

# BIG TOUCH

VISUAL COLLABORATION FOR K-12

## THE 55-INCH ALL-IN-ONE TOUCHSCREEN THAT ENGAGES THE ENTIRE CLASS.

Success happens in the classroom when students want to interact and become the creator of their own learning. The InFocus BigTouch provides a fast-paced, high-gloss experience that today's students are familiar with and will want to use.

### BRING STUDENTS TO THE FRONT

BigTouch's engaging, colorful touch display will bring students to the front of the class, let them teach each other, and allow teachers to move back and facilitate.

- Create a collaborative environment that gets students involved.
- Increase participation when students can touch it, manipulate it, and make it their own.
- Enhance one-to-one learning.
- Get students excited about difficult subjects.
- Encourage a sense of team and community.
- Teach students critical 21st century skills.

### BENEFITS AT A GLANCE

#### For Students

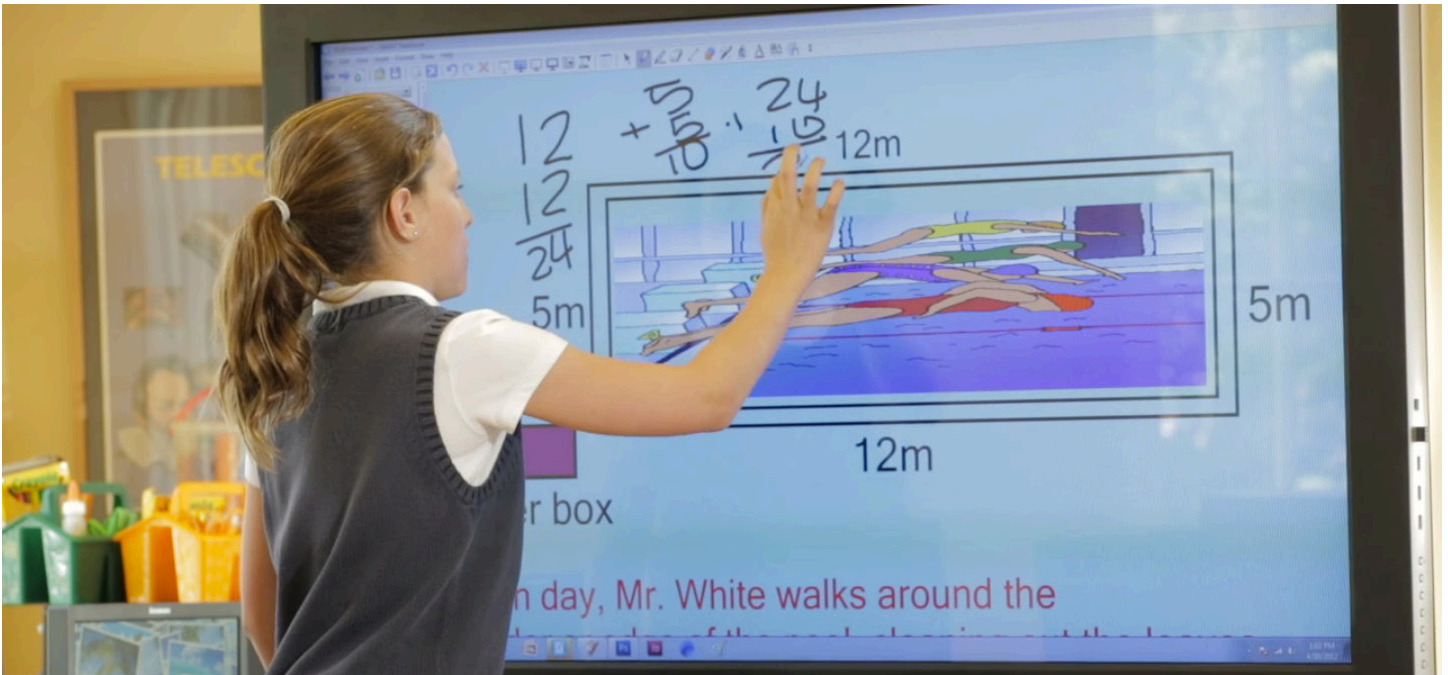

- Engage in active learning
- Collaborate with classmates
- Teach your peers
- Expand creative opportunities
- Improve digital literacy and communication
- Enhance understanding of course material

#### For Teachers

- Engage students from diverse backgrounds
- Reinforce learning targets and objectives
- Integrate digital communication to classroom
- Allow students to be constructors of their own learning
- Build 21<sup>st</sup> century skills
- Create a sense of community and ownership

#### For Administrators

- Enhance the potential of 1-to-1 computing
- Increase ROI on existing infrastructure and technology
- Leverage existing and future Windows software
- Promotes 21<sup>st</sup> century skills among faculty and staff
- Integrates into STEM and other 21<sup>st</sup> century learning initiatives

## TABLET EXPERIENCE...MAGNIFIED

Tablets are fun. Touch is intuitive. Touch computing is what students now know. The InFocus BigTouch employs a bright 55-inch touch display where content can be created, seen and shared by the whole class.

- Get the benefits of touch tablet with the productivity of a PC, all on a giant scale.
- Five-point touch screen delivers exceptionally accurate touches, swipes and gestures.
- Windows 8 gestures such as tap, slide, swipe, pinch, and rotate can be used to get a global view of everything on the screen and slide back and forth to find what you're looking for.
- Wireless keyboard and mouse also included to easily control the display from anywhere in the classroom.

## FLEXIBLE AND POWERFUL

Since BigTouch is a Windows 8 PC, it can support your new and legacy education software and hardware and provide valuable access to the cloud. Administrators and IT will also appreciate how BigTouch is easily adaptable to their security and management protocols.

- Run all your Windows apps, even the older ones, in touch mode.
- Use your existing peripherals such as document cameras, response systems or DVD players for better, brighter visualization.
- Powerful access to online curriculum, resources and content anytime the teacher or class needs.
- Break free of the limits of personal devices with a big, bright screen everyone can use.
