First installation

1. On the EZ Suite display: Make sure that the USB WiFi adapter is inserted and enabled. Select EZ Display > EZ WiFi or select the USB Type A source from the source menu.

The WiFi Welcome screen displays. The display is ready to download the application and display wirelessly.

2. On the Mac, open the WiFi SSID list and select the access point indicated in the Welcome page. Enter the displayed PSK if encryption is enabled.

3. Open a browser and enter the IP address from the WiFi Welcome page into the address bar.

4. The Web interface of the display will open. Click the EZ Display Mac OS button.

5. Download and run EZ WiFi LAN-And-Driver-Installer.pkg.
