGNITION

### INCREASED TARGETING

Enhanced Target Recognition is a capital feature of the IR HUNTER! While using other thermal scopes, important imagery is often washed out against the sky and horizon even with the use of frequent recalibrations. The IR HUNTERs ETR focuses it's processing power on your target, resulting with enhanced precisely detailed target images. This mean more hits for the shooter.

### LEARN MORE - ETR

Scene wash out occurs when the horizon has a lot of sky behind the target resulting in a large difference in temperature. The thermal system has to divide this difference into shades of gray and there are only so many available. The ETR tells the sensor to perform its auto calibration within the brackets which will have a smaller temperature difference giving you more detail on the target area.

## E-ZOOM DIGITAL MAGNIFICATION

### DIGITAL ZOOM

The ability to effectively and efficiently zoom in and out is a very beneficial feature and with the turrets that are built into the IR HUNTER you will find that there is not a better way to perform these functions at night in the dark. Buttons are difficult to navigate but our turret knobs are instinctively easy to operate.

### FIRST FOCAL PLANE

In order for our reticles to be accurate, the size of the crosshair needs to equate to something such as the TCR reticle in the images equals 36 MOA. As you use the digital zoom the images size increases along with the reticle. This is identical to a first focal plane rifle scope, now you can use the zoom and use the reticle for ranging. We also have two other reticles such as the TDR Thermal Dot Reticle, which is very similar to a MILDOT pattern.

## MAXPOL MULTI POLARITY CONTROL

### ADVANCED POLARITY MODE

Most thermal sights have one choice for black-hot/white-hot commonly referred to as polarity. The IR Patrol™ has MaxPol technology. Multi-polarity control provides three modes of white and black-hot allowing the user to better bring out the target or the background depending on conditions.

### EDGE DETECT - Not available on LE100 /LE100C models

The seventh mode of polarity is edge detect which allows the user to better identify targets at a distance. Its unique trace-outline image provides additional perspective for any thermal image viewed.

Please Note - All Images are taken with the IR Hunter and IR Patrol Systems and are actual images.

## DFC DIGITAL FOCUS CONTROL

### DIGITAL IMAGE ENHANCEMENT

Providing the user many tools to refine an image was a goal during IR Patrol's design. Digital Focus Control (DCF) is one such tool. DCF control is quick and easy to use. The DCF feature will help the user better define the images viewed through the IR Patrol™.

Please Note - All Images are 100% taken with the IR HUNTER and IR PATROL Systems.

Identifying a target is the most important job of any thermal viewer. The IR Patrol™ finishes the job with DFC Control. This feature takes a great image to the next level. Finer detail, more contrast, and greater depth are simply achieved with a toggle and press of the joystick.

## MAGNIFIER LENSES The IR PATROL can accept these Afocal Magnifier Lenses for increased magnification.

- DLC Hard Carbon Coated
- AR Coated Germanium Lenses
- High Environmental Durability
- Shock resistant
- Easy to Add or Remove

### **Magnification when you need it.**

The standard 1x lens on the IR Patrol™ is optimum for head mounted operation. It provides a wide field of view, increasing awareness and reaction time. With a simple twist of an attachment clamp, the IR Patrol™ quickly becomes a 3x thermal viewer with the capability to provide long range reconnaissance.

 MAN @ 25 Yards  
**2x Magnifier**

With a 2x magnifier,  
 will provide a **11°**  
 field of view image.

**IR PATROL™**  
 640 x 480 Sensor  
 12um MICRON  
 TRUCK @ 75 Yards  
**3x Magnifier**

With a 3x magnifier,  
 will provide a **5.5°**  
 field of view image.

**IR PATROL™**  
 640 x 480 Sensor  
 12um MICRON  
 MAN @ 25 Yards  
**3x Magnifier**

With a 3x magnifier,  
 will provide a **5.5°**  
 field of view image.

## BRIDGES SINGLE AND DUAL BRIDGE ASSEMBLIES by **WILCOX**<sup>®</sup>

### ADVANCED TACTICAL EQUIPMENT

The bridge adaptor provides the operator with a helmet mounted hands free solution, for the IR PATROL. Ideal for surveillance and overwatch situations, this adaptor adds versatility giving the end user an optimal mounting solutions

ITEM	PART NO.	PRICE
SINGLE BRIDGE ASSEMBLY	IRDMNT-9974	\$599.00
DUAL BRIDGE ASSEMBLY	IRDMNT-9975	\$799.00

**DUAL BRIDGE ASSEMBLY**

**SINGLE BRIDGE ASSEMBLY**

## HELMET MOUNTS COMBAT TYPE MOUNTS by **WILCOX**<sup>®</sup>

### ADVANCED TACTICAL EQUIPMENT

The Wilcox L4 G41 Low Profile Breakaway Mount allows firm attachment of a variety of NVGs to MICH/ACH and ECH helmets using a one or three-hole Hybrid Shroud. This NVG mounting system allows the mount to “break-away” from the base under a stressed conditions. The Wilcox L4 G41 option features a Wilcox Hybrid shroud, and provides easy attachment of the mount to any helmet drilled with a standard one or three-hole configuration.

ITEM	PART NO.	PRICE
G24 MOUNT - BLACK	IRDMNT-9980	\$599.00
G24 MOUNT - TAN	IRDMNT-9981	\$599.00
G41 HYBRID MOUNT - BLACK	IRDMNT-9982	\$749.00
G41 HYBRID MOUNT - TAN	IRDMNT-9983	\$749.00

**G24 Mount In Position**

**G24 Mount Flipped Up**

## FLIP MOUNT WEAPON MOUNT ASSEMBLY by **WILCOX**<sup>®</sup>

### ADVANCED TACTICAL EQUIPMENT

The mount is designed to flip out of the way when not in use and return to zero when back in operational mode. These are lightweight with a field proven dovetail attachment system and are made of high grade aluminum construction for increased durability over currently fielded products.

ITEM	PART NO.	PRICE
FLIP MOUNT ASSEMBLY	IRDMNT-9971	\$499.00

## ACCESSORY ITEMS IR PATROL ADD-ON'S

### TACTICAL ADD-ON ITEMS

We have several must have items for the IR PATROL which are included on this page. The first is the Battery Extender which will let the IR PATROL use 2 batteries and over double the time between battery changes.

The next item is the Download / Video Cable which will let you use the video out option if you have a M250 or M300W which also has a USB for image download if you have the LE100C, M250 or the M300W. The image download requires included PC software.

And third is the Amber Filter which helps reduce eye fatigue when using the system for long periods of time.

BATTERY EXTENDER  
IRDACC-6180

AMBER FILTER  
IRDACC-9967

DOWNLOAD CABLE  
IRDACC-9704

ITEM	PART NO.	PRICE
BATTERY EXTENDER	IRDACC-6180	\$99.00
AMBER FILTER	IRDACC-9967	\$69.00
CABLE DOWNLOAD and VIDEO	IRDACC-9704	\$200.00

Helmet and G24 Mount Not Included

## IR PATROL™ M250-K HELMET MOUNTED KIT

### INCLUDES:

- IR PATROL 640x480 Thermal Monocular
- Wilcox Interface Shoe
- Wilcox Helmet Mount Interface Kit
- 60hz High Speed Frame Rate
- Download/Video Cable
- Manual and QRG Guide
- Tactical Soft Case

**M250 SYSTEM KIT Part No. IRP-M250-K**

## IR PATROL™ M300W-K WEAPON MOUNTED KIT

### INCLUDES:

- IR PATROL 640x480 Thermal Monocular
- Reticle System (with Clip-On mode)
- Wilcox Interface Shoe
- Wilcox Flip Mount Weapon Base
- 60hz High Speed Frame Rate
- Download/Video Cable
- Manual, QRG Guide and Tactical Soft Case

**M300W SYSTEM KIT Part No. IRP-M300W-K**
