Multi-Stream HD Video Conferencing & Data Visualization

Critical Information Made Clear

You need to make confident decisions quickly and accurately to manage your business effectively and stay competitive. ConX enterprise management and collaboration solutions offer powerful visual connections with your organization's people and data, bringing critical information together in one place, so you can do just that. Integrating human insight & interpersonal communication with operational intelligence, ConX gives you a complete view of your business and the collaborative tools to manage it. ConX bridges technologies to bring you face-to-face with both people and data—from anywhere around the globe—quickly & easily.

- Develop situational awareness and share a common operating picture
- Create actionable intelligence from your most important human and data sources
- Align employees, information, and resources to meet strategic objectives and priorities
- Easily conduct high-quality video meetings at any time, from any device

A Solution for Every Need

ConX Wall adapts to any conference room configuration and offers dynamic control of the multi-panel presentation and layout. Use the ConX Wall Unified Control Panel, our complimentary touch-based web app, to easily adjust ConX Wall to your meeting's needs. Change the layout of your video call or data feeds from equal size windows to a mix of large and small windows, or change your viewable inputs on the fly.

Seeing is Understanding

Utilize the power of video in your communication to build rapport with colleagues, customers, and partners around the globe.

- Bring teams together instantly, while reducing travel and saving time and money
- Work more efficiently and establish stronger relationships through personal connections
- See and hear personal intangibles, such as facial expressions and body language
- Captivate and collaborate with audiences both in and out of the room

Ready When, and Where, You Are

ConX is based on a robust SIP and H.323 video conferencing infrastructure, so you can bring people and data together through a wide variety of endpoints and services on the devices they already use.

conX Wall

ConX Wall
