JTouch

Large touchscreen displays to engage your audience and fit your budget

Part#: INF5701, INF6501a, INF6501aAG, INF7001a, INF8001

InFocus
Collaboration That Works

The InFocus JTouch combines precise touchscreen technology with a bright, colorful LCD display to engage audiences in classrooms and beyond.

- 1080p touch display for a great price
- Your content will be interactive, bright and crisp in any light
- Accurate and responsive touch overlay with multi-touch capability
- Quickly connect and display your notebook via HDMI, VGA and more
- Convenient 4-port USB hub on the front of the 65-inch model for quick access to content from USB drives, document camera, and more
- Anti-glare available on 65- and 80-inch models

jtouch

Brightness and Clarity

JTouch helps you get your message across and connect with your audience with incredible brightness, color and clarity. Your images, text and video will be seen and enjoyed even in large spaces with high ambient light.
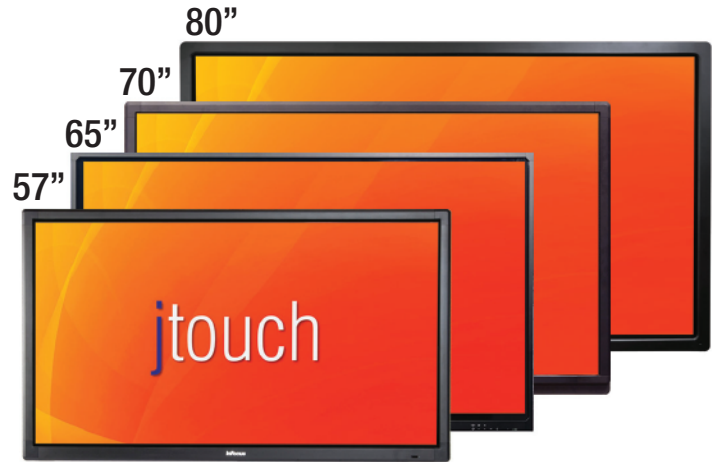

Engage Your Audience with Touch

Whether you're in a classroom, board room or at a trade show, the interactivity of JTouch engages audiences and encourages participation. JTouch gets students involved, attracts customers, and provides a great medium for testing and presenting touch-enabled applications.

Easy to Connect

JTouch provides multiple ways to display your content, including HDMI, VGA, and wireless via optional InFocus LiteShow adapter. To enable touch, simply connect the JTouch to your computer via USB.

Image shows optional InFocus BigNote whiteboarding software on your PC

Multi-touch with Gestures

Use multi-point touch gestures to manipulate your content and traverse your Windows, Mac or Chrome device on the giant touchscreen. Your software and content will come to life on a giant scale to engage your audience and encourage their interaction.

Location, Location, Location

Secure the JTouch to the wall with its standard VESA mounting pattern or mount it on an optional InFocus mobile cart. A mobile cart lets you position it in multiple locations within a room or share it between multiple rooms — wherever it's needed most.

Wireless Display and Touch

Add the optional InFocus **LiteShow 4 wireless presentation adapter** (INLITESHOW4) and have full wireless display and touch control of your computer from the JTouch. You can display multiple sources at the same time, and even annotate on what you're presenting (with free mobile app).
