ADJUSTABLE TORQUE SCREWDRIVER

The IDEAL Adjustable Torque Screwdriver is a quality control device used to provide consistent user-settable torque in varying assembly or maintenance applications in accordance to 2017 NEC. The screwdriver includes an adjustable torque range of up to 36 in. lbs. (bi-directional accuracy, +/- 6%) and unique torque limiting clutch that will disengage once the preset torque has been reached. This feature prevents over-tightening which can cause possible damage to components and final products.

Description	Part No.
Adjustable Torque Screwdriver Kit, 0-36 in. lbs. (case included)	35-936
